The Education of the Artist Ernest Chesneau, 1886 *The Education of the Artist* Ernest Chesneau, 1886 **Art, Artists, and Art Education** Kenneth Melvin Lansing, 1969 This unique book represents a blend of the philosophical and practical aspects of art education It reflects the author's belief that efficient responsible instruction in art depends upon the existence of a reasonable point of view about the nature and value of art and the nature of the artist and the student Consequently the first half of the text is devoted to developing aesthetic criteria in the author's words to discovering a sense of mystery and excitement that can be found in art education Using the nature of art and artists as the basis for determining practical methods of instruction Dr Lansing goes on to describe in behavioristic terms the objectives of art education suitable teaching processes and a recommended curriculum Specific artistic activities are described for each grade level from nursery school through junior high school Hence the classroom teacher does not have to guess about the appropriateness of a given activity for his grade Additional features of the text include one chapter devoted to new methods of evaluation and reporting to parents and another to the need for more effective research There is also a comprehensive chapter on supervision that covers curriculum planning personnel relationships and in service education managing equipment and supplies professional obligations and public relations The text opens with a challenging introduction which realistically appraises not only the favorable aspects of teaching but its problems and frustrations as well dust jacket The Training of the Memory in Art and the Education of the Artist Horace Lecoq de Boisbaudran, 1914 **Art Making and Education** Maurice Brown, Diana Korzenik, 1993 Since the early 1980s the Getty Center for Education in the Arts an operating entity of the J Paul Getty Trust has been committed to improving the quality of aesthetic learning in our nation's schools and museums According to the organizing idea of the center's educational policy teaching about the visual arts can be rendered more effective through the incorporation of concepts and activities from a number of interrelated disciplines namely artistic creation art history art criticism and aesthetics The resultant discipline based approach to art education does not however mandate that these four disciplines be taught separately rather the disciplines are to provide justifications subject matter and methods as well as exemplify attitudes that are relevant to the cultivation of perception in matters of art They offer different analytical contexts to aid our understanding and aesthetic enjoyment contexts such as the making of unique objects of visual interest artistic creation the apprehension of art under the aspects of time tradition and style art history the reasoned judgment of artistic merit art criticism and the critical analysis of basic aesthetic concepts and puzzling issues aesthetics Discipline based art education thus assumes that our ability to engage works of art intelligently requires not only our having attempted to produce artworks and gained some awareness of the mysteries and difficulties of artistic creation in the process but also our having acquired familiarity with art's history its principles of judgment and its conundrums *The Education of an Artist* Charles Lewis Hind, 1906 *The Training and Education of the Artist* Donald E.
