God Within Process:

Minding Creation Joanna Leidenhag, 2020-12-10 Are humans the only creatures that can appreciate God's creation? What if consciousness is spread more widely across all things? This volume examines panpsychism through the lens of Christian doctrine. *Minding Creation* is the first substantial examination of what a panpsychist theory of consciousness implies for key theological debates concerning God's presence and action, evolution and the origin of the soul, human uniqueness and the environmental crisis. Joanna Leidenhag develops a theological panpsychism that is based on an exceptionally wide range of scholarship. *Minding Creation* draws on the theologies of historical figures such as Augustine of Hippo, Gottfried von Leibniz and others in order to create a critical and constructive conversation with contemporary analytic philosophers of mind such as Thomas Nagel, Galen Strawson and David J. Chalmers. Leidenhag also discusses key concepts and issues such as emergence theory, divine action and ecology. She concludes that God created a universe from nothing which is filled with indwelling powers, sacramental value and intrinsic experience. This is a creation in which the Holy Spirit is internally present at every point, a creation that worships God and a creation that human beings must protect and lead in praise.

The Universe Is on Our Side Bruce Ledewitz, 2021-10-05 In *The Universe Is On Our Side* Bruce Ledewitz argues that there has been a breakdown in American public life that no election can fix. Americans struggle to even converse about politics and the usual explanations for our condition have failed to make things better. America's future requires that we begin a new story by each of us asking a question posed by theologian Bernard Lonergan: Is the universe on our side? According to Ledewitz, when we commit to live honestly and fully by our answer to that question, even if our immediate answer is no, America can begin to heal.

Process Theology and Mysticism Bruce G. Epperly, 2023-12-05 Can mysticism and process theology work together in a way that is a valuable and practical part of one's spiritual life? In this booklet, the first of three that integrate process theology with contemporary spiritual life and activity, Bruce Epperly brings process thought into our spiritual lives and physical well-being in a call to Shalom in cooperation with the Divine. Epperly is a specialist in bringing difficult concepts to life for everyone. He combines that skill with the short format of the Topical Line Drives series to reach spiritual seekers embedded in a busy and challenging world. Mysticism is not something just for people in ancient times or who live in monasteries. It can be a vital part of your life. These may be the words you're looking for to understand and express what you feel.

Boyd, 2025-08-04 Where does evil come from If there is a sovereign creator God as Christian faith holds is this God ultimately responsible for evil Does God's sovereignty mean that God causes each instance of sin and suffering How do Satan his demons and hell fit into God's providential oversight of all creation and history How does God interact with human intention and action If people act freely does God know in particular every human decision before the choice is made In this important

book Gregory A Boyd mounts a thorough response to these ages old questions which remain both crucial and contentious both practical and complex In this work Boyd defends his scripturally grounded trinitarian warfare theodicy presented in *God at War* with rigorous philosophical reflection and insights from human experience and scientific discovery Critiquing the classical Calvinist solution to the problem of evil he advocates an alternative understanding of the sovereignty of the trinitarian God and of the reality of Satan that sheds light on our fallen human condition While all may not agree with Boyd s conclusions *Satan and the Problem of Evil* promises to advance the church s discussion of these critical issues **The**

The Mythology of Science R. J. Rushdoony, 2009-11-16 The mythology of science is its religious devotion to the myth of evolution In evolution man is the highest expression of intelligence and reason and such thinking will not yield itself to submission to a God it views as a human cultural creation useful if at all only in a cultural context Views of origins are dependent on faith and one's position speaks much as to one's religious tenets Evolutionary faith however cannot tolerate any view of the natural world or science that places it under another faith such as the Christian belief in a sovereign causative God Darwin gave an ostensibly scientific justification for man's rebellion against God He put men at the top of the evolutionary ladder allowing them to believe they had realized Satan's lure to Adam and Eve and become as gods knowing determining good and evil Genesis 3:5 We can attack the science of evolution all we want but the battle for our faith true science and our culture is a religious one over the nature of truth Evolution is a religious faith that has become entrenched as a presupposition of modern thought For Christians to argue about the unproven nature of the evolutionary hypothesis or the circular reasoning of its thought is of some value but the essential issue is that two opposing religious faiths are in conflict Evolution is popular because it is such a useful paradigm to sinful men it dispenses with God as a prerequisite of all things But Christianity as a religious faith depends not on proofs that are constructions of man's fallen mind but on the reality of an almighty God who reveals Himself to us by grace Christianity too depends on circular reasoning we even begin and end with faith in God and His revelation The purpose of this book first published in 1967 is to define the nature of the opposing religious systems of thought Christian creationism and Darwinism in its various forms It is a call to urge Christians to stand firm for Biblical six day creationism as a fundamental aspect of their faith in the Creator

With Gifted Thinkers Mark Manolopoulos, 2009 This book is a collection of engaging entertaining and often confronting dialogues with nine thinkers of faith in postmodernity some of them more prominent than others all of them possessing the rare quality or gift of thinking rigorously tentatively passionately John D Caputo Kevin Hart Robyn Horner Richard Kearney Catherine Keller Kate Rigby Mark C Taylor Mark I Wallace and Merold Westphal The project was driven by two ambitions to seek out their thoughts on the question of the gift which has become a hot topic since the early 1990s in philosophy theology and a whole range of academic disciplines and which was the subject of the interviewer's doctoral work and more generally to examine key elements of these thinkers most important works Hence the dialogues traverse a splendid range of issues philosophical theological ecological hermeneutical biblical scientific and more What's more the dialogical medium has the advantage of casting complex issues in extremely accessible terms thereby making this collection a must read for anyone interested in contemporary Continental theory

Intercessory Prayer Philip Clements-Jewery, 2016-05-23 How is prayer possible How does prayer work Why is it necessary to ask for God's gifts Intercessory Prayer attempts to provide answers to questions about the nature of intercessory prayer Critically examining biblical teaching and modern theological and philosophical

thinking this book shows how intercessory prayer may be seen as one of the means by which God enlists the freely given cooperation of human persons in the realisation of the divine purpose Clements Jewery adopts a process view of the universe to show how intercession both makes certain possibilities greater and strengthens the likelihood of response so that people who pray may have every confidence that their prayers will make a difference to the world through the God who both influences and is influenced by the creation *How is Global Dialogue Possible?* Johanna Seibt, Jesper Garsdal, 2014-12-11

Intercultural dialogue is often invoked in vague reference to a method that can build cross cultural understanding and facilitate global policy making This book clarifies the theoretical foundations of intercultural dialogue and demonstrates the practical significance of intercultural value inquiry combining the perspectives of philosophy conflict research religious studies and education **The Bible in Theology and Preaching** Donald K. McKim, 1999-05-05 Divine Providence and Human Agency Alexander S. Jensen, 2016-05-13

Divine Providence and Human Agency develops an understanding of God and God's relation to creation that perceives God as sovereign over creation while at the same time allowing for a meaningful notion of human freedom This book provides a bridge between contemporary approaches that emphasise human freedom such as process theology and those influenced by it and traditional theologies that stress divine omnipotence This book argues that it is essential for Christian theology to maintain that God is ultimately in charge of history otherwise there would be no solid grounds for Christian hope Yet the modern human self understanding as free agent within certain limitations must be taken seriously Jensen approaches this apparent contradiction from within a consistently trinitarian framework Jensen argues that a Christian understanding of God must be based on the experience of the saving presence of Christ in the Church leading to an apophatic and consistently trinitarian theology This serves as the framework for the discussion of divine omnipotence and human freedom On the basis of the theological foundation established in this book it is possible to frame the problem in a way that makes it possible to live within this tension Building on this foundation Jensen develops an understanding of history as the unfolding of the divine purpose and as an expression of God's very being which is self giving love and desire for communion This book offers an important contribution to the debate of the doctrine of God in the context of an evolutionary universe **Re-Enchanting the Earth** Delio, Ilia, 2020-09-16

Artificial Intelligence AI the new frontier of human evolution holds the promise of reuniting religion and science *Spiritual Warfare* Alistair Cuthbert, 2025-07-29

Continuous global news coverage reveals the relentless and pervasive ongoing nature of evil human action and its impact on persons communities and countries around the world Whether it is world wide human trafficking global arms dealing dehumanizing sweat shops country wide genocides and so on there is no shortage of evidence to suggest that there is much evil conflict suffering pain and loss on this planet For the Christian there is the added challenge of trying to reconcile this marred world with a belief in an all powerful and benevolent deity Stories from the persecuted church reveal that the Christian church is not immune to these evil powers and principalities that are stoking up as much chaos here on earth as

they possibly can Spiritual Warfare A Charismatic Baptist Theology of Participating in Divine Conflict attempts to try and help to make sense of the presence of the God in a world beset by evil and strife Using the extensive theological corpus of British Baptist scholar Paul S Fiddes Spiritual Warfare articulates a doctrine of God which can remain intact when situated in the world as we know it and help make sense of evil that has not yet been eradicated by God
