**Encyclopedia of the Age of Imperialism, 1800-1914** Carl C. Hodge, 2007-11-30 In 1800 Europeans governed about one third of the world's land surface by the start of World War I in 1914 Europeans had imposed some form of political or economic ascendancy on over 80 percent of the globe The basic structure of global and European politics in the twentieth century was fashioned in the previous century out of the clash of competing imperial interests and the effects both beneficial and harmful of the imperial powers on the societies they dominated This encyclopedia offers current detailed information on the major world powers and their global empires as well as on the people events ideas and movements both European and non European that shaped the Age of Imperialism

The German Colonial Empire Woodruff D.

Smith, 2012-12-01 Although Germany's short lived colonial empire 1884 1918 was neither large nor successful it is historically significant The establishment of German colonies and attempts to expand them affected international politics in a period of extreme tension Smith focuses on the interaction between Germany's colonial empire and German politics and by extension on the connection between colonialism and socioeconomic conflict in Germany before World War I Originally published in 1978 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

*The Justification of War and International Order* Lothar Brock, Hendrik Simon, 2021-02-11 The history of war is also a history of its justification The contributions to this book argue that the justification of war rarely happens as empty propaganda While it is directed at mobilizing support and reducing resistance it is not purely instrumental Rather the justification of force is part of an incessant struggle over what is to count as justifiable behaviour in a given historical constellation of power interests and norms This way the justification of specific wars interacts with international order as a normative frame of reference for dealing with conflict The justification of war shapes this order and is being shaped by it As the justification of specific wars

entails a critique of war in general the use of force in international relations has always been accompanied by political and scholarly discourses on its appropriateness In much of the pertinent literature the dominating focus is on theoretical or conceptual debates as a mirror of how international normative orders evolve In contrast the focus of the present volume is on theory and political practice as sources for the re and de construction of the way in which the justification of war and international order interact With contributions from international law history and international relations and from Western and non Western perspectives this book offers a unique collection of papers exploring the continuities and changes in war discourses as they respond to and shape normative orders from early modern times to the present

English Modernism, National Identity and the Germans, 1890–1950 Petra Rau, 2016-05-13 This is the first systematic study to trace the way representations of Germanness in modernist British literature from 1890 to 1950 contributed to the development of English identity Petra Rau examines the shift in attitudes towards Germany and Germans from suspicious competitiveness in the late Victorian period to the aggressive hostility of the First World War and the curious inconsistencies of the 1930s and 1940s These shifts were no simple response to political change but the result of an anxious negotiation of modernity in which specific aspects of Englishness were projected onto representations of Germans and Germany in English literature and culture While this incisive argument clarifies and deepens our understanding of cultural and national politics in the first half of the twentieth century it also complicates current debates surrounding race and otherness in cultural studies Authors discussed include major figures such as Conrad Woolf Lawrence Ford Forster and Bowen as well as popular or less familiar writers such as Saki Graham Greene and Stevie Smith Accessibly written and convincingly argued Rau's study will not only be an important book for scholars but will serve as a valuable guide to undergraduates working in modernism literary history and European cultural relations

*The Origins of the First World War* James Joll, Gordon Martel, 2013-11-05 James Joll's study is not simply another narrative retracing the powder trail that was finally ignited at Sarajevo It is an ambitious and wide ranging analysis of the historical forces at work in the Europe of 1914 and the very different ways in which historians have subsequently attempted to understand them The importance of the theme the breadth and sympathy of James Joll's scholarship and the clarity of his exposition have all contributed to the spectacular success of the book since its first appearance in 1984 Revised by Gordon Martel this new 3rd edition accommodates recent research and an expanded further reading section

German Colonialism Sebastian Conrad, 2012 This book explores the wide ranging consequences of Germany's short lived colonial project for the nation and European and global history

**Bismarck** K. Lerman, 2014-01-14 How did Bismarck Germany's greatest nineteenth century leader extend and maintain his power This new Profile examines his strengths as statesman and all the facets of his political career His many direct achievements included the unification of Germany and the expansion of Prussia In short he was the architect of Germany's change from cultural region to political nation In the end he combined egotism and brilliance exceptionally yet it was still not enough to save him from dismissal by

William II     In Defense of German Colonialism Bruce Gilley, 2022-08-02 Famed historian and author of the groundbreaking *The Case for Colonialism* demonstrates that contrary to modern presuppositions German colonialism from its early roots to the mid twentieth century was overall a force for good in the world where development was encouraged and native governance flourished Historian and university professor Bruce Gilley delves into the history of German colonialism from its earliest roots through the 20th century demonstrating that contrary to modern presuppositions it served as a global force for good elevating the lives of its subjects and encouraging scientific development while allowing native cultures to flourish within its governance

*China Goes to Sea* Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia

*The Palgrave International Handbook of Mixed Racial and Ethnic Classification* Zarine L. Rocha, Peter J. Aspinall, 2020-01-03 This handbook provides a global study of the classification of mixed race and ethnicity at the state level bringing together a diverse range of country case studies from around the world The classification of race and ethnicity by the state is a common way to organize and make sense of populations in many countries from the national census and birth and death records to identity cards and household surveys As populations have grown diversified and become increasingly transnational and mobile single and mutually exclusive categories struggle to adequately capture the complexity of identities and heritages in multicultural societies State

motivations for classification vary widely and have shifted over time ranging from subjugation and exclusion to remediation and addressing inequalities The chapters in this handbook illustrate how differing histories and contemporary realities have led states to count and classify mixedness in different ways for different reasons This collection will serve as a key reference point on the international classification of mixed race and ethnicity for students and scholars across sociology ethnic and racial studies and public policy as well as policy makers and practitioners

*Mass Suicides on Saipan and Tinian, 1944* Alexander Astroth, 2019-04-10 When the Americans invaded the Japanese controlled islands of Saipan and Tinian in 1944 civilians and combatants committed mass suicide to avoid being captured Though these mass suicides have been mentioned in documentary films they have received scant scholarly attention This book draws on United States National Archives documents and photographs as well as veteran and survivor testimonies to provide readers with a better understanding of what happened on the two islands and why The author details the experiences of the people of the islands from prehistoric times to the present with an emphasis on the Japanese Okinawan Korean Chamorro and Carolinian civilians during invasion and occupation

The Ashgate Research Companion to Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect

critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire Gladstone and Kruger Deryck Schreuder,2018-01-17 Originally published in 1969

Gladstone and Kruger examines British reactions to the Afrikaner nationalism Beginning with the first Anglo Boer war of 1880 81 it examines the formulation of policy after the British defeat at Majuba Hill At that moment the dangers of a pan Afrikaner revolt in the Transvaal Orange Free State and Cape Province seemed imminent and the British presence in southern Africa seemed very much at risk Schreuder shows how the devolution of metropolitan Imperial power on to local ministries conflicted with the Whig concern for the preservation of British dominance and prestige abroad and provides a commentary on the Liberal response to the Irish problem *Germany and Its West African Colonies* Wazi Apoh,Bea Lundt,2013 West African history is usually seen as mainly influenced by English or French colonialism There is a new interest in German colonialism but most research is done in European archives and with a European point of view This book explores German colonial exploits and their consequences in Ghana Togo and Cameroon mostly from an African point of view By means of research on sites of the colonial hinterland and the agency of entangled people the book reveals the simmering impact of the past encounters on indigenous religious cultural political and socio economic developments in West Africa

Series African Studies Afrikanische Studien Vol 49 Routledge Library Editions: Gladstone & Disraeli Various Authors,2021-03-18 The volumes in this set originally published between 1966 and 1983 draw together research by leading academics on William Gladstone and Benjamin Disraeli and provide a rigorous examination of related key issues The volumes examine the historical political and philosophical whilst also exploring their work with other political figures such as Paul Kruger This set will be of interest to students of history and politics respectively **Anthropology and Antihumanism in Imperial Germany** Andi Zimmerman,2010-02-15 With the rise of imperialism the centuries old European tradition of humanist scholarship as the key to understanding the world was jeopardized Nowhere was this more true than in nineteenth

century Germany It was there Andrew Zimmerman argues that the battle lines of today s culture wars were first drawn when anthropology challenged humanism as a basis for human scientific knowledge Drawing on sources ranging from scientific papers and government correspondence to photographs pamphlets and police reports of freak shows Zimmerman demonstrates how German imperialism opened the door to antihumanism As Germans interacted more frequently with peoples and objects from far flung cultures they were forced to reevaluate not just those peoples but also the construction of German identity itself Anthropologists successfully argued that their discipline addressed these issues more productively and more accessibly than humanistic studies Scholars of anthropology European and intellectual history museum studies the history of science popular culture and colonial studies will welcome this book
