**Higher Education in Liquid Modernity** Marvin Oxenham, 2013-10-28 Based in sociologist Zygmunt Bauman's theory of liquid modernity this volume describes and critiques key aspects and practices of liquid education education as market driven consumption short life span of useful knowledge overabundance of information through a systematic comparison with ancient Greek paideia and medieval university education producing a sweeping analysis of the history and philosophy of education for the purpose of understanding current higher education positing a more holistic alternative model in which students are embedded in a learning community that is itself embedded in a larger society If liquid modernity has left a vacuum where according to Bauman the pilot's cabin is empty this volume argues that no structure is better positioned to fill this vacuum than the university and outlines a renewed vision of social transformation through higher education

**Education, Social Status, and Health** John Mirowsky, Catherine E. Ross, Education forms a unique dimension of social status with qualities that make it especially important to health It influences health in ways that are varied present at all stages of adult life cumulative self-amplifying and uniformly positive Educational attainment marks social status at the beginning of adulthood functioning as the main bridge between the status of one generation and the next and also as the main avenue of upward mobility It precedes the other acquired social statuses and substantially influences them including occupational status earnings and personal and household income and wealth Education creates desirable outcomes because

it trains individuals to acquire evaluate and use information It teaches individuals to tap the power of knowledge Education develops the learned effectiveness that enables self direction toward any and all values sought including health For decades American health sciences has acted as if social status had little bearing on health The ascendance of clinical medicine within a culture of individualism probably accounts for that omission But research on chronic diseases over the last half of the twentieth century forced science to think differently about the causes of disease Despite the institutional and cultural forces focusing medical research on distinctive proximate causes of specific diseases researchers were forced to look over their shoulders back toward more distant causes of many diseases Some fully turned their orientation toward the social status of health looking for the origins of that cascade of disease and disability flowing daily through clinics Why is it that people with higher socioeconomic status have better health than lower status individuals The authors who are well recognized for their strength in survey research on a broad national scale draw on findings and ideas from many sciences including demography economics social psychology and the health sciences People who are well educated feel in control of their lives which encourages and enables a healthy lifestyle In addition learned effectiveness a practical end of that education enables them to find work that is autonomous and creative thereby promoting good health John Mirowsky and Catherine E Ross are professors in both the Department of Sociology and Population Research Center at the University of Texas at Austin Mirowsky and Ross have done the population health community a splendid service by presenting a compelling and complex story for the relationship between social status and health and identifying many important contentious issues for future theoretical debate and empirical exploration I highly recommend Education Social Status and Health to all health researchers interested in the social and economic determinants of health and well being Gerry Veenstra Canadian Journal of Sociology Online
