Sharp, 2008-11-03 Computer Education for Teachers Integrating Technology into Classroom Teaching is designed to introduce future teachers to computer technology in a meaningful practical fashion It is written for undergraduate and graduate students who want an up to date readable practical concise introduction to computers for teachers Intelligent Adaptation and Personalization Techniques in Computer-Supported Collaborative Learning Thanasis Daradoumis, STAVROS DEMETRIADIS, Fatos Xhafa, 2012-03-14 Adaptation and personalization have been extensively studied in CSCL research community aiming to design intelligent systems that adaptively support eLearning processes and collaboration Yet with the fast development in Internet technologies especially with the emergence of new data technologies and the mobile technologies new opportunities and perspectives are opened for advanced adaptive and personalized systems Adaptation and personalization are posing new research and development challenges to nowadays CSCL systems In particular adaptation should be focused in a multi dimensional way cognitive technological context aware and personal Moreover it should address the particularities of both individual learners and group collaboration As a consequence the aim of this book is twofold On the one hand it discusses the latest advances and findings in the area of intelligent adaptive and personalized learning systems On the other hand it analyzes the new implementation perspectives for intelligent adaptive learning and collaborative systems that are brought by the advances in scripting languages IMS LD educational modeling languages and learning activity management systems Given the variety of learning needs as well as the existence of different technological solutions the book exemplifies the methodologies and best practices through several case studies and adaptive real world collaborative learning scenarios which show the advancement in the field of analysis design and implementation of intelligent adaptive and personalized systems *An Analysis of Two Decades of Educational Technology Publications* Gloria Natividad, J. Michael Spector, Nicholas Evangelopoulos, 2018-05-11 This book presents a challenging and multi faceted research project that required state of the art methodological approaches The project involved analyzing data collected from 10 000 research articles published in ten leading journals in the area of educational technology over 20 years from January 1994 to December 2014 advanced analytic approaches such as latent semantic analysis and expert insights and interpretations of the subject matter It captures the trends in a number of research streams within the discipline of educational technology and identifies the point in time when a massive change took place This is a significant achievement given that in epistemology and philosophy of science there have always been discussions of paradigm shifts but researchers have always identified them qualitatively This is the first work to identify a paradigm shift using rigorous quantitative methods The analysis procedure involved big data and sophisticated analysis which supported the identification of clusters at several breakpoints from which the richest set was selected in order to provide the most detailed analysis This

comprehensive analysis also shows what has been published and by whom in those ten top tier journals This work makes a highly significant contribution to the field of learning technologies and provides the groundwork and a significant data source for other scholars both new and experienced to build on and expand in their work
