Education, Inc Alfie Kohn,Patrick Shannon,2002 While educators want their students to grow into thoughtful and curious people the overriding objective of corporations is to maximize their own profits From that fact alone we can predict what is likely to happen to the nature and purposes of our schools when business becomes involved in the education of our children This unique and timely anthology chronicles the extent of that involvement along with the troubling consequences it has already brought Author Alfie Kohn and professor of education Patrick Shannon have assembled a provocative collection of articles including an analysis of the racial implications of voucher programs vivid accounts of how schoolchildren are targeted by advertisers descriptions of how corporate propaganda is insinuated into classroom curriculums an expos of the political connections enjoyed by giant textbook and test publishers a critical look at the process whereby teachers are turned into grant writers This book builds a convincing case against those who see children as customers or workers and those who would turn learning into a business As Kohn notes Corporations are not shy about trying to make over the schools in their own image It s up to the rest of us to firmly tell them to mind their own businesses In the Front Door Hugh

*The Struggle for Identity in Today's Schools* Patrick M. Jenlink (Ed), Faye Hicks Townes, 2009-05-16 The Struggle for Identity in Today's Schools examines cultural recognition and the struggle for identity in America's schools In particular the contributing authors focus on the recognition and misrecognition as antagonistic cultural forces that work to shape and at times distort identity What surfaces throughout the chapters are two lessons to be learned in relation to identity The first lesson is that identities and the acts attributed to them are always forming and re-forming in relation to historically specific contexts and these contexts are political in nature i.e. defined by issues of diversity such as race ethnicity language sexual orientation gender and economics The second lesson presented by the authors is that identity forms in and across intimate and social contexts over long periods of time The historical timing of identity formation cannot simply be dictated by discourse The identities posited by any particular discourse become important and a part of everyday life based on the intersection of social histories and social actors Importantly the social cultural use of identities leads to another way of conceptualizing histories personhoods cultures and their distributions over social and political groups

Davies,2003 Today s school student lives and learns primarily in an electronic culture but the current model for teaching and learning is predicated upon a culture of print that has lasted 500 years This book offers an understanding of how our emerging culture impacts learning particularly how the computer is radically altering the writing process as well as our understanding of what is text Handbook of Classroom Management Carolyn M. Evertson,Carol S. Weinstein,2013-10-31

Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management

Childhoods Gaile Sloan Cannella, Lourdes Diaz Soto, 2010 For the past 20 years a range of scholars educators and cultural workers have examined dominant discourses of childhood using critical feminist and other postmodern perspectives Located in a variety of disciplines these poststructural deconstructive and even postcolonial critiques have challenged everything from notions of the universal child to adult child dualisms to deterministic developmental theory The purpose of this volume is to acknowledge the profound contributions of that large body of literature while demonstrating the ways that critical analyses can be used to generate avenues actions that increase possibilities for social justice for those who are younger while at the same time avoiding determinism In this time of globalization hyper capitalism and discourses that would control and disqualify through constructions like accountability we believe that projects such as this are of utmost importance The volume is divided into four major sections to reflect the multiplicity of human voices and perspectives section I contemporary circumstances and dominant discourses within which we all attempt to function sections II and III and the generation of new possibilities for constructing relationships together section IV Finally a voice from the heart within a reconceptualist social science agenda for early childhood studies is presented

The Same Thing Over and Over Frederick M. Hess, 2010-11-15 Whatever they think of school vouchers or charter schools teacher merit pay or bilingual education most educators and advocates take many other things for granted The one teacher one classroom model The professional full time teacher Students grouped in age defined grades The nine month calendar Top down local district control All were innovative and exciting in the nineteenth century As Hess shows the system hasn't changed since most Americans lived on farms and in villages since school taught you to read write and do arithmetic and since only an elite went to high school let alone college

**Teaching What Can't Be Taught** David Rigoni, 2002-08-27 The current educational culture of standards accountability and creeping educational capitalism finds teachers increasingly teaching laundry lists of facts and skills Less attention is being paid to the big picture or worldview Author David Rigoni offers an alternative perspective Using a shaman metaphor he examines how the most important learning in a professional program takes place between the lines of the formal curriculum He argues that this worldview change ought to be intentional and that all aspects of the educational process ought to work to that end To clarify what is needed the book then looks to educators from throughout history who worked with their students with a total focus on changing their worldviews These educators of course are the shamans

**Who Benefits From Special Education?** Ellen A. Brantlinger, 2006-08-15 Who Benefits From Special Education Remediating Fixing Other People's Children addresses the negative consequences of labeling and separating education for students with disabilities the cultural biases inherent in the way that we view children's learning difficulties the social construction of disability the commercialization of special education and related issues The theme that unifies the chapters is that tension exists between professional ideology and practice and the wishes and expectations of the recipients of professional practice children adolescents and adults with disabilities and their families These voices have rarely taken center stage in formulating important decisions about the quality and characteristics of appropriate practice The dominant view in the field of special education has been that disability is a problem in certain children rather than an artifact that results from the general structure of schooling it does not take into consideration the voices of people with disabilities their families or their teachers Offering an alternative perspective this book deconstructs mainstream special education ideologies and highlights the personal perspectives of students families and front line professionals such as teachers and mental health personnel It is particularly relevant for special education disabilities studies graduate students and faculty and for readers in general education curriculum studies instruction theory and critical theory
