Gods Creative World:

The Many Facets of Love Thomas Jay Oord, 2009-03-26 Poets theologians romantics scientists and revolutionaries alike have explored the many facets of love Judging by the wide use of the word love and the high praise it typically receives we might think that philosophers have thoroughly analyzed love But this is not the case This book takes a step toward rectifying the neglect of a philosophical analysis of love It brings together fifteen philosophical perspectives that explore some of love s most important facets Most of the essays have theistic or religious concerns in mind [Online with God](#) C. Philip Chacko, 2021-11-02 Theologically brilliant and astute I highly recommend this persuasive biblical and scholarly treatment on the work of the triune God in the world Dr Saphir Athyal Director of Faith Development World Vision International We often hear of God described as the Trinity the Father Son and Holy Spirit Dr Philip Chacko points out these three entities as the sides of a triangle perfectly balanced around a center of love and peace As God made humans in his image it only makes sense that humans themselves are made up of triangles as well Dr Chacko theorizes that each of us holds four different triangles at our core each concerned with a different element of our inner being But as humans our triangles are not perfectly balanced like that of God but He is the one and only power whose force can balance our triangles into true harmony In [Online with God](#) Dr Chacko explores how each of our inner triangles is wired describes how we can discover them for ourselves and explains the true value of connecting with God in order to do so Through this connection with God we reach deeper understanding of the self achieve balance and empower ourselves to be all that we have the potential to be With Dr Chacko s vast knowledge of scripture and included forty day devotional plan for further biblical understanding [Online with God](#) stands as a thorough guide to connecting with the Creator finding inner peace and empowering the self for all that is to come Offers a succinct description of spirit and soul mind and body and the relationship of these to the triangle of the Holy Trinity Rev Dr Tamara Nichols Rodenberg President Bethany College [Regaining Sanity for the Earth](#) Klaus Nürnberger, 2011 For centuries science and faith have been drifting apart Science lost its transcendent foundations faith lost its credibility Science conquered the future faith got stuck in the past Science unleashed unprecedented powers faith became a private pastime The economic and ecological consequences are catastrophic Science and faith must reconnect and lead the way out of the crisis

God in Creation Jürgen Moltmann, 1993-09-01 The title expresses the book s intention not to go on distinguishing between God and the world so as then to surrender the world as godless to its scientific disenchantment and its technical exploitation by human beings but instead to discover God in all the beings he has created and to find his life giving Spirit in the community of creation that they share This view which has also been called panentheistic in contrast to pantheistic requires us to bring reverence for the life of every living thing into the adoration of God And this means expanding the worship and service of God to include service for God s creation [Concerning Creativity](#) John H. Berthrong, 1998-10-01 This work examines the philosophies and theologies of three thinkers Chu Hsi Alfred North Whitehead

and Robert C Neville separated by time space and culture In so doing John H Berthrong provides a suggestive and successful comparison of creativity as a cross cultural theme while introducing Neo Confucianism as a sophisticated dialogue partner with modern Western speculative philosophy and theology Creativity lies at the heart of the discourse of Chu Hsi 1130 1200 and Alfred North Whitehead For both creativity emerges as an attempt to illustrate the organic unity of the world without resorting to an appeal to a source for creativity beyond the concrete actuality of the cosmos Subtle critics such as Robert C Neville argue that process thought is fatally flawed because Whitehead separated creativity from the other crucial elements of his system By interjecting the Chinese Neo Confucian synthesis of Chu Hsi it is possible to show how creativity can be re integrated into process discourse as creative synthesis

The Politics of God Kathryn Tanner, 2022-11-15 Thirty years ago Kathryn Tanner put forward a daring proposal Traditional Christian theologies she insisted can be a source of political transformation rather than a sponsor of the status quo Through a rigorous analysis of Christian beliefs in their historical theological and social diversity Tanner connects belief to attitudes and action and shows how doctrines can relate to each other to social systems and to ethical behavior Drawing on the theologies of divine transcendence and creation that animate and organize so much of her work *The Politics of God* frees traditional theology from its captivity to unjust rulers and systems and unleashes its radical potential for liberation empowerment and the pursuit of a just society This anniversary edition includes a major new preface in which Tanner addresses the changes in the social and political situation that have accumulated in the decades since the book's publication and resituates her argument for a new generation of theologians and activists

Religion and the Challenges of Science William Sweet, Richard Feist, 2017-11-30 Does science pose a challenge to religion and religious belief This question has been a matter of long standing debate and it continues to concern not only scholars in philosophy theology and the sciences but also those involved in public educational policy This volume provides background to the current science and religion debate yet focuses as well on themes where recent discussion of the relation between science and religion has been particularly

concentrated The first theme deals with the history of the interrelation of science and religion The second and third themes deal with the implications of recent work in cosmology biology and so called intelligent design for religion and religious belief The fourth theme is concerned with conceptual issues underlying or implied in the current debates such as Are scientific naturalism and religion compatible Are science and religion bodies of knowledge or practices or both Do religion and science offer conflicting truth claims By illuminating contemporary discussion in the science religion debate and by outlining the options available in describing the relation between the two this volume will be of interest to scholars and to members of the educated public alike

God in His Own Image Syd Brestel,2019-05-07 Someone once noted that God made us in His image and ever since we have tried to do God a favor by making Him in our image It s easy to speak to others about the Jesus who cared for the poor healed the sick and preached love and justice for the least of these But what about the God who tells the Israelites to wage war and kill entire people groups Or threatens exile and then delivers Or sends people to hell Can these really be the same God The simple answer is yes God in His Own Image takes you on a journey through the Bible exploring God s true nature You ll study instances of great mercy and great severity and by the end you ll begin to see why both God s compassion and his wrath are necessary important and even beautiful Get to know the God who is both Lion and Lamb both Judge and Father both kind and severe and perfect in every way

coming soon **Reconstructing a Christian Theology of Nature** Revd Dr Anna Case-Winters, 2013-05-28 In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply critical and particularly insightful feminist theology process thought and the religion and science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth **Molinism** Ken Perszyk, 2011-11-24 Molinism named after the sixteenth century Spanish Jesuit Luis de Molina re emerged in the 1970s after it was unwittingly assumed in versions of Alvin Plantinga's Free Will Defence against the Logical Argument from Evil The Molinist notion of middle knowledge and especially its main objects so called counterfactuals of creaturely freedom have been the subject of vigorous debate in analytical philosophy of religion ever since Is middle knowledge logically coherent Is it a benefit or a liability overall for a satisfying account of divine providence The essays in this collection examine the status defensibility and application of Molinism Friends and foes of Molinism are well represented and there are some lively exchanges between them The collection provides a snap shot of the current state of the Molinism Wars along with some discussion of where we've been and where we might go in the future More battles surely lie ahead the essays and ideas in this collection are likely to have a major impact on future directions The essays are specially written by a line up of established and respected philosophers of religion metaphysicians and logicians There is a substantive Introduction and an extensive Bibliography to assist both students and professionals **God-- the World's Future** Ted Peters, 2015 God The World's Future has been a proven and comprehensive textbook in systematic theology for over twenty years Explicitly crafted to address our postmodern context Peters explains the whole body of Christian historical doctrine from within a roleptic framework hereby the gospel is understood as announcing the pre actualization of the future consummation of all things in Jesus Christ Peters skillfully deploys this concept not only to organize the various theological areas or loci but also to rethink doctrines in light of key postmodern challenges from ecumenism critical historical thinking contemporary science and gender and sexuality issues The Third Edition is thoroughly revised with updated chapters additional chapters updated annotations and

An exploration into the Bible verse Philippians 4 13 through the many attributes of God Creation and Contingency in Early Patristic Thought Joseph Torchia, OP, 2019-04-10

Creation and Contingency in Early Patristic Thought The Beginning of All Things explores the interface between philosophy and theology in the development of the seminal Christian doctrine of creation ex nihilo While its main focus lies in an analysis of first to third century patristic accounts of creation it is likewise attuned to their parallelism with Middle Platonic commentaries on Plato's theory of cosmological origins in the Timaeus Just as Christian thinkers sounded out the theological implications of Gn 1 1 2 the successors to Plato's Academy debated the significance of his teaching Tim 28b that the world came to be The fact that both Genesis and the Timaeus address the beginning of all things served as a means of bridging the conceptual gap between the Greek philosophical tradition and a Christian perspective rooted in scriptural teaching Plato's Timaeus and the doxographies it inspired thus provided early Fathers of the Church with the dialectical resources for explicating their distinctive understanding of creation as a bringing into being from nothing *God* Christoph Schwöbel, 1992

Peeters 1992 **In the Shadow of Christ** Derek Joseph Wiertel, 2025-05-29

In the Shadow of Christ presents a fresh theological interpretation of nature's violent and suffering character as determined by God's self interpretation in Jesus Christ Grounded in the rich spiritual tradition of premodern natural theology Wiertel retrieves a figural reading of nature that interprets the entire span of created existence through Scripture's symbolic landscape This restored vision of the two books rooted in God's creative and redemptive word establishes an interpretive framework that sees all of creation its beauty its strangeness and its tragedies through the creative dynamics of God's revelatory speech In this essay Wiertel critically embraces scriptural figuration with its profoundly Christocentric metaphysical orientation to offer a rich theological vision of creational suffering By engaging Scripture and the natural world figurally and in critical dialogue with contemporary philosophy ethics and biology Wiertel unfolds an expansive theological narrative He maps creation's suffering within the mystery of Jesus Christ inviting readers to see all of natural history as a divine gift ordered toward its eschatological transformation **Creation and Humanity** Ian A. McFarland, 2009-01-01

This major sourcebook provides significant primary readings from the history of Christian theology on the topics of creation and humanity Beginning with an extended introduction McFarland fleshes out the topics of creation and humanity in sections such as God as Creator The Human Creature Evil and Sin and Providence and provides a brief introduction to each selection that demonstrates its importance and establishes its historical context This collection will be of special value in classrooms allowing students to experience firsthand some major works that shaped efforts to forge a sound
