In Fairness to Future Generations Edith Brown Weiss, 2025-01-27 Professor Weiss combines thorough research and careful analysis with imaginative solutions and a moral fervor. She shows how rules of international law can be applied in an intertemporal dimension and how the basic principles of the intergenerational equity can be developed to provide new standards for human behavior. She manages to communicate to the reader not only that the situation is getting desperate but also that human intelligence can in time devise adequate remedies without destroying completely our way of life. Louis B. Sohn, Woodruff Professor of International Law. Published under the Transnational Publishers imprint.

Institutions For Future Generations Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice. It should also press us to provide institutional design proposals to change the decision making world that surrounds us. This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages. It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences. It provides citizens, activists, firms, charities, public authorities, policy analysts, students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today's excessive short termism.

A Philosophy for Future Generations Tiziana Andina, 2022-01-13 If societies like institutions are built to endure then the bond that exists between generations must be considered. Constructing a framework to establish a philosophy of future generations. Tiziana Andina explores the factors that make it possible for a society to reproduce over time. Andina's study of the diachronic structure of societies considers the never ending passage of generations as each new generation comes to form a part of the new social fabric and political model. Her model draws on the anthropologies offered by classical political philosophies such as Hobbes and Machiavelli and the philosophies of power as discussed by Nietzsche. She confronts the ethics and function of this fundamental relationship, examines the role of transgenerationality in the formation and endurance of Western democracies and recognizes an often overlooked problem: each new generation must form part of social and political arrangements designed for them by the generations that came before.

Efficiency, Sustainability, and Justice to Future Generations Klaus Mathis, 2011-08-13 Fifty years after the famous essay *The Problem of Social Cost* 1960 by the Nobel laureate Ronald Coase, Law and Economics seems to have become the lingua franca of American jurisprudence and although its influence on European jurisprudence is only moderate by comparison it has also gained popularity in Europe. A highly influential publication of a different nature was the Brundtland Report 1987 which extended the concept of sustainability from forestry to the whole of the economy and society. According to this report development is sustainable when it meets the needs of the

present without compromising the ability of future generations to meet their own needs A key requirement of sustainable development is justice to future generations It is still a matter of fact that the law as well as the theories of justice are generally restricted to the resolution of conflicts between contemporaries and between people living in the same country This in turn raises a number of questions what is the philosophical justification for intergenerational justice What bearing does sustainability have on the efficiency principle How do we put a policy of sustainability into practice and what is the role of the law in doing so The present volume is devoted to these questions In Part One Law and Economics the role of economic analysis and efficiency in law is examined more closely Part Two Law and Sustainability engages with the themes of sustainable development and justice to future generations Finally Part Three Law Economics and Sustainability addresses the interrelationships between the different aspects

Safeguarding Social Security for Future Generations W. Andrew Achenbaum, 2023-02-24 This book offers a unique multigenerational approach to saving Social Security Public programs have adapted to societal aging but fears overwhelm hopes for Social Security s future prospects Conservatives want to privatize operations that liberals seek to expand Younger workers are happy that Social Security protects their elders but most do not expect benefits when needed Achenbaum reframes conflicting perspectives and offers new models of respectful transgenerational dialogue that can mobilize pragmatic

Intergenerational Justice in Sustainable Development Treaty Implementation Marie-Claire Cordonier Segger, Marcel Szabó, Alexandra R. Harrington, 2021-07-15

This volume analyses key theoretical institutional and legal aspects of intergenerational equity and justice in multi level sustainable development treaty implementation *Children's Rights and Sustainable Development* Claire

Fenton-Glynn, 2019-04-18 Considers how to implement children s rights in the twenty first century through a child rights based approach to sustainable development *Ethics and Future Generations* Rahul Kumar, 2018-10-18 Existing human

beings stand in a unique relationship of asymmetrical influence over future generations Our choices now can settle whether there are any human beings in the further future how many will exist what capacities and abilities they might have and what the character of the natural world they inhabit is like This volume with contributions from both new voices and prominent established figures in moral and political philosophy examines three generally underexplored themes concerning morality and our relationship to future generations First would it be morally wrong to allow humanity to go extinct Or do we have moral reasons to try and ensure that humanity continues into the indefinite future Second if humanity is to continue into the future how many people should there be And is it morally important whether they have lives that are of high quality or are just barely worth living And third how can we best make sense of the intuitive idea that by not taking action on climate change and preserving natural resources we are in some way wronging future generations This book was originally published as a special issue of the Canadian Journal of Philosophy *Sustainable Development Research Advances* Barton A.

Larson, 2007 Sustainable development has been defined as balancing the fulfilment of human needs with the protection of the Natural environment so that these needs can be met not only in the present but in the indefinite future The term was used by the Brundtland Commission which coined what has become the most often quoted definition of sustainable development as development that meets the needs of the present without compromising the ability of future generations to meet their own need The field of sustainable development can be conceptually broken into four constituent parts environmental

sustainability economic sustainability social sustainability and political sustainability This new book presents the latest research in the field **A Companion to Applied Ethics** R. G.
