romantic and cerebral This English translation of Edvard Munch's private diaries the most extensive edition to appear in any language captures the eloquent lyricism of the original Norwegian text The journal entries in this volume span the period from the 1880s when Munch was in his twenties until the 1930s reflecting the changes in his life and his work The book is illustrated with fifteen of Munch's drawings many of them rarely seen before While these diaries have been excerpted before no translation has captured the real passion and poetry of Munch's voice This is a translation that lets Munch speak for himself and evokes the primal passion of his diaries J Gill Holland's exceptional work adds a whole new level to our understanding of the artist and the depth of his scream

"Framing the Ocean, 1700 to the Present" Tricia Cusack, 2017-07-05 Before the eighteenth century the ocean was regarded as a repulsive and chaotic deep Despite reinvention as a zone of wonder and pleasure it continued to be viewed in the West and elsewhere as uninhabited empty space This collection spanning the eighteenth century to the present recasts the ocean as social space with particular reference to visual representations Part I focuses on mappings and crossings showing how the ocean may function as a liminal space between places and cultures but also connects and imbricates them Part II considers ships as microcosmic societies shaped for example by the purpose of the voyage the mores of shipboard life and cross-cultural encounters Part III analyses narratives accreted to wrecks and rafts what has sunk or floats perilously and discusses

attempts to recuperate plastic flotsam Part IV plumbs ocean depths to consider how underwater creatures have been depicted in relation to emergent disciplines of natural history and museology how mermaids have been reimagined as a metaphor of feminist transformation and how the symbolism of coral is deployed by contemporary artists This engaging and erudite volume will interest a range of scholars in humanities and social sciences including art and cultural historians cultural geographers and historians of empire travel and tourism

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature s experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism *Nature s Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism
