German Guided Missiles:

German Guided Missiles of World War II Steven J. Zaloga, 2019-11-28 Although not as well known as the V 1 buzz bomb and the V 2 missile the first German missiles to see combat were anti ship missiles the Henschel Hs 293 guided missile and the Fritz X guided bomb These began to see extensive combat in the Mediterranean in 1943 In their most famous use the Italian battleship Roma was sunk by a Fritz X attack in September 1943 when Italy attempted to switch sides The serious threat posed by these missiles led to a vigorous but little known Wizard War by the Allies to develop electronic counter measures the first effort of its kind Besides the anti ship missiles the other major category of German missiles were the air defence missiles Germany suffered extremely heavy losses from Allied strategic bombing attacks and German fighter and flak defences proved increasingly unsuccessful As a result the Luftwaffe began an extensive programme to deploy several families of new air defence missiles to counter the bomber threat including the Wasserfall Schmetterling and others This book traces the origins of these missile programmes and examines their development and use in combat With full colour illustrations and detailed explorations of the stories behind the missiles this study offers a comprehensive overview of German guided missiles in the World War II era German Guided Missiles William Wolf, 1997 *Bibliography on German Guided Missiles* United States. technology to the Allies after 1945 has previously been overshadowed by the well published transfers of the V 1 and V 2 guided missiles This book presents the first complete history of Germany s wartime development of surface to air missile SAM technology how the Allies acquired this secret research towards the end of World War II in Europe and in the early postwar period and how they then exploited this knowledge History of German Guided Missiles Development Theodor Benecke,1957 History of German Guided Missiles Development Th Benecke,1957 History of German Guided Missiles Development T.
