Foodservice Procurement Marian C. Spears, 1999 The approach of this user friendly text is to provide undergraduate students in a commercial or noncommercial foodservice curriculum with the understanding that procurement which includes purchasing receiving storage and inventory control is the first step in preparing menu items that satisfy customers With an emphasis placed on being updated and informed about products students will learn how to make decisions about which products meet the quality standards required by the customer and at the same time find the lowest price for a product Unlike any other text on the market this book advocates that purchasing is not a cost center in the operation as it was for many years but that it contributes to the profit and every dollar saved is a dollar profit *Foodservice Procurement* Spears, Mandabach, Rande, 2005-07-01 Instructor's Manual to Accompany Foodservice Procurement Karen R. presents a new model for understanding food chains which combines governance and power approaches with an emphasis on understanding the interests served and the resulting balance of public and private benefits This shows that the role of state regulation should have greater emphasis in governance and agri food analysis and that theories about supply chain functioning including the part played by major retailers and civil society should be modified by a more nuanced understanding of the role of standards and certification systems Although much of the focus is on the UK and Europe this book provides key lessons internationally for the governance of seafood and other agri food supply chains The book will be of interest to students of food policy and those working in the seafood industry or studying for connected qualifications and more widely to readers with an interest in seafood issues and problems
