A World of Regions Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics

Toward a Critical Theory of States Clyde W. Barrow, 2016-05-12 In depth study of the enduring impact of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas We have recently lived through the turmoil of a global financial crisis that originated in the United States and despite the platitudes of neo liberal ideology nation states were deeply involved in managing this crisis If the state is again a preeminent actor in the global economy then state theory and the problem of the state should also return to the forefront of political theory *Toward a Critical Theory of States* is an intensive analysis of the 1970s debate between state theorists Ralph Miliband and Nicos Poulantzas including its wider impact on Marxist theories of the state in subsequent decades Clyde W Barrow makes unique arguments and contributions to this continuing discussion in state theory and lays the foundation for more theoretically informed empirical and historical research on the state in the age of globalization He argues that by merely moving past the Poulantzas Miliband debate as some have recommended scholars have abandoned much that is valuable in understanding the state particularly the need to comprehend the contemporary transformation of the state form and the state apparatuses as part of the new conditions of globalization and transnational capital accumulation Building upon themes of state restructuring found in Poulantzas and Miliband Barrow establishes the outlines of an approach that integrates the thought of both to propose a synthetic understanding of the new imperialism

High Skills : Globalization, Competitiveness, and Skill Formation Phillip Brown, Andy Green, Hugh Lauder, 2001-09-20 Economic globalization has led to intense debates about the competitiveness of nations Prosperity social justice and welfare are now seen to depend on the creation of a high skilled workforce This international consensus around high skills has led recent American presidents to claim themselves education presidents and in Britain Tony Blair has announced that talent is 21st century wealth This view of knowledge driven capitalism has led all the developed economies to increase numbers of highly trained people in preparation for technical professional and

managerial employment But it also harbours the view that what we regard as a skilled worker is being transformed The pace of technological innovation corporate restructuring and the changing nature of work require a new configuration of skills described in the language of creativity teamwork employability self management and lifelong learning But is this optimistic account of a future of high skilled work for all justified This book draws on the findings of a major international comparative study of national routes to a high skills economy in Britain Germany Japan Singapore South Korea and the United States and includes data from interviews with over 250 key stakeholders It is the first book to offer a comparative examination of high skill policies a topic of major public debate that is destined to become of even greater importance in all the developed economies in the early decades of the twenty first century
