Educational Qualitative Research in Latin America Gary L. Anderson, Martha Montero, 2013-10-15 Juan Carlos Tedesco a prominent Argentinean sociologist argues that qualitative studies of education in Latin America represent a major challenge to current research Latin American qualitative researchers are producing interpretive studies that focus on the realities of current developmental and educational reforms Indigenous communities women students and teachers are given voice in these studies which represent the state of Latin American ethnographic qualitative and participatory research This is the first book in English to offer a state of the art collection of educational qualitative research studies in Latin America The first three chapters present an overview of qualitative research while the remaining seven chapters provide studies that explore various aspects of education from public schools to informal educational programs Education, Community Engagement and Sustainable Development Nicole Blum, 2012-01-02 A growing body of research has given critical attention to diverse theories and practices of environmental education and its potential contribution to addressing pressing global issues such as sustainable development and climate change While much of this work has focused on perspectives and practices in Europe and North America this book explores environmental learning within formal education in programmes by non governmental organisations and in public education spaces in Monteverde Costa Rica The discussion also highlights the need for more research to understand the broader social and economic interactions between such efforts and the communities in which they are located *Community Colleges and Their Students* J. Levin, 2009-11-23 This book employs a socio cultural approach to study the organizational dynamics and experiences of self formation that shape community college life The authors use case studies to analyze both the symbolic dimension and practices that enable the production of educational experiences in seven community colleges across the U S Levin and Montero Hernandez explain the construction of organizational identity and student development as a result of the connection between institutional forces and individual agency This work emphasizes the forms and conditions of interaction among college personnel students and external groups that were enacted to respond to the demands and opportunities in both participants local and larger contexts The authors acknowledge both the collective and individual efforts of community college personnel to create caring community colleges that support nontraditional students **Latino Education** Pedro Pedraza, Melissa Rivera, 2006-04-21 This landmark volume represents the work of the National Latino a Education Research Agenda Project NLERAP an initiative focused on school reform and educational research with and for Latino communities NLERAP s goal is to bring together various constituencies within the broad Latino community who are concerned with public education to articulate a Latino perspective on research based school reform and to use research as a guide to improving the public school systems that serve Latino students and to maximizing their opportunities to participate fully and equally in all social economic and political contexts of society Latino Education An Agenda for Community Action Research conceptualizes and illustrates the theoretical framework for the

NLERAP agenda and its projects This framework is grounded in three overlapping areas of scholarship and activism which are reflected within the chapters in this volume critical studies illuminating and analyzing the status of people of color in the United States Latino a educational research capturing the sociohistorical cultural and political schooling experiences of U S Latino a communities and participatory action research exemplifying a liberation oriented methodology for truly transformative education The volume includes both descriptive educational research and critical analyses of previous research and educational agendas related to Latino a communities in the United States According to current U S Census data Latinos now comprise the largest minority group in the total U S population Historically reflecting larger sociohistorical and economic inequalities in U S society the Latino community has not been well served by U S public school systems More attention to the Latino students educational issues is needed to redress this problem especially given the tremendous population increase and projected growth of Latino communities in the U S Latino Education An Agenda for Community Action Research is a major contribution toward this goal

Given the importance of Latino issues in the current social and economic times the publication of *Latinos in a Changing Society* is both timely and prescient in its contributions to the current discourse of how Latinos are being influenced by U S norms and culture and how Latinos are also affecting U S society This volume contributes to our need for comprehensive analysis of how Latin communities compare and contrast with other underserved groups It also examines how changes are taking place within specific Latino groups particularly between first and second generation Cubans returning Puerto Ricans Dominican poverty and emergent Mexican leaders in the New England area The opportunities that Latinos and dominant mainstream interests share are identified in this volume but so are the many areas in need of change In this current atmosphere of anger and suspicion toward immigrants this volume presents an analytical perspective that is too often absent from politically motivated debates about Latinos and their role in a changing society Undocumented immigrants are often portrayed as people who come to this country to take advantage of a generous welfare system contributing little to the economic and social development of the country This volume critically examines issues such as the Latino commitment to labor participation the ways that Latino parents engage in schools and in their communities health access and social programs the policing concerns within the Latino community the academic adjustments made by Latino college students as well as the educational opportunities that exist for Latinos across the country Unlike publications that seek to summarize knowledge about the Latino population in the United States *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis research and public consciousness needed to advance the educational social cultural and political participation and incorporation of Latinos in the new century This volume critically examines such issues as the

disparity in poverty among Latino groups the lack of access to health services the Latino commitment to labor participation the ways that Latino parents engage in schools and in their communities and the educational dropout rates of Latinos across the country and the underlying causes of those rates Unlike publications that seek to summarize knowledge about the Latino population in the United States *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis research and public consciousness needed to advance the educational social cultural and political participation and incorporation of Latinos in the new century
