### **Education For Citizenship Continuum Collection:**

Education, Authority, and the Critical Citizen Neil Wilcock, 2023-08-24 This book offers a unique analysis of the tension between the individual and society in educational contexts and the role that citizenship and democratic education can play. It approaches the question from two different perspectives: the institutional and the interactional, and argues that any solution must answer the tension from both or it will necessarily fail. The answer is found through a political methodology that places education at the centre and concludes that a balance can be found if we embrace the federated disestablishment of education and state and internally democratic schooling that aims to realise the emancipation of the political child. The book situates itself in the tradition of political philosophy that is education focused, identifying an unresolved tension between the individual and society in the works of Rousseau, Dewey and Freire. It discusses the concept of authority as a primary issue persisting in this tension. It does so by exploring both interactional and institutional responses based on the idea of the free individual and cooperative associations. The author advocates an education system that creates the necessary space for the cultivation of the free individual and is run by the principles of internally democratic schooling. With a strong focus on citizenship and the role of education in the development of social justice oriented citizens, this book will be of great interest to researchers, academics and postgraduate students in the fields of philosophy of education, political philosophy, educational theory and citizenship education.

**Empowering Teachers and Democratising Schooling** Keith Heggart, Steven Kolber, 2022-09-13 This edited book brings together teachers and education academics who are committed to education about for and through democracy. It presents a diverse range of viewpoints about the challenges facing educators working across different sectors and discusses ways to challenge issues like neoliberalism, excessive managerialism and accountability and privatisation. It also engages with the times that education has and continues to fail students. This book outlines both logistical and ideological challenges which educators committed to democracy face and describes innovative approaches they have adopted, including networking, the use of social media and digital tools and extending their reach beyond their local communities to international audiences. It encourages conversations about how educators and academics might re-commit to education for democracy and generate further avenues for discussion and action by educators and academics.

respected philosophical and practical orientation including a commitment to deep learning in a context of critical inquiry With the aid of this valuable text teachers can assist primary middle and secondary students to become active and informed citizens who contribute to a just democratic and sustainable future *Islam and Citizenship Education* Ednan Aslan, Marcia Hermansen, 2015-01-14 The scholarly contributors to this volume investigate various means to stimulate and facilitate reflection on new social relations while clarifying the contradictions between religious and social affiliation from different perspectives and experiences They explore hindrances whose removal could enable Muslim children and youth to pursue equal participation in political and social life and the ways that education could facilitate this process **Teaching**

**Democracy** Emery J. Hyslop-Margison, James Thayer, 2019-02-11 As we move forward well into the 21st century most citizens around the globe seemingly accept the rudiments of a democratic citizenship And yet in spite of this broad acceptance a clear articulation of what democratic citizenship entails remains somewhat elusive In this book Hyslop Margison and Thayer achieve two critically important objectives in response to this problem First they successfully articulate the threat to democracy posed by current citizenship education programs that adopt a largely instrumental framework fostering passivity and compliance by protecting the established parameters of neo liberal social design Second they show a way out of this anti democratic trap by illustrating how critical theory with its marvelous ability to provide trenchant critiques of capitalism and turn those critiques into concrete political action provides the ideal pedagogical approach to educate our students effectively as future democratic citizens The authors critique the conditions of modern democratic citizenship and distinguish a robust or thick version of citizenship based on citizen agency and participation in the construction of social reality from contemporary models that undermine citizen engagement They contend that it is only through critical theory and the political agency it inspires that meaningful democratic change can and must occur Hence the role of education in their view is not merely to prepare students for a new economic reality but to prepare them instead to shape that reality in more progressive and socially just ways This book eloquently argues that the citizenship mission of schools ought to teach students what is possible rather than simply objectifying them as human capital being prepared for the inevitable impact of the policies determined by others **Citizenship Education in Multicultural Society** Daria Hejwosz-Gromkowska, Celina Czech-Włodarczyk, Dobrochna Hildebrandt-Wypych, Inetta Nowosad, 2025-01-20 Analysing the citizenship education approaches of England the Netherlands Canada Ontario and Singapore offers an interesting glimpse into how different societies handle the interplay between cultural diversity national identity and educational strategies This study illuminates the shared challenges and unique responses shaped by each country's historical cultural and political context The study aims to analyse the selected issues concerning the agenda of citizenship education policy and school practices in the selected countries The authors undertake a comprehensive review of the development of multicultural societies and delve into an analysis discussion and reconstruction of the current socio political context of citizenship

*Education as Humanisation* Scherto Gill, Ulrike Niens, 2017-10-02 Over the past decades there has been a consistent and poignant ambiguity with regard to the role of education in the context of post conflict and divided societies working towards building peace Most recently global developments including the after effects of the Arab Spring the devastating wars in Syria and the refugee crisis in Europe have directed our attention once more to the part that education can play in building peace at many levels In this context it is timely to create a space for a focused inquiry and scholarly debate about peace oriented pedagogies and how they might affect the post conflict reconstruction in divergent settings Thus both the subject and the content of this book are important in the light of the current needs in many societies emerging from conflicted community relations In particular they propose a refreshing and transformative view of peace based on a humanising conception of education and dialogic pedagogy as a key avenue for peacebuilding Through both conceptual inquiries and empirical case studies the book will appeal to educational thinkers researchers practitioners policy makers NGO workers and the public in re examining some of the key concepts identifying pivotal underlying issues in the field Furthermore by offering a principled persuasive conceptual framework and by problematising implementations and interventions in practice this book can serve to provoke more appraisals evaluations and constructive critiques of humanisation and dialogic pedagogy in peacebuilding education This book was originally published as a special issue of Compare A Journal of Comparative and International Education

**Education, Democracy and Development** Clive Harber, Vusi Mncube, 2012-05-14 Education is often seen as the

key agency in international development and poverty reduction Frequently the emphasis is on the economic and social role of education in development This book on the other hand is unusual in explicitly examining the political role of education in development In particular it sets out the theories evidence and arguments concerning the potential and actual relationships between education and democracy and critically explores the contradictory role of formal education in both supporting and hindering democratic political development A key theme of the book is the importance of considering the type and nature of the education actually provided and experienced what goes on inside the black box of education Currently in developing countries and elsewhere this is often at odds with democratic principles but the book also provides many examples of successful democratic practice in schools in developing countries as well as discussing a detailed case study of South Africa where democratic change in education is a key aspect of the policy agenda **Working Side by Side** Shoshanna
