Food Fit for Fido Tim Larkin,1983      **Food Fit for Humans** Frank Avray Wilson,1975      World Protein Resources A. Jones,2012-12-06 Protein is the origin foundation and essential component of life and of human activity It is an emotive subject and any claim statement or opinion is sensitive to attack from experts and others who have a restricted experience or are subjects of commercial or political pressure Many of the facts opinions and forecasts are disputed and may be disproved in due course As presented they are true as far as is known but may represent little more than majority impression at the time of writing Changes in the seventies are rapid drastic and mainly unanticipated At any time there could be a comprehensively influential discovery or incident which could alter the entire pattern of protein supply and demand Scientific and academic statements in this book may be criticised by purists but it is to be appreciated that the book is intended for universal appreciation Statements are written to be understood within the context If the author offends by slightly bending the rules of scientific presentation or by making a claim which might not prove absolutely accurate if all factors are analysed he makes no apology When everybody in the world has a full belly and a contented mind there will be time to argue about details At present we need an extra 20 million tons of protein per year If this book helps to find it the author will be happy
