## **Educational Countercultures Confrontations Images Vision:**

Discourses of Education in the Age of New Imperialism Jerome Satterthwaite, Elizabeth Atkinson, 2005 This fourth volume in the Discourse Power Resistance series takes the theme into new territory setting educational thinking and practice firmly in its global political context Drawing on schools of thought as diverse as Marxism and eco feminist theology the contributors to Part 1 Global Imperialism and Terror The Theory and Practice of Othering led by Peter McLaren examine the possibilities for critical thinking and transformative practice in the aftermath of 9 11 and the new age of cultural and political imperialism In Part 2 Praxis Thinking and Doing contributors draw on a range of critical perspectives to examine both the theory and practice of education taking the reader from the self to the system and back again via dynamic systems theory flow theory and a multiplicity of diverse and often conflicting practices of subversion The book closes with two radical departures from the norm a seriously playful transgression into the fields of pop art and film and a searing poetic lament on the current state of educational policy and practice As educators we are all in William Pinar s words behind enemy lines in a field which despite our continued bids for autonomy is increasingly hijacked by globalizing political forces This book offers modes of resistance which are startling unsettling and challenging It will be of deep interest to students tutors and researchers in education policy studies and related fields and to those who are involved in training or becoming the educators of the future The contributors are Peter McLaren William Pinar Mike Cole Lisa Isherwood Elizabeth Atkinson Tamsin Haggis Sue Clegg Gill Boag Munroe Ros Ollin Victoria

From Technicians to Teachers Leon Benade,2012-12-06 From Technicians to Teachers provides theoretical and practical reasons for suggesting that widespread international curriculum reform of the post 1990 period need not deprofessionalise teaching The widely held deprofessionalisation thesis is both compelling and fatalistic leading to a despairing sense that teachers are either no more than technicians or that they can be reprofessionalised through definitions of effective teachers promoted by the reforms However there are many teachers who do not see their work in either of these ways The book is structured around an in depth case study detailing the implementation of The New Zealand Curriculum in that nation one of the best international examples of neoliberal reform Benade argues that curriculum policy can and should be analysed critically while pointing out the dangers for ethical teachers that can exist in national or state curricula Energising and inspiring this book reminds teachers and teacher educators that although they work in a globalised context their own role is fundamental and has a profoundly ethical basis despite the negative impacts of three decades of education reform *Child Labour in Global Society* Paul Close,2014-05-30 This book presents a novel study of children s compulsory productive educational labour in modern and modernizing societies under globalization and the implications for such matters as children s everyday lives relationships and rights international legal instruments relevant analytical notions including slavery and sociological analysis
