Committee on rivers and harbors,1941 **Uncultivated** Andy Brennan,2019-06-17 The best wine book I read this year was not about wine Eric Asimov New York Times Today food is being reconsidered It s a front and center topic in everything from politics to art from science to economics We know now that leaving food to government and industry specialists was one of the twentieth century s greatest mistakes The question is where do we go from here Author Andy Brennan describes uncultivation as a process It involves exploring the wild recognizing that much of nature is omitted from our conventional ways of seeing and doing things our cultivations and realizing the advantages to embracing what we ve somehow forgotten or ignored For most of us this process can be difficult like swimming against the strong current of our modern culture The hero of this book is the wild apple Uncultivated follows Brennan s twenty four year history with naturalized trees and shows how they have guided him toward successes in agriculture in the art of cider making and in creating a small farm business The book contains useful information relevant to those particular fields but is designed to connect the wild to a far greater audience skillfully blending cultural criticism with a food activist s agenda Apples rank among the most manipulated crops in the world because not only do farmers want perfect fruit they also assume the health of the tree depends on human intervention Yet wild trees live all around us and left to their own devices they achieve different forms of success that modernity fails to apprehend Andy Brennan learned of the health and taste advantages of such trees and by emulating nature in his orchard and in his cider he has also enjoyed environmental and financial benefits None of this would be possible by following today s prevailing winds of apple cultivation In all fields

our cultural perspective is limited by a parallel proclivity. It's not just agriculture we all must fight tendencies toward specialization, efficiency, linear thought, and predetermined growth. We have cultivated those tendencies at the exclusion of nature's full range. If *Uncultivated* is about faith in nature and the power it has to deliver us from our own mistakes, then wild apple trees have already shown us the way. The book for cider lovers. *New York Times*. Andy Brennan is a stubborn, thoughtful original, and his apple memoir is powered by inspiring verve and irreverence. Loving apples or cider is not a prerequisite for loving this book. All that is needed is the willingness to follow a vibrant narrative voice driven by the pursuit of dreams. Alice Feiring, author of *Naked Wine* and *For the Love of Wine*. *The Hypocrisy of Disco* Clane Hayward, 2012-11-09. This memoir of girlhood among California's hippie communities is an offbeat tale of preadolescence written with remarkable honesty and respect. *Publishers Weekly*. Born in San Francisco just before the Summer of Love, Clane Hayward grew up on hippie communes throughout the west. Her poignantly funny, sometimes melancholy and always riveting memoir recounts her extraordinary life up until her thirteenth birthday. School was a particularly happy event; it meant a hot lunch and clothes that matched. But Clane's mother warned her that schools are just zoos run by the government. From a world of complex relationships, uncertain rules, and constant surprises, Clane forged a childhood. She did it sometimes with, sometimes without her bong-puffing Buddha, quoting macrobiotic mother and her wild-haired redneck father. *Hypocrisy of Disco* is an honest, direct, and truly unforgettable tale and a tribute to the resilience of youth.
