Pacifism Joseph Verbovszky, 2024-03-30 German Structural Pacifism examines the influence of Germany's lessons of the past on its security policy since reunification in an approach that is both novel and timely in the context of the Russia Ukraine War

Germany's lessons of the past provide contradictory right ways for Germany to overcome its authoritarian past and serve to

legitimate political interests in security policy decision making Reconciling competing political interests and contradictory

narratives results in a security policy that prioritizes the right way to do security policy is over its effectiveness It is the

author's great merit to have defined the past 30 years of German security policy under the term Structural Pacifism I find

this conclusive S nke Neitzel Chair of Military History at the University of Potsdam An accurate depiction of Germany's

systemic neglect of its armed forces since reunification demonstrating why it is no surprise that our armed forces are naked

A follow up including the Zeitenwende would be very interesting Hans Peter Barthels President of the German Society for

Security Policy The book succinctly and accurately addresses the lack of an honest debate on the use of military force in the

domain of German security policy and explores its negative impact on military decision making from political strategy all the

way down to the tactical level Volker Wieker Former Chief of Defense of the German Federal Armed Forces 2009 2018

First published in 1986 this book draws together analyses of English and German. It defines the contrasts and similarities between the two languages and in particular looks at the question of whether contrasts in one area of the grammar is systematically related to contrasts in another and whether there is any directionality or unity to contrast throughout grammar as a whole. It is suggested that there is and that English and German can serve as a case study for a more general typology of languages than we now have. This volume will be of interest to a wide range of linguists including students of Germanic languages, language typologists, generative grammarians attempting to fix the parameters on language variation, historical linguists and applied linguists.
