The Routledge Companion to Christian Ethics D. Stephen Long,Rebekah L. Miles,2023-01-01

The Routledge Companion to Christian Ethics brings together two different but related disciplines the first is contemplative or theoretical asking what are the beliefs or doctrines that characterize Christianity whilst the second is practical asking what are the ethical practices that attend its teachings The movement between the theoretical and practical aspects is not however one way as doctrine and life are mutually informing In this comprehensive volume leading scholars address key topics problems and debates in this hotly debated topic within a truly global context Comprising over 35 chapters by a team of international contributors the handbook is divided into three parts based on the three persons of the Trinity God the Father God the Son and God the Holy Spirit Within these sections cutting edge issues are examined including God and genetics War peace and violence White supremacy Creation and sexuality Digital ethics Transgender studies Climate change Immigration and refugees Adopting a practical approach that must consider new concerns that have arisen with recent social political and cultural shifts The Routledge Companion to Christian Ethics is essential reading for students and researchers in Christian ethics religious ethics and Christianity studies The handbook will also be very useful for those in related fields such as ethics and philosophy

Revisiting Institutionalism in Sociology Seth Abrutyn,2013-11-07 There may not be a concept so central to sociology yet so vaguely defined in its contemporary usages than institution In Revisiting Institutionalism in Sociology Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set

Ethics and Nuclear Deterrence Geoffrey

Goodwin,2020-11-19 As nuclear weapons become ever more sophisticated so the deterrence debate becomes increasingly complex The Ban the Bomb slogans of the 1950s had been replaced by cries for nuclear free zones and talk of megatonnage and fallout had given way to talk of tactical nuclear weapons and limited strike capability Originally published in 1982 this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist unilateralist approaches to disarmament and arms control at the time It is not like so many books on the subject an ideological statement there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it The book also includes an essay on attempts to mitigate the appalling brutality of the many conventional wars since 1945 At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues this book was welcome sensible and necessary **Ethics in the Arthurian Legend**

Melissa Ridley Elmes,Evelyn Meyer,2023 An interdisciplinary and trans historical investigation of the representation of ethics in Arthurian Literature From its earliest days the Arthurian legend has been preoccupied with questions of good kingship the behaviours of a ruling class and their effects on communities societies and nations both locally and in imperial and colonizing contexts Ethical considerations inform and are informed by local anxieties tied to questions of power and identity especially where leadership service and governance are concerned they provide a framework for understanding how the texts operate as didactic and critical tools of these subjects This book brings together chapters drawing on English Welsh German Dutch French and Norse iterations of the Arthurian legend and bridging premodern and modern temporalities to investigate the representation of ethics in Arthurian literature across interdisciplinary and transhistorical lines They engage a variety of methodologies including gender critical race theory philology literature and the law translation theory game studies comparative critical and close reading and modern editorial and authorial practices Texts interrogated range from Culhwch and Olwen to Parzival Roman van Walewein Tristrams Saga Sir Gawain and the Green Knight and Malory s Morte Darthur As a whole the approaches and findings in this volume attest to the continued value and importance of the Arthurian legend and its scholarship as a vibrant field through which to locate and understand the many ways in which medieval literature continues to inform modern sensibilities and institutions particularly where the matter of ethics is concerned

parallel with the development of historiography as a genre and how the moral messages on display remained surprisingly stable across this period For the ancient Greek historiographers moral didacticism was a way of making sense of the past and making it relevant to the present but this does not mean that they falsified events truth and morality were compatible and synergistic ends Elegant Epistles: Being a Copious Selection by V.
