illustrate common possibilities for setting trimeter tetrameter and pentameter lines Degrees of rhythmic regularity and irregularity are also considered There has been a wealth of new work on metric theory and analysis in the past thirty years here this research is reviewed and applied in song analysis Topics include the nature of metric entrainment drawing on music psychology metric dissonance hypermeter and phrase rhythm Whereas narrative accounts of the nineteenth century Lied typically begin with Schubert here forms of expansion and elision in songs by Hensel provide a point of departure Repetition links up directly with motion in songs by Schubert including his famous Gretchen am Spinnrade The doubling and reverberation of vocal melody creates a form of interiorized resonance in Schumann s songs Brahms and Wolf are typically understood as polar opposites in the later nineteenth century here the differences are clarified along with deeper affinities Songs by both Brahms and Wolf may be understood as musical performances of poetic readings and in this regard they both belong to a late period of cultural history
