**Scientific and Technical Aerospace Reports** ,1995-08      **Energy Research Abstracts** ,1993      **Playback and Studies of Animal Communication** Peter K. McGregor,2013-11-11 Playback is the technique of rebroadcasting natural or synthetic signals to animals and observing their response The ability to present a putative signal in isolation without the potential confounding effects of other activities of the signaller is the main reason for the depth and range of our knowledge of communication systems To date playback of sound signals has predominated but playback of electric signals and even video playback of visual signals suggests that playback will become just as prevalent in studies of communication in other sensory modalities This book is one of the outcomes of a workshop on playback held at Thombridge Hall in the Peak District National Park England during August 1991 There were two reasons for organising the workshop First the considerable and lively debate in the literature about the design and analysis of playback experiments the pseudoreplication debate was in danger of generating more heat than light A workshop forum seemed the obvious place to clarify and if possible resolve the debate Second with the number of new playback and analysis techniques increasing rapidly it seemed an opportune moment to discuss these techniques and to review some rapidly developing areas of interest in sound communication      **Large Igneous Provinces** John J. Mahoney,Millard F. Coffin,1997-01-23 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 100 Continental flood basalts volcanic passive margins and oceanic plateaus represent the largest known volcanic episodes on our planet yet they are not easily explained by plate tectonics Indeed some are likely to record periods when the outward transfer of material and energy from the Earth s interior operated in a significantly different mode than at present In recent years interest in large scale mafic magmatism has surged as high precision geochronological detailed geochemical and increasingly sophisticated geophysical data have become available for many provinces However the sheer amount of recent material often in the form of detailed collaborative research projects can overwhelm newcomers to the field and experts alike as the literature continues to grow dramatically The need for an up to date review volume on a sizable subset of the major continental and oceanic flood basalt provinces termed large igneous provinces was recognized by the Commission on Large Volume Basaltic Provinces International Association of Volcanology and Chemistry of the Earth s Interior and the co editors were charged with organizing and implementing such a volume We hope that this volume will be valuable to researchers and graduate students worldwide particularly to petrologists geochemists geochronologists geodynamicists and plate tectonics specialists it may also interest planetologists oceanographers and atmospheric scientists      **Paleoclimate, Global Change and the Future** Keith D. Alverson,Raymond S. Bradley,2003 This book provides a synthesis of the past decade of research into global changes that occurred in the earth system in the past Focus is achieved by concentrating on those changes in the Earth s past environment that best inform our evaluation of current and future global changes and their consequences for human populations The book stands as a ten year

milestone in the operation of the Past Global Changes PAGES Project of the International Geosphere Biosphere Programme IGBP It seeks to provide a quantitative understanding of the Earth's environment in the geologically recent past and to define the envelope of natural environmental variability against which anthropogenic impacts on the Earth System may be assessed A set of color overhead transparencies based on the figures in the book is available free on the PAGES website [www.pages.igbp.org](http://www.pages.igbp.org) for use in teaching and lecturing

*Bibliography of Global Change*, 1993 Crew Resource Management Eduardo Salas, Eleana Edens, Katherine A. Wilson, 2017-05-15 Crew Resource Management CRM training was first introduced in the late 1970s as a means to combating an increased number of accidents in which poor teamwork in the cockpit was a significant contributing factor Since then CRM training has expanded beyond the cockpit for example to cabin crews maintenance crews health care teams nuclear power teams and offshore oil teams Not only has CRM expanded across communities it has also drawn from a host of theories from multiple disciplines and evolved through a number of generations Furthermore a host of methodologies and tools have been developed that have allowed the community to better study and measure its effect on team performance and ultimately safety Lacking however is a forum in which researchers and practitioners alike can turn to in order to understand where CRM has come from and where it is going This volume part of the Critical Essays on Human Factors in Aviation series proposes to do just that by providing a selection of readings which depicts the past present and future of CRM research and training Scientific Directory and Annual Bibliography National Institutes of Health (U.S.), 1991 Each issue lists papers published during the preceding year **Mantle Plumes** Richard E. Buchan, 2001-01-01 **Natural Climate Variability on Decade-to-Century Time Scales** National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Climate Research Committee, 1996-08-30 This volume reflects the current state of scientific knowledge about natural climate variability on decade to century time scales It covers a wide range of relevant subjects including the characteristics of the atmosphere and ocean environments as well as the methods used to describe and analyze them such as proxy data and numerical models They clearly demonstrate the range persistence and magnitude of climate variability as represented by many different indicators Not only do natural climate variations have important socioeconomic effects but they must be better understood before possible anthropogenic effects from greenhouse gas emissions for instance can be evaluated A topical essay introduces each of the disciplines represented providing the nonscientist with a perspective on the field and linking the papers to the larger issues in climate research In its conclusions section the book evaluates progress in the different areas and makes recommendations for the direction and conduct of future climate research This book while consisting of technical papers is also accessible to the interested layperson **Library Literature** H.W.
