**The World of William and Mary** Dale Hoak, Mordechai Feingold, 1996 This volume contributes to the current reassessment of the Glorious Revolution by bringing together the work of leading American British and Dutch scholars who present a series of interpretive case studies on a wide variety of political economic religious and cultural issues What emerges from these fifteen essays is the conviction that in spite of differing angles of approach the process of reinterpreting the Revolution requires a combined study of English and Dutch history within the context of European history The long tradition of viewing the events of 1688 89 as a uniquely British affair which gave birth to liberal England with its contingent political and religious liberties is finally put to rest **Hand-book for travellers in France [by J. Miller, 1877 *The Problem of the Earth's Shape from Newton to Clairaut* John L. Greenberg, 1995-07-28 This book investigates through the problem of the earth s shape part of the development of post Newtonian mechanics by the Parisian scientific community during the first half of the eighteenth century In the Principia Newton first raised the question of the earth s shape John Greenberg shows how continental scholars outside France influenced efforts in Paris to solve the problem and he also demonstrates that Parisian scholars including Bouguer and Fontaine did work that Alexis Claude Clairaut used in

developing his mature theory of the earth's shape The evolution of Parisian mechanics proved not to be the replacement of a Cartesian paradigm by a Newtonian one a replacement that might be expected from Thomas Kuhn's formulations about scientific revolutions but a complex process instead involving many areas of research and contributions of different kinds from the entire scientific world Greenberg both explores the myriad of technical problems that underlie the historical development of part of post Newtonian mechanics which have only been rarely analyzed by Western scholars and embeds his technical discussion in a framework that involves social and institutional history politics and biography Instead of focusing exclusively on the historiographical problem Greenberg shows as well that international scientific communication was as much a vital part of the scientific progress of individual nations during the first half of the eighteenth century as it is today
