Food and Nutrition Information and Educational Materials Center Catalog Food and Nutrition Information and Educational Materials Center (U.S.),1973 **Consumer-Driven Innovation in Food and Personal Care Products** S R Jaeger, Hal MacFie, 2010-08-30 Experts from around the world present changes in the global marketplace and developments in research methodologies underpinning new product development NPD in this essential collection The business and marketing aspects of NPD sometimes neglected in books of this type are addressed alongside methods for product testing Trends processes and perspectives in consumer driven NPD in the food and personal care product industries are addressed in the opening chapters of the book Specific topics include evolution in food retailing and advances in concept research Hedonic testing is the focus of the next section Different viewpoints on consumer research methods and statistics for NPD are reviewed in later chapters The final part of the book looks towards the future of innovation covering the implications for NPD of topics such as human genetic variation in taste perception and neuroimaging Several chapters are not standard scientific articles Rather they are written records of conversations between two people on a particular topic related to consumer driven innovation in foods and personal care products In them the interviewees speak freely about their views and experiences in NPD providing unique insights Consumer driven innovation in food and personal care products will broaden readers understanding of the many approaches available to NPD personnel and ways in which they can be used to support innovation activities Provides expert insight into the changes in the global market place and developments in research methodologies underpinning NPD Examines the business and marketing aspects of NPD sometimes neglected in books of this type are addressed alongside methods for product testing Chapters review the different viewpoints on consumer research methods and statistics for NPD *Reducing Saturated Fats in Foods* G Talbot, 2011-04-19 The need to reduce saturated fat levels in food and the different ways of doing this are among the most important issues facing the food industry Reducing saturated fats in foods reviews the sources and effects of saturated fats in food and the ways in which the food industry can effectively reduce saturates Part one covers the functional and nutritional aspects of saturated fats in foods with chapters covering sources of dietary saturated fats their functional attributes and the health issues associated with saturated fatty acids Part two focuses on reducing saturated fats through food reformulation concentrating on both the technologies used and the food categories affected Chapters cover topics such as emulsion technology for reduction of saturated fats and the application of diacylglycerol oils as well as different food categories including milk and dairy products processed meats fried foods and pastry products With its distinguished editor and international team of contributors Reducing saturated fats in foods is an essential reference for oils and fats processors and food manufacturers as well as those researching saturated fats in the academic sector Reviews the sources and effects of saturated fats in food and the ways in which the food industry can effectively reduce saturates Explores the functional and nutritional aspects of saturated fats in foods covering sources of

dietary saturated fats and their functional attributes Focuses on reducing saturated fats through food reformulation concentrating on both the technologies used and the food categories affected **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1976 *Fibre-Rich and Wholegrain Foods* Jan A Delcour,Kaisa Poutanen,2013-03-26 Consumers are increasingly seeking foods that are rich in dietary fibre and wholegrains but are often unwilling to compromise on sensory quality Fibre rich and wholegrain food reviews key research and best industry practice in the development of fibre enriched and wholegrain products that efficiently meet customer requirements Part one introduces the key issues surrounding the analysis definition regulation and health claims associated with dietary fibre and wholegrain foods The links between wholegrain foods and health the range of fibre dietary ingredients and a comparison of their technical functionality are discussed as are consumption and consumer challenges of wholegrain foods Part two goes on to explore dietary fibre sources including wheat and non wheat cereal dietary fibre ingredients vegetable fruit and potato fibres Improving the quality of fibre rich and wholegrain foods including such cereal products as wholegrain bread muffins pasta and noodles is the focus of part three Fibre in extruded products is also investigated before part four reviews quality improvement of fibre enriched dairy products meat products seafood beverages and snack foods Companion animal nutrition as affected by dietary fibre inclusion is discussed before the book concludes with a consideration of soluble and insoluble fibre in infant nutrition With its distinguished editors and international team of expert contributors Fibre rich and wholegrain foods provides a comprehensive guide to the field for researchers working in both the food industry and academia as well as all those involved in the development production and use of fibre enriched and wholegrain foods Reviews key research and best industry practice in the development of fibre enriched and wholegrain products Considers analysis definition regulation and health claims associated with dietary fibre and wholegrain foods Explores sources of dietary fibre including wheat and non wheat cereal vegetable fruit and potato fibres **Oxidation in Foods and Beverages and Antioxidant Applications** Eric A Decker,Ryan J Elias,D. Julian McClements,2010-09-22 Oxidative rancidity is a major cause of food quality deterioration leading to the formation of undesirable off flavours as well as unhealthy compounds Antioxidants are widely employed to inhibit oxidation and with current consumer concerns about synthetic additives and natural antioxidants are of much interest The two volumes of Oxidation in foods and beverages and antioxidant applications review food quality deterioration due to oxidation and methods for its control The second volume reviews problems associated with oxidation and its management in different industry sectors Part one focuses on animal products with chapters on the oxidation and protection of red meat poultry fish and dairy products The oxidation of fish oils and foods enriched with omega 3 polyunsaturated fatty acids is also covered Part two reviews oxidation in plant based foods and beverages including edible oils fruit and vegetables beer and wine Oxidation of fried products and emulsion based foods is also discussed Final chapters examine encapsulation to inhibit lipid oxidation and antioxidant active packaging and edible films With its distinguished international team of editors and

contributors the two volumes of Oxidation in foods and beverages and antioxidant applications is standard references for R D and QA professionals in the food industry as well as academic researchers interested in food quality Reviews problems associated with oxidation and its management in different industry sectors Examines animal products with chapters on the oxidation and protection of red meat poultry and fish Discusses oxidation of fish oils and foods enriched with omega 3 and polyunsaturated fatty acids **Functional Ingredients from Algae for Foods and Nutraceuticals** Herminia

Dominguez,2013-09-30 Algae have a long history of use as foods and for the production of food ingredients There is also increasing interest in their exploitation as sources of bioactive compounds for use in functional foods and nutraceuticals Functional ingredients from algae for foods and nutraceuticals reviews key topics in these areas encompassing both macroalgae seaweeds and microalgae After a chapter introducing the concept of algae as a source of biologically active ingredients for the formulation of functional foods and nutraceuticals part one explores the structure and occurrence of the major algal components Chapters discuss the chemical structures of algal polysaccharides algal lipids fatty acids and sterols algal proteins phlorotannins and pigments and minor compounds Part two highlights biological properties of algae and algal components and includes chapters on the antioxidant properties of algal components anticancer agents derived from marine algae anti obesity and anti diabetic activities of algae and algae and cardiovascular health Chapters in part three focus on the extraction of compounds and fractions from algae and cover conventional and alternative technologies for the production of algal polysaccharides Further chapters discuss enzymatic extraction subcritical water extraction and supercritical CO2 extraction of bioactives from algae and ultrasonic and microwave assisted extraction and modification of algal components Finally chapters in part four explore applications of algae and algal components in foods functional foods and nutraceuticals including the design of healthier foods and beverages containing whole algae prebiotic properties of algae and algae supplemented products algal hydrocolloids for the production and delivery of probiotic bacteria and cosmeceuticals from algae Functional ingredients from algae for foods and nutraceuticals is a comprehensive resource for chemists chemical engineers and medical researchers with an interest in algae and those in the algaculture food and nutraceutical industries interested in the commercialisation of products made from algae Provides an overview of the major compounds in algae considering both macroalgae seaweeds and microalgae Discusses methods for the extraction of bioactives from algae Describes the use of algae and products derived from them in the food and nutraceutical industries Modifying Food Texture Jianshe Chen,Andrew Rosenthal,2015-05-23 Modifying Food Texture Volume 2 Sensory Analysis Consumer Requirements and Preferences explores texture as an important aspect of consumer food acceptance and preference specifically addressing the food textural needs of infants the elderly and dysphagia patients This volume covers the sensory analysis of texture modified foods taking an in depth look at the product development needs of consumers and exploring the sensory analysis of food texture and the development of texture modified foods Explores texture as an important aspect of

consumer food acceptance and preference Addresses the food textural needs of special groups including infants the elderly and dysphagia patients Takes an in depth look at the product development needs of consumers exploring the sensory analysis of food texture **Persistent Organic Pollutants and Toxic Metals in Foods** Martin Rose, Alwin Fernandes, 2013-05-15

Persistent organic pollutants POPs and toxic elements such as dioxins flame retardants lead and mercury are substances of major concern for the food industry the regulator and the public They persist in the environment accumulate in food chains and may adversely affect human health if ingested over certain levels or with prolonged exposure Persistent organic pollutants and toxic metals in foods explores the scientific and regulatory challenges of ensuring that our food is safe to eat Part one provides an overview of regulatory efforts to screen monitor and control persistent organic pollutants and heavy metals in foods and includes case studies detailing regulatory responses to food contamination incidents Part two moves on to highlight particular POPs toxic metals and metalloids in foods including dioxins and polychlorinated biphenyls PCBs mercury polycyclic aromatic hydrocarbons PAHs and phthalates Persistent organic pollutants and toxic metals in foods is a standard reference for those in the food industry responsible for food safety laboratories testing for food chemical safety regulatory authorities responsible for ensuring the safety of food and researchers in industry and academia interested in the science supporting food chemical safety Includes case studies which detail regulatory responses to food contamination incidents Considers the uptake and transfer of persistent organic pollutants in the food chain and the risk assessment of contaminants in food Details particular persistent organic pollutants toxic metals and metalloids in foods including polychlorinated biphenyls PCBs per and polyfluoroalkyl substances PFASs mercury and arsenic among others *Modeling Food Processing Operations* Serafim Bakalis, Kai Knoerzer, Peter J Fryer, 2015-04-28 Computational modeling is an important tool for understanding and improving food processing and manufacturing It is used for many different purposes including process design and process optimization However modeling goes beyond the process and can include applications to understand and optimize food storage and the food supply chain and to perform a life cycle analysis Modeling Food Processing Operations provides a comprehensive overview of the various applications of modeling in conventional food processing The needs of industry current practices and state of the art technologies are examined and case studies are provided Part One provides an introduction to the topic with a particular focus on modeling and simulation strategies in food processing operations Part Two reviews the modeling of various food processes involving heating and cooling These processes include thermal inactivation sterilization and pasteurization drying baking frying and chilled and frozen food processing storage and display Part Three examines the modeling of multiphase unit operations such as membrane separation extrusion processes and food digestion and reviews models used to optimize food distribution Comprehensively reviews the various applications of modeling in conventional food processing Examines the modeling of multiphase unit operations and various food processes involving heating and cooling Analyzes the models used to optimize food distribution

Handbook of Food Allergen Detection and Control Simon Flanagan, 2014-09-25 Allergens in food and their detection management and elimination constitute a key issue for food manufacturers especially in terms of safety This book reviews current and emerging technologies for detecting and reducing allergens as well as issues such as traceability regulation and consumer attitudes Following an introductory chapter by a distinguished expert part one covers allergen management throughout the food chain Part two details current and emerging methods of allergen detection in food and part three covers methods for reducing and eliminating allergens in food Finally part four focuses on the control and detection of individual food allergens and the risks each one presents in food manufacture Reviews current and emerging technologies for detecting and reducing allergens as well as issues such as traceability regulation and consumer attitudes Covers allergen management throughout the food chain and reviews current and emerging methods of allergen detection Examines methods for reducing and eliminating allergens in food and provides a detailed overview of the control and detection of individual food allergens

New Analytical Approaches for Verifying the Origin of Food Paul Brereton, 2013-07-31 Food and beverage labels often specify a product's geographical origin species variety and method of production These claims can significantly influence an item's economic value but their verification is not always straightforward New analytical approaches for verifying the origin of food reviews new analytical methods in this area together with applications to key commodities Part one introduces the concept of food origin and provides supporting information on labelling legislation and standards Part two moves on to explore new approaches for verifying the geographical origin of food using geospatial models and verifying species and varietal components of the food we eat Holistic methods of verification methods using vibrational spectroscopy and associated chemometrics are also discussed Finally part three highlights the applications of new analytical methods to verify the origin of particular food commodities fish honey and wine New analytical approaches for verifying the origin of food is a standard reference for professionals working in analytical laboratories testing food authenticity and for researchers in the food industry analytical laboratories and academia working on the development of analytical methods for food authenticity Includes a chapter on origin labelling legislation and standards Chapters address the applications of both established and novel methods in key product sectors Reviews new analytical methods and their applications in the food industry

Handbook of Antioxidants for Food Preservation Fereidoon Shahidi, 2015-02-25 Lipid oxidation in food leads to rancidity which compromises the sensory properties of food and makes it unappealing to consumers The growing trend towards natural additives and preservatives means that new antioxidants are emerging for use in foods This book provides an overview of the food antioxidants currently available and their applications in different food products Part one provides background information on a comprehensive list of the main natural and synthetic antioxidants used in food Part two looks at methodologies for using antioxidants in food focusing on the efficacy of antioxidants Part three covers the main food commodities in which antioxidants are used Reviews the various types of antioxidants used in food preservation including

chapters on tea extracts natural plant extracts and synthetic phenolics Analyses the performance of antioxidants in different food systems Compiles significant international research and advancements

Emerging Food Packaging Technologies Kit L Yam,Dong Sun Lee,2012-03-15 The successful employment of food packaging can greatly improve product safety and quality making the area a key concern to the food processing industry Emerging food packaging technologies reviews advances in packaging materials the design and implementation of smart packaging techniques and developments in response to growing concerns about packaging sustainability Part one of Emerging food packaging technologies focuses on developments in active packaging reviewing controlled release packaging active antimicrobials and nanocomposites in packaging and edible chitosan coatings Part two goes on to consider intelligent packaging and how advances in the consumer packaging interface can improve food safety and quality Developments in packaging material are analysed in part three with nanocomposites emerging coating technologies light protective and non thermal process packaging discussed alongside a consideration of the safety of plastics as food packaging materials Finally part four explores the use of eco design life cycle assessment and the utilisation of bio based polymers in the production of smarter environmentally compatible packaging With its distinguished editors and international team of expert contributors Emerging food packaging technologies is an indispensable reference work for all those responsible for the design production and use of food and beverage packaging as well as a key source for researchers in this area Reviews advances in packaging materials the design and implementation of smart packaging techniques and developments in response to growing concerns about packaging sustainability Considers intelligent packaging and how advances in the consumer packaging interface can improve food safety and quality Examines developments in packaging materials nanocomposites emerging coating technologies light protective and non thermal process packaging and the safety of plastics as food packaging materials

A Clinician's Guide to Dermatologic Differential Diagnosis, Volume 1 Paul Schneiderman,Marc Grossman,2006-06-28 *Delivering Performance in Food Supply Chains* Carlos Mena,Graham Stevens,2010-01-28 Food and drink supply chains are complex continually changing systems involving many participants They present stakeholders across the food and drinks industries with considerable challenges Delivering performance in food supply chains offers expert perspectives to help practitioners and academics to improve their supply chain operations The Editors have identified six key challenges in managing food and drinks supply chains Each section of the book focuses on one of these important issues The first chapters consider the fundamental role of relationship management in supply chains The next section discusses another significant issue aligning supply and demand Part three considers five different approaches to effective and efficient process management while quality and safety management an issue food companies need to take very seriously is subject of the next section Parts five and six review issues which are currently driving change in food supply chains the effective use of new technologies and the desire to deliver food sustainably and responsibly With expert contributions from leaders in their fields Delivering

performance in food supply chains will help practitioners and academics to understand different approaches in supply chain management explore alternative methods and develop more effective systems Considers the fundamental role of relationship management in supply chains including an overview of performance measurement in the management of food supply chains Discusses the alignment of supply and demand in food supply chains and reviews sales and operations planning and marketing strategies for competitive advantage in the food industry Provides an overview of the effective use of new technologies and those that will be used in the future to deliver food sustainably and reliably

Developing Food Products for Consumers with Specific Dietary Needs Steve Osborn, Wayne Morley, 2016-05-17 *Developing Food Products for Customers with Specific Dietary Needs* explains the process for developing foods for customers who have specific dietary needs further shining a light on the number of increasing medical conditions related to food intake that have emerged in the past few decades From increased fat and sugar intake leading to higher levels of obesity to greater levels of coeliac disease the ingredients and nutritional content of food is becoming more and more important Additionally consumers are following particular diets for many different reasons be it health related or for religious or moral reasons The first part of the book looks in detail at the organizational structure required within a company to allow for the development of food products which meet the needs of these customers while the second part presents a number of case studies highlighting the development of food products for various dietary requirements Precise coverage includes section on the development of low sodium low sugar low fat and low carbohydrate products with the aim of producing healthier foods as well as the development of organic and vegetarian products for consumers who are following diets for personal reasons The potential solutions for developing foods for customers who have specific dietary needs are likely to include both ingredients and technology developments The ingredients area includes simple reductions as well as replacement strategies whilst technology will be applied to both the ingredient itself and the host food product All are aimed at maintaining the product quality as perceived by the customer Provides an overview of the organizational structure required within a company to develop foods for specific customer needs Includes section on the development of low sodium low sugar low fat and low carbohydrate products with the aim of producing healthier foods Presents case studies that deliver a best practice view on developing foods for customers with specific dietary needs Written by industry professionals this book offers in depth coverage of this topic of ever increasing importance to the food industry

High Throughput Screening for Food Safety Assessment Arun K. Bhunia, Moon S. Kim, Chris R. Taitt, 2014-09-06 Recent advances in array based detectors and imaging technologies have provided high throughput systems that can operate within a substantially reduced timeframe and other techniques that can detect multiple contaminants at one time These technologies are revolutionary in terms of food safety assessment in manufacturing and will also have a significant impact on areas such as public health and food defence This book summarizes the latest research and applications of sensor technologies for online and high throughput screening of food The book first introduces high

throughput screening strategies and technology platforms and discusses key issues in sample collection and preparation The subsequent chapters are then grouped into four sections Part I reviews biorecognition techniques Part II covers the use of optical biosensors and hyperspectral imaging in food safety assessment Part III focuses on electrochemical and mass based transducers and finally Part IV deals with the application of these safety assessment technologies in specific food products including meat and poultry seafood fruits and vegetables Summarises the latest research on sensor technologies for online and high throughput screening of food Covers high throughput screening and the current and forecast state of rapid contaminant detection technologies Looks at the use of optical and electrochemical biosensors and hyperspectral imaging in food safety assessment and the application of these technologies in specific food products **Food for the Aging**

Population Monique Raats,Lisette De Groot,2016-11-28 Food for the Aging Population Second Edition is a unique volume that reviews the characteristics of the aging population as food consumers the role of nutrition in healthy aging and the design of food products and services for the elderly The first section of the book discusses the older population as consumers of food and beverages while the second section covers the extension of functionality into later life The final section highlights tactics on how to develop food products and services for older people Fully updated and revised from the first edition the book covers advances in various fields introducing a number of new chapters including amongst others topics on the economic determinants of diet in older adults public policy and older people s diets and interventions to support healthy eating in later life Covers the topic of food for an aging population more broadly than any other book on the market Presents a thoroughly revised and updated edition of a very popular and well regarded book Contains new chapters on the implementation of food related interventions among the elderly population and their relationship to policymakers

Freeze-Drying of Pharmaceutical and Food Products Tse-Chao Hua,Bao-Lin Liu,Haimei Zhang,2010-07-30 Freeze drying is an important preservation technique for heat sensitive pharmaceuticals and foods Products are first frozen then dried in a vacuum at low temperature by sublimation and desorption rather than by the application of heat The resulting items can be stored at room temperature for long periods This informative text addresses both principles and practice in this area The first chapter introduces freeze drying The authors then review the fundamentals of the technique heat mass transfer analyses modelling of the drying process and the equipment employed Further chapters focus on freeze drying of food freeze drying of pharmaceuticals and the protective agents and additives applied The final chapter covers the important subjects of disinfection sterilization and process validation Freeze drying of pharmaceutical and food products is an essential reference for food pharmaceutical and refrigeration engineers and scientists with an interest in preservation techniques It will also be of use to students in these fields Addresses the principles and practices used in this important preservation technique Explains the fundamentals of heat mass transfer analysis modelling and the equipment used Discusses the importance of disinfection sterilization and process validation
