Legitimizing New Religions James R. Lewis, 2003 James R Lewis has written the first book to deal explicitly with the issue of how emerging religions legitimate themselves He contends that a new religion has at least four different though overlapping areas where legitimacy is a concern making converts maintaining followers shaping public opinion and appeasing government authorities The legitimacy that new religions seek in the public realm is primarily that of social acceptance Mainstream society s acknowledgement of a religion as legitimate means recognizing its status as a genuine religion and thus recognizing its right to exist Through a series of wide ranging case studies Lewis explores the diversification of legitimation strategies of new religions as well the tactics that their critics use to de legitimate such groups Cases include the Movement for Spiritual Inner Awareness Native American prophet religions spiritualism the Church of Christ Scientist Scientology Church of Satan Heaven s Gate Unitarianism Hindu reform movements and Soka Gakkai a new Buddhist sect Since many of the issues raised with respect to newer religions can be extended to the legitimation strategies deployed by established religions this book sheds an intriguing new light on classic questions about the origin of all religions

Borderlands Mike Dash,2000-11-07 Explore the Borderlands The charred remains of Helen Conway whose body exploded Was this a case of spontaneous combustion Discoveries of 130 foot long boa constrictors and twelve foot giant kangaroos What other species have gone undiscovered In England a town is pelted from the sky by hundreds of tiny rose colored frogs Is this a one time event an omen or a bizarre natural phenomenon Near death experiences lake monsters crop circles fairies visions of the Virgin Mary Using his vast research and privileged access to case files noted paranormal investigator Mike Dash has compiled this unprecedented collection of the most baffling puzzles of our time Touring the globe and sifting through a vast array of eyewitness accounts and film and photographic evidence Dash separates genuine cases from hoaxes and dares to record those macabre inexplicable and terrifying events where there is no other explanation except that what people saw heard and sometimes lived to tell about is true Paranormal Perspectives: One Big Box of 'Paranormal Tricks'? John Fraser,2024-10-29 In his latest book One Big Box of Paranormal Tricks From Ghosts to Poltergeists to the Theory of Just One Paranormal Power John Fraser reflects on his motivations for involvement in paranormal research from an early age recalling his experiences to date the people who have influenced him and the conclusions he s come to Whilst Fraser refers to events in his life this book is not a memoir or life story in any conventional sense It s presented as a meditation on what the paranormal might mean for us in our universal quest to give our lives meaning One Big Box of Paranormal Tricks takes more of a zen the art of spending a night in a haunted house approach than an autobiographical one

Consciousness and Evolution James Christodoulides,2012-08-01 Understanding the nature of consciousness is the key to understanding the whole of reality It is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality Beyond the simplistic notion of duality that is so entrenched in Western philosophies there is a deeper and more profound way to comprehend the nature of our existence We are parts within a wider whole We do not exist as separate beings within the Universe we are parts of the Universe itself The theory outlined in Consciousness and Evolution turns orthodox explanations for the evolution of mind upside down It is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves In order to understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself Broken Images Broken Selves Stanley Krippner,Susan

Powers,2013-06-20 Practical and provocative this book serves as a guide for those who want a deeper look into the human psyche and a more encompassing vision of the less predictable aspects of the mind **Youth and Experiences of Ageing among Maa** Paul Spencer,2014-01-01 The Maa of East Africa are a cluster of related pastoral peoples who share a social organization based on age This groups men into life long cohorts from their initiation in youth regardless of family wealth Historically this type of pre market society has been described in every continent but East Africa provides the principal surviving region of age based societies among whom the Maasai are the best known In this volume comparison between three branches of Maa highlights different aspects of their society the dynamics of power with age and gender among the Maasai of ritual performance and belief among the Samburu and of historical change among the Chamus Here it is argued that understanding another culture can only be approached through models derived in the first instance from the representations conveyed by members of that culture The social anthropologist may then elaborate these images through the choice of analytical parallels even extending to other disciplines and personal experience Each chapter in this volume views Maa institutions through a different lens exploring models relevant to a comprehensive analysis of their social life

Strange Dimensions Jack Hunter,2015-07-20 It is from the paranormal s multifaceted nature that the title of this book takes its meaning Throughout its pages we encounter time and again talk of a wide variety of dimensions levels and layers from social cultural psychological and physiological dimensions to spiritual mythic narrative symbolic and experiential dimensions and onwards to other worlds planes of existence and realms of consciousness The paranormal is by its very nature multidimensional Once again Jack Hunter takes us down the proverbial rabbit hole here with the grace nuance and sheer intelligence of a gifted team of essayists each working in her or his own way toward new theories of history consciousness spirit the imagination the parapsychological and the psychedelic Another clear sign that there is high hope in high strangeness and that we are entering a new era of thinking about religion about mind about us Jeffrey J Kripal author of Authors of the Impossible The Paranormal and the Sacred Manifesting Spirits Jack Hunter,2020-12-12 An exploration of contemporary trance and physical mediumship at a private spiritualist home circle called the Bristol Spirit Lodge Located in a garden on the outskirts of Bristol the Lodge is a wooden shed specially constructed for the purposes of mediumship development and spirit communication Through a combination of ethnographic observations in s ances including his own experiences of mediumship development and interviews with spirits and their mediums Hunter delves into a sub urban world of trance states ectoplasm spirit lights and discarnate entities Issues relating to altered states of consciousness personhood performance and the efficacy of ritual are examined in order to make sense of the processes by which spirits become manifest in social reality A large part of Manifesting Spirits is given over to a broader discussion of anthropology s evolving attitudes toward the paranormal as a component of the life worlds of many people across the globe and argues for the development of a non reductive anthropological approach to the paranormal and mediumship in particular This emerging

framework referred to as ontological flooding does not attempt to explain away the existence of spirits in terms of functional cognitive or pathological theories as most mainstream theorists tend to do but rather embraces a processual perspective that emphasises complexity and multiple interconnected processes underlying spirit possession performances and experiences

Global Psychologies Suman Fernando, Roy Moodley, 2018-06-25 This book critiques our reliance on Eurocentric knowledge in the education and training of psychology and psychiatry Chapters explore the diversity of constructions of the self in non Western cultures examining traditional psychologies from Africa Asia Australasia and Pre Columbian America The authors discuss liberation psychologies and contemporary movements in healing and psychological therapy that draw on both Western and non Western sources of knowledge A central theme confronted is the importance in a rapidly shrinking world for knowledge systems derived from diverse cultures to be explored and disseminated equally The authors contend that for this to happen academia as a whole must lead in promoting cross national and cross cultural understanding that is free of colonial misconceptions and prejudices This unique collection will be of value to all levels of study and practice across psychology and psychiatry and to anyone interested in looking beyond Western definitions and understandings
