## **German Question And Europe A History:**

The German Question and Europe Peter Alter, Professor of Modern History Peter Alter, 2000 This is a study of the German question between 1800 and 1990 It covers matters that have European and even world significance as well as domestic issues for Germany

**The Burden of German History 1919-45** Michael Laffan, 2020-01-08 Originally published in 1988 The Burden of German History 1919 45 examines the vast literature surrounding Weimar years and the National Socialist tragedy daunting even for the specialist historian or political scientist The essays included in this volume provide an invaluable guide to research of the time and provides a stimulating review of a wide range of topics in modern German cultural political economic and military history The essays are based on a series of lectures given by German and Irish scholars to a conference on the theme Weimar Germany and National Socialism which was held in March 1986 in University College Dublin under the auspices of the Goethe Institute Dublin This book offers a significant commentary on a period of German history which included the exciting and ambivalent freedom of the Weimar society and the repressive murderous uniformity of National Socialism

**Europe's Long Century** Spencer Di Scala, 2013 The twentieth century has been interpreted as a short century marked by extremes According to this view the century lasted only from 1914 to 1989 or 1991 These dates coincide with the rise and fall of communism that came to power in Russia in 1917 and ended with the fall of the Berlin wall 1989 or that of the Soviet Union 1991 Thus the concept of a short century is unduly influenced by a Cold War perspective In Europe's Long Century Spencer Di Scala presents an alternative view that will be more helpful to undergraduate history students in the twenty first century namely that twentieth century Europe was actually a long century lasting approximately from 1900 to 2000 with patterns and antecedents discernible before the century began and that continue to be elaborated today Comprehensive current and affordable Europe's Long Century integrates the histories of Eastern Europe Scandinavia and the Balkans that are often neglected in similar treatments It also thoroughly covers the role of science in shaping modern European life and the book's biographical sketches profile the lives of important though not always well known people who influenced Europe's long century

A History of Franco-German Relations in Europe C. Germond, H. Türk, 2008-11-10 This book surveys Franco German relations from the French Revolution to the 1990s collecting the most current research from area specialists

A Companion to Nineteenth-Century Europe, 1789 - 1914 Stefan Berger, 2008-04-15 This Companion provides an overview of European history during the long nineteenth century from 1789 to 1914 Consists of 32 chapters written by leading international scholars Balances coverage of political diplomatic and international history with discussion of economic social and cultural concerns Covers both Eastern and Western European states including Britain Pays considerable attention to smaller countries as well as to the great powers Compares particular phenomena and developments across Europe

*New Perspectives on the End of the Cold War* Bernhard Blumenau, Jussi M. Hanhimäki, Barbara Zanchetta, 2018-02-02 This collection of essays makes a significant contribution to the historiography of

the end of the Cold War Research on the causes and consequences of the end of the Cold War is constantly growing Initially it was dominated by fairly simplistic and often politically motivated debates revolving around the role played by major winners and losers This volume addresses a number of diverse issues and seeks to challenge several common wisdoms about the end of the Cold War Together the contributions provide insights on the role of personalities as well as the impact of transnational movements and forces on the unexpected political transformations of the late 1980s and early 1990s Geographically the chapters largely focus on the United States Europe with special emphasis on Germany and the Soviet Union The individual chapters are drawn together by the overarching theme relating to a particular common wisdom were the transformations that occurred truly unexpected This collection of essays will make an important contribution to the growing literature on the developments that produced the collapse of the Iron Curtain the demise of the Soviet Union and the end of the Cold War This volume will be of much interest to students of Cold War Studies International History European Politics and International Relations in general

**The German Question** Dirk Verheyen, 2018-05-04 The German Question long a subject of debate is considered here at the close of a turbulent century after Germany's defeat in two world wars the Weimar failure and Nazi disaster Cold War division and the nation's unexpected recent reunification This book systematically explores the issue in terms of its four central dimensions Germany's identity national unity power and role in world politics Ambitious in conception and meticulous in execution Dirk Verheyen's wide ranging analysis incorporates historical and geopolitical considerations in an intellectually rigorous yet accessible discussion

**Europe in Crisis** Mark Hewitson, Matthew D'Auria, 2012-10-01 The period between 1917 and 1957 starting with the birth of the USSR and the American intervention in the First World War and ending with the Treaty of Rome is of the utmost importance for contextualizing and understanding the intellectual origins of the European Community During this time of crisis many contemporaries especially intellectuals felt they faced a momentous decision which could bring about a radically different future The understanding of what Europe was and what it should be was questioned in a profound way forcing Europeans to react The idea of a specifically European unity finally became at least for some a feasible project not only to avoid another war but to avoid the destruction of the idea of European unity This volume reassesses the relationship between ideas of Europe and the European project and reconsiders the impact of long and short term political transformations on assumptions about the continent's scope nature role and significance

*German Europe* Ulrich Beck, 2013-04-24 The euro crisis is tearing Europe apart But the heart of the matter is that as the crisis unfolds the basic rules of European democracy are being subverted or turned into their opposite bypassing parliaments governments and EU institutions Multilateralism is turning into unilateralism equality into hegemony sovereignty into the dependency and recognition into disrespect for the dignity of other nations Even France which long dominated European integration must submit to Berlin's strictures now that it must fear for its international credit rating How did this happen The anticipation of the European catastrophe has already

fundamentally changed the European landscape of power It is giving birth to a political monster a German Europe Germany did not seek this leadership position rather it is a perfect illustration of the law of unintended consequences The invention and implementation of the euro was the price demanded by France in order to pin Germany down to a European Monetary Union in the context of German unification It was a quid pro quo for binding a united Germany into a more integrated Europe in which France would continue to play the leading role But the precise opposite has happened Economically the euro turned out to be very good for Germany and with the euro crisis Chancellor Angela Merkel became the informal Queen of Europe The new grammar of power reflects the difference between creditor and debtor countries it is not a military but an economic logic Its ideological foundation is German euro nationalism that is an extended European version of the Deutschmark nationalism that underpinned German identity after the Second World War In this way the German model of stability is being surreptitiously elevated into the guiding idea for Europe The Europe we have now will not be able to survive in the risk laden storms of the globalized world The EU has to be more than a grim marriage sustained by the fear of the chaos that would be caused by its breakdown It has to be built on something more positive a vision of rebuilding Europe bottom up creating a Europe of the citizen There is no better way to reinvigorate Europe than through the coming together of ordinary Europeans acting on their own behalf

**The Paradox of German Power** Hans Kundnani, 2015 Since the Euro crisis began Germany has emerged as Europe's dominant power During the last three years German Chancellor Angela Merkel has been compared with Bismarck and even Hitler in the European media And yet few can deny that Germany today is very different from the stereotype of nineteenth and twentieth century history After nearly seventy years of struggling with the Nazi past Germans think that they more than anyone have learned its lessons Above all what the new Germany thinks it stands for is peace Germany is unique in this combination of economic assertiveness and military abstinence So what does it mean to have a German Europe in the twenty first century In *The Paradox of German Power* Hans Kundnani explains how Germany got to where it is now and where it might go in future He explores German national identity and foreign policy through a series of tensions in German thinking and action between continuity and change between normality and abnormality between economics and politics and between Europe and the world

**Documents on Germany, 1944-1985**, 1985 **Politically Speaking** Christ'l De Landtsheer, Ofer Feldman, 1998-09-24 The characteristics nature and content of the language used in the public sphere of various Western and non Western societies are examined in this collection of essays They also analyze the functions language plays in the polity and the link between culture political culture and the language that politicians and the public use in their symbolic interaction This work details and examines the characteristics nature and content of the language used in the public sphere of various Western and non Western societies the functions language plays in the polity and the link between culture political culture and the language that politicians and other elites as well as the public use in their symbolic interaction The essays describe and analyze the topic of political language from different perspectives political

science psychology philosophy sociology gender studies economics religious public administration mass communication and linguistics Essays examine the discourse of political press reports and TV interviews political orations and election propaganda legalistic political philosophic and religious treatises Throughout it provides an overview of the state of the art of political language utilizing various research methods and disciplines      **Access to History: Europe and the Cold War**

**1945-1991: Second Edition** David Williamson,2006-06-30 The new editions of Access to History combine all the strengths of this well loved series with features that allow all students access to the content and study skills needed to achieve exam success This title starts by examining the crucial events of 1944 7 which led to the break down of the Second World War alliance between the Big Three and the onset of the Cold War It shows how the Cold War shaped post war Europe through the creation of two great military and economic blocs Key events such as the Berlin blockade of 1948 9 the Hungarian revolt of 1956 the second Berlin crisis of 1958 61 and collapse of Communism from 1989 91 In this new edition additional material on détente has been added Throughout the book key dates terms and issues are highlighted and historical interpretations of key debates are outlined Summary diagrams are included to consolidate knowledge and understanding of the period and exam style questions and tips for each examination board provide the opportunity to develop exam skills      **The Germans**

**And Their Neighbors** Dirk Verheyen,Christian Soe,2019-07-09 For Germany's neighbors perhaps more acutely than for observers elsewhere the 1990 reunification of divided Germany has raised old memories and new concerns in public and scholarly discourse The shape and influence of these issues are the subject of this unique ambitious book Organized into country specific chapters the book offers original expert analyses of Germany's relations with seventeen European neighbors as well as with the United States The contributors explore the essential concerns these nations have faced in their bilateral relations with Germany past present and future In their introduction the editors trace both commonality and diversity in various national conceptions of the German Question and the ways in which these perceptions in turn generate shared as well as divergent national policy agendas vis a vis united Germany      The German Problem Transformed Thomas

Banchoff,1999-05-24 A systematic examination of Germany's post reunification foreign policy from a broader historical and analytical perspective      **Court, Cloister, and City** Thomas DaCosta Kaufmann,1995-11 In this book Thomas DaCosta

Kaufmann chronicles more than three hundred years of painting sculpture and architecture in Germany Poland the Czech Republic Slovakia Hungary Austria Ukraine Lithuania and western parts of the Russian Federation Massive in scale the book is highly accessible and lavishly illustrated The readability of the text and the entirely new insights it provides into three hundred years of Central European history make this a vital introduction to one of the least understood periods in the history of art      **1993** Patt Leonard,Rebecca Routh,1996 Journal articles books book chapters book reviews dissertations and

selected government publications on East Central Europe and the former Soviet Union published in the United States and Canada      Germany, Europe and the Persistence of Nations Stephen Wood,2018-12-20 Published in 1998 this book is an

articulate and densely documented account of political cultural and historical forces and tensions involved in contemporary European integration most especially concerning Germany In doing so it provides an effective fusion of a vast array of material from what are normally separate disciplines The book investigates contemporary resonances of identifications and conceptions of political boundaries that appeared in Europe in the late eighteenth and nineteenth century It argues that within a supranationalising Europe national identity and nationalism have not disappeared as cultural and political phenomena Rather they persist and manifest themselves in variable forms at popular and elite levels This is the basis for Europe s condition of far from completed unity at the centre of which is now a reunited Germany more sure of itself but less sure of the world around it

**The Two German States and European Security** F. Stephen Larrabee, 1989-05-01 This collection of essays examines the relationship between West Germany and the German Democratic Republic in terms of economics and politics The problems caused by the division of Germany in relation to European and international defence policies are also discussed

The German Predicament Andrei S. Markovits, Simon Reich, 2018-10-18 What does the unification of Germany really mean In their stimulating exploration of that question Andrei S Markovits and Simon Reich sketch diametrically different interpretations than are frequently offered by commentators One is that Germany well aware of the Holocaust has been Europeanized and is now prepared to serve as the capitalist and democratic locomotive that powers Europe The other is that the proclivities behind Auschwitz have been suppressed rather than obliterated from the German psyche Germany s liberal democracy was imposed by the allied victors according to this view and will one day dissolve revealing the old expansionist tendencies to try to Germanize all of Europe Markovits and Reich argue that benign contemporary assessments of Germany s postwar democracy combined with admiration for the country s economic achievements contribute to German influence far greater than military might was able to achieve Yet at the same time some Germans have internalized liberal and pacifist principles and now see their nation as powerless simply a larger Switzerland As a result while the Germans have enormous influence and latitude they have not taken responsibility for leadership The prime reason for this gap between ideology and structure Markovits and Reich suggest lies in the politics of collective memory

This is likewise one of the factors by obtaining the soft documents of this **German Question And Europe A History** by online. You might not require more grow old to spend to go to the books opening as capably as search for them. In some cases, you likewise attain not discover the proclamation German Question And Europe A History that you are looking for. It will unconditionally squander the time.

However below, later than you visit this web page, it will be correspondingly unconditionally easy to acquire as without difficulty as download guide German Question And Europe A History

It will not understand many period as we run by before. You can complete it while act out something else at home and even in your workplace. in view of that easy! So, are you question? Just exercise just what we have the funds for under as with ease as review **German Question And Europe A History** what you in the manner of to read!
