N. Anderson, 2014-09-15 Chinese food is one of the most recognizable and widely consumed cuisines in the world Almost no town on earth is without a Chinese restaurant of some kind and Chinese canned frozen and preserved foods are available in shops from Nairobi to Quito But the particulars of Chinese cuisine vary widely from place to place as its major ingredients and techniques have been adapted to local agriculture and taste profiles To trace the roots of Chinese foodways one must look back to traditional food systems before the early days of globalization Food and Environment in Early and Medieval China traces the development of the food systems that coincided with China's emergence as an empire Before extensive trade and cultural exchange with Europe was established Chinese farmers and agriculturalists developed systems that used resources in sustainable and efficient ways permitting intensive and productive techniques to survive over millennia Fields gardens semiwild lands managed forests and specialized agricultural landscapes all became part of an integrated network that produced maximum nutrients with minimal input though not without some environmental cost E N Anderson examines premodern China's vast active network of trade and contact such as the routes from Central Asia to Eurasia and the slow introduction of Western foods and medicines under the Mongol Empire Bringing together a number of new findings from archaeology history and field studies of environmental management Food and Environment in Early and Medieval China provides an updated picture of language relationships cultural innovations and intercultural exchanges Writing and Authority in Early China Mark Edward Lewis, 1999-03-18 This book traces the evolving uses of writing to command assent

and obedience in early China an evolution that culminated in the establishment of a textual canon as the foundation of imperial authority Its central theme is the emergence of this body of writings as the textual double of the state and of the text based sage as the double of the ruler The book examines the full range of writings employed in early China such as divinatory records written communications with ancestors government documents the collective writings of philosophical and textual traditions speeches attributed to historical figures chronicles verse anthologies commentaries and encyclopedic compendia Lewis shows how these writings served to administer populations control officials form new social groups invent new models of authority and create an artificial language whose mastery generated power and whose graphs became potent objects Writing and Authority in Early China traces the enterprise of creating a parallel reality within texts that depicted the entire world These texts provided models for the invention of a world empire and one version ultimately became the first state canon of imperial China This canon served to perpetuate the dream and the reality of the imperial system across the centuries

The Politics of Mourning in Early China Miranda Brown,2012-02-01 The Politics of Mourning in Early China reevaluates the longstanding assumptions about early imperial political culture According to most explanations filial piety served as the linchpin of the social and political order as all political relations were a seamless extension of the relationship between father and son a relationship that was hierarchical paternalistic and personal Offering a new perspective on the mourning practices and funerary monuments of the Han dynasty Miranda Brown asks whether the early imperial elite did in fact imagine political participation solely along the lines of the father son relationship or whether there were alternative visions of political association The early imperial elite held remarkably varied and contradictory beliefs about political life and they had multiple templates and changing scripts for political action This book documents and explains such diversity and variation and shows that the Han dynasty practice of mourning expressed many visions of political life visions that left lasting legacies
