George Hudson The Rise And Fall Of The Railway King:

George Hudson Brian J. Bailey, 1995 *Railway king* Todd Houghton, George Hudson Tony Arnold, Sean McCartney, 2004 The Robert Maxwell of the nineteenth century Victorian England's greatest capitalist Brought down by a shareholder's question The building of the railways in Britain in the nineteenth century was the greatest ever industrial undertaking in the world to that time Financed by private enterprise rather than the state the schemes to build new lines were characterised both by their ambition and by their need for huge amounts of capital The most ambitious of all of the individual entrepreneurs and for long the most successful was George Hudson the Railway King whose establishment of York as the hub of an ever growing network of lines brought him huge wealth and great fame Already a wealthy businessman and Lord Mayor of York before the advent of the railways Hudson seized the opportunity they presented with both hands He became an MP lived in style and entertained lavishly While his early lines were profitable later ones were not Ever more deeply committed at a time when accounting standards were lax he hid inconvenient figures until brought down by a question at a shareholders meeting in 1849 Disgraced he fled to the Continent his name synonymous with fraudulent capitalism at its most brazen This new biography is the fullest examination to date of an extraordinary and complex man and his career *The World's First Railway System* Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography *Don't Fall For It* Ben Carlson, 2020-01-02 Learn financial and business lessons from some of the biggest frauds in history Why does financial fraud persist History is full of sensational financial frauds and scams Enron was forced to declare bankruptcy after allegations of massive accounting fraud

Melodramatic Tactics Elaine Hadley, 1995 This pathbreaking work analyzes melodrama as not merely a theatrical genre but as a behavioral paradigm of the nineteenth century manifest in the theater, in literature, and in society. The Race to the North David Wragg, 2013-01-21 In the late nineteenth century, some of Britain's leading main-line railway companies threw caution to the winds in an attempt to provide the fastest passenger express services between London and Scotland. These became known as the races to the north. There were two phases in 1888 and 1895, and they spurred the building of new bridges across the Firth of Forth and Firth of Tay. David Wragg's gripping, detailed narrative tells the story of this epic engineering and commercial competition. He concentrates on the determination of the railway companies to see who could provide the fastest schedule between London and the main Scottish cities of Edinburgh, Glasgow, Perth, Dundee, and Aberdeen. Casting aside their early policy of co-existence on these prestigious and lucrative routes, the West Coast and East Coast companies were drawn into a period of intense, highly publicized rivalry as they sought to dominate the market. David Wragg gives an insight into the conduct of the well-publicized highs and tragic lows of this dramatic story: the extension of the lines to the far north, the building of the Tay and Forth bridges, including the collapse of the first Tay bridge with 72 fatalities, and the repeated bids by the companies to cut the journey times. While he describes the public side of this fascinating story, David Wragg fills in the background, which is no less interesting: the pioneering engineering of the steam age, the massive construction projects, the cut-throat battle for passengers and freight, and the deep inter-company rivalries that drove the rapid development of the railways during the Victorian period.
