Smith, 2020-02-19 From obscure Pre Columbian beginnings in

the Andes Mountains to global popularity today the story of the potato is one of rags to riches In Potato esteemed culinary historian Andrew F Smith reveals the captivating story of a once lowly vegetable that has changed and continues to change the world First domesticated by prehistoric people in the Andes the potato has since been adopted by cultures around the globe For instance the potato was aggressively adopted by cooks in India and China where it has become a dietary staple In fact these two countries now stand as the world s largest potato producers Nonetheless despite its popularity in this era of both fast food and health consciousness the potato is now suffering negative publicity regarding its low nutritional value Its health benefits continue to be debated especially considering that the potato is most often associated with the ubiquitous but high calorie french fry Potato is a captivating read that provides a concisely written but thoroughly researched account of the history economy politics and gastronomy behind this beloved starch as well as recipes As loaded with goodies as a well dressed baked potato this book is comforting and satisfying

Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the

reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures
