Language George Melville Bolling,Bernard Bloch,1999 *Language Processing in Advanced Learners of English* Marco Schilk,2020-05-15 The production and processing of collocations and formulaic language is a field of growing interest in corpus linguistics and experimental psycholinguistics In the past this fascinating field at the interface of grammar and the lexicon has been mainly studied based on English native speakers while research focusing on second language speakers and language learners has been comparatively rare This book proposes an integration of corpus based and experimental methods by analysing language processing of collocation by advanced learners of English In using corpus derived collocational stimuli of native like and learner typical language use in an experimental setting it shows how advanced German L1 learners of English process native like collocations L1 based interferences and non collocating lexical combinations This book is of interest to anyone interested in the psycholinguistic validity of collocation from a bilingual point of view as it explores methods of tracking collocational processing of speakers working with different sets of collocational preferences
