introduction to international judges and their work     Hiding in Plain Sight Eric Stover, Victor Peskin, Alexa Koenig, 2016

Hiding in Plain Sight tells the story of the global effort to apprehend the world's most wanted fugitives. Beginning with the flight of tens of thousands of Nazi war criminals and their collaborators after World War II, then moving on to the question of justice following the recent Balkan wars and the Rwandan genocide and ending with the establishment of the International Criminal Court and America's pursuit of suspected terrorists in the aftermath of 9/11, the book explores the range of diplomatic and military strategies both successful and unsuccessful that states and international courts have adopted to pursue and capture war crimes suspects. It is a story fraught with broken promises, backroom politics, ethical dilemmas, and daring escapades, all in the name of international justice and human rights. Hiding in Plain Sight is a companion book to the public television documentary Dead Reckoning: Postwar Justice from World War II to The War on Terror. Law Books Published, 2000     *The Ethics of Military Privatization* David M. Barnes, 2016-08-25. This book explores the ethical implications of using armed contractors, taking a consequentialist approach to this multidisciplinary debate. While privatization is not a new concept for the US military, the public debate on military privatization is limited to legal, financial, and pragmatic concerns. A critical assessment of the ethical dimensions of military privatization in general is missing. More specifically, in light of the increased reliance upon armed contractors, it must be asked whether it is morally permissible for governments to employ them at all. To this end, this book explores four areas that highlight the ethical implications of using armed contractors: how armed contractors are distinct from soldiers and mercenaries; the commodification of force; the belligerent equality of combatants; and the impact of armed contractors on the professional military. While some take an absolutist position, wanting to bar the use of private military altogether, this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option. Recognising that outsourcing force will continue, this book thus proposes some changes to account for the problems of commodification, belligerent equality, and the challenge to the military profession. This book will be of interest to students of private security, military studies, ethics, security studies, and IR in general.
