history concluding that differences among human races are superficial transitory in nature and subject to continuous change. He asserts the oneness of human populations by examining the origin of the human species and his journey from the nuclear zone in Africa 1.5 million years ago, his ordeals through different ages: prehistoric, the ancient, the medieval, and the modern times, and his onward journey in the conquest of space. Bobbili also explores the challenges humans have faced in the past, the possible changes and problems he is apt to address in the future, and the measures he must institute to ensure his continuous survival. The New World Order emphasizes the need to invent new faiths and adopt new policies to see a near homogeneity in political, economic, religious, and social institutions for achieving the ultimate goal: establishment of a great human society.
