German Knighthood One Thousand Fifty To Thirteen Hundred:

The Histories of a Medieval German City, Worms c. 1000-c. 1300 David S. Bachrach, 2016-03-03 Germany was the most powerful kingdom in the medieval West from the mid tenth to the mid thirteenth century However its history remains largely unknown outside of the German speaking regions of modern Europe Until recently almost all of the sources for medieval Germany were available only in the original Latin or in German translations while most scholarly investigation has been in German The limited English language scholarship has focused on royal politics and the aristocracy Even today English speaking students will find very little about the lower social orders or Germany's urban centers that came to play an increasingly important role in the social economic political religious and military life of the German kingdom after the turn of the millennium The translation of the four texts in this volume is intended to help fill these lacunae They focus on the city of Worms in the period c 1000 to c 1300 From them readers can follow developments in this city over a period of almost three centuries from the perspective of writers who lived there gaining insights about the lives of both rich and poor Christian and Jew No other city in Germany provides a similar opportunity for comparison of changes over time As important Worms was an early adopter of new political economic institutional and military traditions which would later become normative for cities throughout the German kingdom Worms was one of the first cities to develop as a center of episcopal power it was also one of the first to develop an independent urban government and was precocious in emerging as a de facto city state in the mid thirteenth century These political developments with their concomitant social economic and military consequences would define urban life throughout the German kingdom In sum the history of Worms as told in the narrative sources in this volume can be understood as illuminating the broader urban history of the German kingdom at the height of its power

Captivity and Imprisonment in Medieval Europe, 1000-1300 J. Dunbabin, 2002-10-23 This book explores the growing importance of prisons both lay and ecclesiastical in western Europe between 1000 and 1300 It attempts to explain what captors hoped to achieve by restricting the liberty of others the means of confinement available to them and why there was an increasingly close link between captivity and suspected criminal activity It discusses conditions within prisons the means of release open to some captives and writing in or about prison
