Lockley,Spencer G.

Lucas,2014-11-01 [Encyclopedia of Criminological Theory](#) Francis T. Cullen,Pamela Wilcox,2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and

move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics: the who, what, where, how, and why. And reference librarians often find it difficult to guide these students to a quick one-stop source. In response, SAGE Reference is publishing the two-volume *Encyclopedia of Criminological Theory*, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And like an unabridged dictionary, it provides concise-to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include contexts and concepts in criminological theory, the social construction of crime, policy implications of theory, diversity and intercultural contexts, conflict theory, rational choice theories, conservative criminology, feminist theory.

**Revisiting National Security**  
Prabhakaran Paleri, 2022-05-10. This book examines the evolving concept of national security and how human systems could be governed in an ever-turbulent and dynamic world. It takes a revised look at the concept of national security previously researched and identified by the author based on the present context but with a futuristic appreciation of governance, primarily national but extended to global perspectives in the modern and dynamically shifting world. The book emphasises the need for governments to maximise national security for the well-being of their people. The concept of national security is taken as the key subject of national governance, which is extendable to global governance, wherein national security is not only the physical or military security alone but also the overall well-being of the people of a nation. This book explores how national security can be achieved by balancing its various elements in different terrains where the game of governance is played in national as well as global perspective. It also presents additional findings and observations to show that the approach is transformative, redefining the key knowledge paradigms. This book is relevant for policy makers, students, researchers, and academics who wish to explore and rethink their approach towards governing the human systems whose well-being is the responsibility of governments.

*Registers of Loss*  
Rinos Mwanaka, 2022-03-11. My work takes the nature of interactive, collaborative, and multidisciplinary. I work across several art fields including, among others, literary fictions, novels, essays, poetry, play, short stories, songs, musical composition, singing, reciting, mbira, marimba, keyboards, a little guitar, and visual drawings, paintings, photography, collages, mixed media, installation, etc. I am interested in connection, convergence, community, and cooperation following disparate, sometimes disfigured experiences, seeing how they can come together or shy away from each other to create new wholes. The baobab trees are ancient trees, some might be thousands of years old. Imagine the people who have stayed in these dwellings, who have ate the fruits of these trees, who have used its leaves as relish, we

create mashed okra relish with baobab leaves the ailments treated by its bark every part of this succulent tree is useful In this photo journey I learned a lot more about these beautiful souls they have a tendency to create musical lines mostly linear it s like one tone starting it fading and letting the next tone to take over and this will fade and let another tone to take over such that you can see the lines how they conjoin to create music beyond human understanding And most of the Baobabs I realized inhabit the same place in numbers and usually they are on high grounds like Gods who love elevated dwellings and they look down upon other small humans small trees humans etc but there are also some singular baobabs that inhabit lower grounds and most of these are solitary and from my memory growing up here these don t bear fruits And whilst I was photographing the Baobabs several story strands in my head converged around one far much more important issue the issue of Climate Change and Global Warming In Registers of Loss I encourage working together as human beings to arrest Global warming and climate change the way the baobabs work together to communicate in linear notes or in community thoughts
