

EDUCATION AND EDUCATIONAL PSYCHOLOGY

- Education by all means, is an attempt to mould and shape the behavior of students. Its aims to produce desirable changes in them for all-round development of their personalities.
- The essential knowledge and skill to do this job satisfactorily is supplied by educational Psychology as **Peels** puts it in the following words:
- “**Educational Psychology** helps the teacher to understand the development of his pupils, the range and limits of their capacities the process by which they learn and their social relationships” **(1956)**

Educational Psychology An Introduction:

An Introduction to Educational Psychology Edgar Stones, 2012-05-04 This book introduces students of education to the elements of educational psychology It also relates as closely as possible the findings of research to classroom practice In order to make clear the fundamental processes involved in psychological development the book starts with a study of the way in which the young child adapts its behaviour to its environment This study considers some of the key aspects of physical development mainly the central nervous system At the same time the way physical growth and psychological development are influenced by the experience of the individual is also discussed This discussion of development is followed by an examination of the processes of learning with particular attention paid to the works of Piaget The salient points of each chapter are brought together in a summary which may be used by the reader to obtain a preliminary overview of the content of the chapter and as an aid to revision **A New Introduction to Educational Psychology** M. Pyle, 2015-06-16 Excerpt from *The Outlines of Educational Psychology* An Introduction to the Science of Education The fact that we have had no general text book in educational psychology has led to the preparation of this book which is the outgrowth of the work with my own classes I have endeavored to select for treatment those facts and principles of psychology fairly well established that have evident and direct bearing upon the problems of teaching The time is at hand when every step in educational procedure must have scientific justification This can come in the main from only one source the crucial test of experimental determination If this volume contributes in some small measure toward the end of making education more scientific I shall feel that its publication will be justified It has been my aim to be careful and conservative to keep within the warrant of established fact However I realize that nearly every page shows the need of more facts more data Experimental psychology is a thing of only yesterday educational psychology is a new born infant of today But it is an infant of great promise The army of trained investigators that is attacking the myriad problems of the school will give us even in a decade results of great importance to education But the work must be carefully done It is my belief that a text book should be a mere outline to be elaborated by teacher and students The questions and exercises and the references will help toward this elaboration About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art
