## **Food Aid After Fifty Years Recasting Its Role:**

Food Aid After Fifty Years Christopher Brendan Barrett, Daniel G. Maxwell, 2005 Publisher description The 1954 Agricultural Trade Development and Assistance Act effectively began the modern era of food aid Over the past fifty years the lives of hundreds of millions of people worldwide have been improved Despite this it remains one of the most misunderstood and controversial instruments of contemporary international policy Food Aid After Fifty Years explores the motivations and modalities of food aid and examines issues which impinge on its effectiveness The book utilizes analytical and empirical accounts of food aid to resolve key misunderstandings and explore long standing myths An alternative strategy is presented for recasting food aid making it more effective in alleviating poverty hunger and vulnerability Food Aid After Fifty Years provides a clear comprehensive and current explanation of a wide range of issues surrounding food aid and its policy and operations and will prove vital to students of Development Economics and Development Studies and those working in the field

**Foreign Intervention, Warfare and Civil Wars** Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil

wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies      *Accounting for Hunger* Olivier De Schutter, Kaitlin Y Cordes, 2011-11-14 The challenge of global hunger is now high on the agenda of governments and international policy makers This new work contributes to addressing that challenge by looking at the obstacles which stand in the way of implementing a right to food in the era of globalisation The book describes the current situation of global hunger it considers how it relates both to the development of food systems and to the merger of the food and energy markets and it explains how the right to food contributes to identifying solutions at the domestic and international levels The right to food it argues can only be realised if governance improves at the domestic level and if the international environment enables governments to adopt appropriate policies for which they require a certain policy space The essays in this book demonstrate that the current regimes of trade investment and food aid as well as the development of biofuels production all of which contribute to define the international context in which states implement such reforms should be reshaped if national efforts are to be successful The implication is that extraterritorial human rights obligations of states their obligations to respect the right to food beyond their national territories for instance in their food aid investment or trade policies as well as the strengthening of global governance of food security as is currently being attempted with the reform of the Committee on World Food Security in Rome have a key role to fulfill domestic reforms will not achieve sustainable results unless the international environment is more enabling of the efforts of governments acting individually In this reform process accountability both at the domestic and international level is essential if sustainable progress is to be achieved in combating global hunger      **40 Chances** Howard G Buffett, 2013-10-22 The son of legendary investor Warren Buffet relates how he set out to help nearly a billion individuals who lack basic food security through his passion of farming in forty stories of lessons learned      **Food and Revolution** Christiane Berth, 2021-02-02 Food policy and practices varied widely in Nicaragua during the last decades of the twentieth century In the 1970s and 80s food scarcity contributed to the demise of the Somoza dictatorship and the Sandinista revolution Although faced with widespread scarcity and political restrictions Nicaraguan consumers still carved out spaces for defining their food choices Despite economic crises rationing and war limiting peoples food selection consumers responded with improvisation in daily cooking practices and organizing food exchanges through three distinct periods First the Somoza dictatorship 1936 1979 promoted culture and food practices from the United States which was an option only for a minority of citizens Second the 1979 Sandinista revolution tried to steer Nicaraguans away from mass consumption by introducing an austere frugal consumption that favored local products Third the transition to democracy between 1988 and 1993 marked by extreme scarcity and economic crisis witnessed the re introduction of market mechanisms mass advertising and imported goods Despite the erosion of food policy during transition the Nicaraguan revolution contributed to recognizing food security as a basic right and the rise of peasant movements for food sovereignty      **Economics of Agricultural Development** George W. Norton, Jeffrey

Alwang, William A. Masters, 2014-09-25 *Economics of Agricultural Development* examines the causes severity and effects of poverty population growth and malnutrition in developing countries It discusses potential solutions to these problems progress made in many countries in recent years and the implications of globalization for agriculture poverty and the environment Topics covered in the book include Means for utilizing agricultural surpluses to further overall economic development The sustainability of the natural resource environment Gender issues in relation to agriculture and resource use The contribution of agricultural technologies The importance of agricultural and macroeconomic policies as related to development and trade and the successes and failures of such policies Actions to encourage more rapid agricultural and economic development The globalization of trade in goods services and capital has been fundamental to changes being experienced in the agricultural and rural sectors of developing countries It has major implications for the fight against poverty and food insecurity and for environmental sustainability Recently agriculture has returned to a position of center stage in the development dialog as food price volatility has increased along with water scarcity and concerns grow over the effects of climate change on food supply and food security This new edition of the essential textbook in the field builds on the 2010 edition and reflects the following developments Growth in foreign demand for land and other natural resources Significant progress in agricultural and economic development in some low income countries while others are being left behind Continued growth in demand for higher valued farm products This book is essential reading for undergraduate students seeking to understand the economics of agricultural development and the world food system including environmental and human consequences international trade and capital flows

**Food** Jennifer Clapp, 2020-04-20 We all need food to survive and forty percent of the world's population relies on agriculture for their livelihood Yet control over food is concentrated in relatively few hands Turmoil in the world food economy in recent decades has highlighted a number of vulnerabilities and contradictions inherent in the way we currently organize this vital sector Extremes of both undernourishment and overnourishment affect a

significant proportion of humanity And attempts to increase production through the spread of an industrial model of agriculture has resulted in serious ecological consequences The fully revised and expanded third edition of this popular book explores how the rise of industrial agriculture corporate control inequitable agricultural trade rules and the financialization of food have each enabled powerful actors to gain fundamental influence over the practices that dominate the world food economy and result in uneven consequences for both people and planet A variety of movements have emerged that are making important progress in establishing alternative food systems but as Clapp s penetrating analysis ably shows significant challenges remain

The impact of large-scale social protection interventions on grain prices in

poor countries: Evidence from Ethiopia Hoddinott, John F., Stifel, David, Hirvonen, Kalle, Minten, Bart, 2018-03-22 There has long been concern that cash and in kind transfers might affect prices in developing country food markets While there have been a number of studies at highly aggregated levels much less is known about the effects of cash transfers on local food prices and even less about how they compare to food transfers We consider this issue in the context of a large social protection intervention Ethiopia's Productive Safety Net Programme Using 12 months of price data from 233 localities and controlling for temporal location and market characteristics we find Cash transfers have no effect on food prices There is some evidence that food transfers reduce food prices Maize transfers reduce aggregate grain prices wheat transfers reduce the price of maize and the negative effect of food transfers on food prices is larger in more remote markets However the magnitudes of these effects are trivially small both in absolute and percentage terms
