Lee,2001-08-24 In this first critical account of Matta Clark s work Pamela M Lee considers it in the context of the art of the 1970s particularly site specific conceptual and minimalist practices and its confrontation with issues of community property the alienation of urban space the right to the city and the ideologies of progress that have defined modern building programs Although highly regarded during his short life and honored by artists and architects today the American artist Gordon Matta Clark 1943 78 has been largely ignored within the history of art Matta Clark is best remembered for site specific projects known as building cuts Sculptural transformations of architecture produced through direct cuts into buildings scheduled for demolition these works now exist only as sculptural fragments photographs and film and video documentations Matta Clark is also remembered as a catalytic force in the creation of SoHo in the early 1970s Through loft activities site projects at the exhibition space 112 Greene Street and his work at the restaurant Food he participated in the production of a new social and artistic space Have art historians written so little about Matta Clark s work because of its ephemerality or as Pamela M Lee argues because of its historiographic political and social dimensions What did the activity of carving up a building in

anticipation of its destruction suggest about the conditions of art making architecture and urbanism in the 1970s What was one to make of the paradox attendant on its making that the production of the object was contingent upon its ruination How do these projects address the very writing of history a history that imagines itself building toward an ideal work in the service of progress In this first critical account of Matta Clark's work Lee considers it in the context of the art of the 1970s particularly site specific conceptual and minimalist practices and its confrontation with issues of community property the alienation of urban space the right to the city and the ideologies of progress that have defined modern building programs
