Abstract

Purpose – Prior studies have found evidence for the role of political instability on foreign divestment (FD) where a high level of instability encourages FD decisions. Therefore, this paper aims to examine how the food security level explains the linkage between political instability and FD.

Design/methodology/approach – The current study adopts the system generalised method of moment (GMM) to achieve accurate and reliable empirical evidence for 60 developing countries in the period 2011 to 2020.

Findings – The results demonstrated a negative and significant relationship between political instability and FD on food security. This suggests that political instability's impact on divestment tends to be lower in countries with better levels of food security. Other controlled variables, such as economic growth, human capital and trade openness, also have a negative effect on FD, discouraging FD.

Practical implications – As a result, policymakers could take steps to ensure that food security levels reach acceptable levels, as food security has been linked to a country's political stability.

Originality/value – To the authors' limited knowledge, no studies have looked at the relationship between political instability and food security in determining a country's FD. Our study aims to analyse this issue because the current global crisis, which is being caused by high food prices, will push millions of more people into severe poverty and exacerbate hunger and malnutrition.

1. Motivation

As political instability is relatively high and expected to rise globally, the effect of political stability on foreign divestment (FD) has been one of the most highly debated areas of research. Verisk Maplecroft, a risk consultant, has stated that the pandemic's fallout causes many countries to become more unstable, predicting that developed and developing countries will encounter more political instability by 2023 (Matthew Moshiri, 2022). A few studies have been conducted on the relationship between political stability and FD, where political stability encompasses corruption, institutional strength and the rule of law (Nishimura and Liu, 2016; Hasan *et al.*, 2017; Nguyen, 2019; Kamnouch *et al.*, 2020; Loukil *et al.*, 2021; Nguyen *et al.*, 2022). It, therefore, investors are more cautious when choosing foreign direct investment (FDI) destinations. For instances, poor institutions, the rule of law and a lack of accountability,

Peter Timmer,Food and Agriculture Organization of the United Nations,1997-01-01 This publication reviews the recent literature on food systems and economic development and underlines their limitations Simultaneously it analyzes the Asian approach to food security and concludes that the lesson from East and Southeast Asia for achieving and maintaining food security can be summed up as a growth process stimulated by a dynamic rural economy leads to rapid poverty alleviation which in the context of public action to stabilize food prices ensures food security Publisher s description *Storage, Trade, and Price Policy Under Production Instability* Thomas C. Food Security and Scarcity C. Peter Timmer,2015 In countries that have managed to confront and cope with the challenges of food insecurity over the past two centuries markets have done the heavy lifting Markets serve as the arena for allocating society s scarce resources to meet the virtually unlimited needs and desires of consumers no other mechanism can efficiently signal fluctuations in scarcity and abundance the cost of labor or the value of commodities But markets fail at tasks that society regards as important thus governments have had to intervene to stabilize the economic environment and provide essential public goods such as transportation and communications networks agricultural research and development and access to quality health and educational facilities Ending hunger requires that each society find the right balance of market forces and government interventions to drive a process of economic growth that reaches the poor and ensures that food supplies are readily and reliably available and accessible to even the poorest households But locating that balance has been a major challenge for many countries and seems to be getting more difficult as the global economy becomes more integrated and less stable Food Security and Scarcity explains what forms those challenges take in the long run and short term and at global national and household levels C Peter Timmer best known for his work on the definitive text Food Policy Analysis draws on decades of food security research and analysis to produce the most comprehensive and up to date assessment of what makes a productive sustainable and stable food system and why so many countries have fallen short Poverty and hunger are different in every country so the manner of coping with the challenges of ending hunger and keeping it at bay will depend on equally country specific analysis governance and solutions Timmer shows that for all their problems and failures markets and food prices are ultimately central to solving the problem of hunger and that any coherent strategy to improve food security will depend on an in depth understanding of how food markets operate Published in association with the Center for Global Development **Production Instability and Food Security in Kenya** Thomas C. Development Eden S.H. Yu, 2017-11-30 In approximately two decades China has transformed from a stagnant socialist economy to one that is vibrant and largely market oriented. Given China's size, rapid economic growth and her increasing importance as an economic and political power, the country's growth and development have aroused major interest among academics and policymakers worldwide. Written by a distinguished group of economists, this volume offers insight and in-depth analysis of a wide range of issues related to China's growth and development: from the role of higher education in the country's economic growth to socioeconomic issues such as stock market manipulation and rural-urban migration. The contributors are established scholars in the field and their research methodologies are at the frontier of modern analytical economics, including economic dynamics and computable general equilibrium analysis. The volume will be of interest to students and researchers in the areas of Chinese economic studies, finance and international economics, international business and transitional economy.
