orienter son travail et d'assimiler pleinement le thème abordé. Amplificateurs BF et RF François de Dieuleveult, 2018-10-01

Le souhait d'un designer électronique est de trouver rapidement dans le même espace réduit et concis les démonstrations théoriques relatives aux amplificateurs accompagnées d'une simulation qui valide la théorie et permet d'envisager une réalisation concrète. Amplificateurs BF et RF répond cet objectif et au souhait tout fait légitime du designer. Un bref rappel est consacré aux différents modèles du transistor. L'analyse des montages classiques sert de tremplin des montages plus complexes, cette analyse s'ajoute l'étude des causes de la distorsion. Le nom ne peut traiter le montage cascode particulièrement important est ensuite abordé. Une place primordiale est allouée aux étages différentiels, différentiels basiques, différentiels cascode mais aussi cascomp et crossquad dont la démonstration mathématique est extrêmement rare. L'ouvrage est complété par de nombreux exemples d'amplificateurs en BF ou en RF comme l'amplificateur en classe E.

Progress in Refrigeration Science and Technology Sam Stuart, 2014-05-12

Progress in Refrigeration Science and Technology Volume II is a collection of papers from the Eleventh International Congress of Refrigeration held in Munich in August-September 1963. These papers deal with the various scientific and technical aspects, designs and technology of refrigeration used in food as well as advances in air conditioning and heat pumps. One paper discusses the refrigeration of meat, fruit or vegetables and the reaction rate of proteolysis in low temperatures. The paper points out that meat preservation by freezing is not economical below 60 degrees centigrade, citing the reason that cathepsins are still catalytically active in lower temperatures. Other papers discuss the effects of freezing of beef, pork, turkey, chicken, sweet corn, spinach, puree. As regards fruit and vegetable storage, the air needs to be purified to inhibit infections, retard fungal or bacterial growth and dissipate ripening gases or foul odors. Another paper

examines the reasons for doing away with floor insulation in refrigeration plants used in storing fresh meat during the summer and winter months This collection is suitable for engineers in the area of refrigeration and also for food technologists involved in food research and preservation **Electrocinétique PCSI** , **Précis d'électronique** Jean-Luc Azan,2000
