Bowers,Alan R. Shoho,Bruce G. Barnett,2015-09-01 As the sixth volume in the International Research on School Leadership series the contributing authors in this volume consider the history challenges and opportunities of the field of research and practice in educational leadership and administration in schools and districts Ten years after the work of Firestone and Riehl 2005 and their contributing authors our aim with the present volume was to summarize and update the work of the field and provide a

space to consider the multiple futures of educational leadership in schools and districts as both challenges and opportunities. The first decade of the twenty first century brought significant critiques, challenges, and competition to the research and practice of training leaders and administrators of schools and districts around the world. Congruently, the field experienced significant growth and change as multiple new sub domains flourished and were founded. Thus, in this volume, we were delighted to include excellent chapters from multiple authors that considered the duality of the challenges and opportunities of the work of the field of educational leadership and administration research to date. The opportunities and challenges of new visions of leadership in traditional and non traditional schools. The evolving state of research evidence in educational leadership and the increasing sophistication of multiple methodologies including qualitative research, quantitative modeling, the ability to test theory, and the increasing opportunities brought on by the intersection of data research and practice. The preparation of educational leaders. And the emerging trends in the professional development of school leaders. The authors of the nine chapters in the present book volume took on this challenge of confronting the duality of not only including the past as we look to the future but also the duality of the critique of the field in the midst of exciting and significant progress in our knowledge and understanding of leadership in schools. In the first section of the book, Chapters 2, 3, and 4, the authors examine the interplay of educational leadership research and theory as it relates to reform in schools, especially as it relates to serving historically underserved populations globally. In section 2, Chapters 5 and 6, the authors highlight the importance of methodological considerations in school leadership research as a means to understand theory and practice as well as providing interesting avenues that point to multiple exciting future possibilities through relying on current innovations noted within the chapters. Section 3, Chapters 7 and 8, examine the research and practice of school leadership preparation, especially as it relates to university district partnerships and non traditional school settings. And in the final chapter, Chapter 9, our capstone contributor provides a means to link the present volume with the past writings on these topics while also providing a lens to view the exciting possibilities and promises of the multiple futures of the field of educational leadership research and practice.

Providing practical philosophical and experiential insights into the field, *The Handbook of Ethical Educational Leadership* is an essential resource for the study of ethical leadership. Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06. The first International Handbook of Educational Leadership and Administration, Leithwood et al. was published in 1996 and quickly became something of a best seller for reference works within education. Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s, combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research, although there is a romance with leadership as an explanation for success in many non-school enterprises as well. During the two-year period during which this current handbook was being written, activity in the realms of school leadership, school improvement, and leadership development gained further momentum. The English government created its new National College of School Leadership, and several Asian nations announced new initiatives in leadership selection, preparation, and development. **The Contemporary Superintendent** Lars G. Bjork, Theodore J. Kowalski, 2005-06-28. A strong superintendent is critical to the success of an entire school district, and this exciting new resource details the issues surrounding the state policies that appoint superintendents. **Examining the Assistant Principals** Alan R. Shoho, Bruce G. Barnett, Autumn K. Tooms, 2011-11-01. This edited book highlights the importance and complexity of the assistant principals. As noted in all the chapters, the assistant principal is a critical partner in creating a professional learning community that serves all students well. Often neglected or ignored in the literature, assistant principals are more than disciplinarians and student or building managers. In the best of all worlds, they provide the professional support and partnership with their principals to create high

performing schools Unfortunately as noted in some of the chapters the ideal and actual roles that assistant principals exercise often create a gap that seethes with disillusionment and dissatisfaction The challenge for the profession is to better align the roles and expectations of assistant principals so that they can experience the best of being a school leader
