Geriatric Palliative Care Rolfe Sean Morrison, Diane E. Meier, Carol Capello, 2003 Geriatric Palliative Care covers a broad spectrum of issues characterizing care near the end of life for older adults Beginning with the social and cultural context of old age and frailty this volume details specific aspects of palliative care relevant to particular disorders e g cancer strokes dementia etc as well as individual symptoms e g pain fatigue anxiety etc Communication between care givers and patients in a variety of settings is also discussed The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on quality of life support for functional independence and the centrality of the patient s values and experiences in determining the goals of medical care Indeed Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults

Geriatrics for Specialists Andrew G. Lee, Jane F. Potter, G. Michael Harper, 2021-08-31 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties The aging population is a unique demographic with its own health challenges Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics even as the demand for geriatric expertise increases The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those conditions for physicians across specialties Divided into three sections that assemble crosscutting issues medical specialties and surgical and related specialties this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further This second edition of *Geriatrics for Specialists* expands the number of specialist chapters to reflect growth in

research in aging and clinical care for older people in dermatology plastic surgery and behavioral neurology All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field

Geriatric Palliative Care Suzanne Goldhirsch,2014 Geriatric Palliative Care is a practical guide for diagnosing and managing end of life illnesses and communicating this information to patients relatives and clinical team members Oxford Textbook of Palliative Medicine Geoffrey W. C. Hanks,2011-07-21 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care

GERIATRIC MEDICINE INTERNATIONAL(TEXTBOOK OF) □□□,2011-03-10 **Advanced Age Geriatric Care** Nages Nagaratnam,Kujan Nagaratnam,Gary Cheuk,2018-11-26 As the Baby Boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging This is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 Unlike any other time in history this demographic is the fastest growing segment of most developed countries In the United States the oldest old is projected to double from 4 3 million to 9 6 million by 2030 The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care With this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia Older persons are healthier today than their counterparts decades ago More importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old Furthermore among the oldest old physiologically they are more diverse than other segments of the population Their demographic characteristics are unparalleled and different compared to that of the younger old Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old As a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic This book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists It is divided into 3 sections General Considerations Chronic diseases and Geriatric Syndromes Each chapter provides a summary of important and essential information under the heading of Key Points Case studies are included in some of the chapters to highlight the principles of management *Journal of the National Cancer Institute* ,1990 Geriatric Practice Audrey Chun,2019-10-29 This book serves as a comprehensive reference for the basic principles of caring for older adults directly

corresponding to the key competencies for medical student and residents These competencies are covered in 10 sections each with chapters that target the skills and knowledge necessary for achieving competency Each of the 45 chapters follow a consistent format for ease of use beginning with an introduction to the associated competency and concluding with the most salient points for mastery Chapters also includes brief cases to provide context to the clinical reasoning behind the competency strengthening the core understanding necessary to physicians of the future Written by expert educators and clinicians in geriatric medicine Geriatric Practice is key resource for students in geriatric medicine family and internal medicine specialties hospice and nursing home training and all clinicians studying to work with aging patients

Palliative Care Nursing Marianne Matzo, Marianne L. Matzo, Deborah Witt Sherman, 2018-06-28 This 5th edition is an important achievement it is a symbol of commitment to the field of palliative nursing where we have been and where we are going Betty Rolling Ferrell PhD MA FAAN FPCN CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago Based on the need to humanize rather than medicalize the

illness experience for patients this text delves into palliative care beyond the specific diseases affecting the patient Instead content focuses on the whole person and family Palliative patients struggle with chronic debilitating and painful conditions and grapple with the fact that life as they knew it has already passed away Families and friends reciprocally suffer not knowing how to help and therefore become the secondary victims of the disease This is not the challenge of a lone nurse or a single physician therapist or social worker Rather palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience continue to find meaning and purpose in life and cure what can be cured Palliative Care Nursing Fifth Edition delivers advanced empirical aesthetic ethical and personal knowledge This new edition brings an increased focus on outcomes benchmarking progress and goals of care It expounds upon the importance of the cross disciplinary collaboration introduced in the previous edition Every chapter in Sections I II and III includes content written by a non nursing member of the interprofessional team Based on best evidence and clinical practice guidelines this text presents comprehensive targeted interventions responsive to the needs of palliative and hospice patients and family Each chapter contains compassionate timely appropriate and cost effective care for diverse populations across the illness trajectory Key Features The expanded new edition offers current comprehensive one stop source of highly relevant clinical information on palliative care Life span approach age appropriate nursing considerations e g geriatric pediatric and family Includes disease specific and symptom specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition An expanded chapter on Palliative Care incorporates most up to date scope and standards information on Basic and Advanced HPNA certification self reflection and self care for nurses A chapter on Interprofessional Collaboration Instructor Resources Power points and Test bank
