## Geriatrics In Ayurveda:

Geriatrics in Ayurveda S. Suresh Babu,M. Madhavi,2001      Geriatric Care in Ayurveda - Preventive Aspect Dr. Rakesh Shukla,2018-04-02 Ageing is a process of physical psychological and social change in multi dimensional aspects Elderly was once defined as being age 65 or above but the growing number of active and healthy older people has caused that definition to expand to young old 65 to 75 old old 75 to 85 and oldest old 85 and beyond The over 85 age group is the one that is growing most rapidly The term Geriatrics is made by union of two Greek words first geras old age iatrike medical treatment thus the study of all aspects of aging including physiological pathological psychological economical and sociological problems is termed as geriatrics their synonym is gerontology While term aging means growing old or maturing and these are the progressive changes in human body and mind related to passage of time There is no any precise method for determining the rate or degree of aging Aging is an inevitable physiological process why senile changes occur in the body mind system is not yet clear      *Topics in Biomedical Gerontology* Pramod C. Rath,Ramesh Sharma,S. Prasad,2016-10-20 This book presents a collection of articles on various aspects of current research on aging These include model systems cellular biochemical and molecular aspects of experimental aging research as well as selected intervention studies on age related diseases Aging is a global challenge to human society Children are always in a hurry to become adults while adults produce offspring and add to the gene pool However after adulthood or the attainment of reproductive maturity all physiological parameters of the living organism start to undergo the aging process Old age sets in slowly but surely and usually continues for a prolonged period If vigor and vitality are the main advantages of adulthood old age offers the rewards of experience and maturity Biologists ask questions such as Why do we age How do we become old Is it possible to slow down postpone or even prevent aging In turn medical experts ask What are the diseases associated with old age Are there medicines that can help affected elderly patients In fact both groups are asking themselves how can we add more health to old age Healthy aging is the dream of every individual But to achieve this it is fundamental that we first understand the cellular biochemical and molecular basis of the aging process in mammalian cells tissues and intact living organisms which can serve as experimental model systems in Biomedical Gerontology Once the biology of aging is understood at the genetic and molecular levels interventional approaches to aging and its associated diseases may be easier to plan and implement at the preclinical level      **Proceeding of International Jara-Shariram 2021** Parul Institute of Ayurved, Parul University, Vadodara, Gujarat ,2021-11-18
