Seagoing Ships and Seamanship in the Bronze Age Levant Shelley Wachsmann, 2018-05-04. During the Bronze Age, the ancient societies that ringed the Mediterranean once mostly separate and isolated, began to reach across the great expanse of sea to conduct trade, marking an age of immense cultural growth and technological development. These intersocietal lines of communication and paths for commerce relied on rigorous open water travel. And as a potential superhighway, the Mediterranean demanded much in the way of seafaring knowledge and innovative ship design if it were to be successfully navigated. In *Seagoing Ships and Seamanship in the Bronze Age Levant*, Shelley Wachsmann presents a one-of-a-kind comprehensive examination of how the early eastern Mediterranean cultures took to the sea and how they evolved as a result. The author surveys the blue water ships of the Egyptians, Syro-Canaanites, Cypriots, Early Bronze Age Aegeans, Minoans, Mycenaeans, and Sea Peoples, and discusses known Bronze Age shipwrecks. Relying on archaeological, ethnological, iconographic, and textual evidence, Wachsmann delivers a fascinating and intricate rendering of virtually every aspect of early sea travel, from ship construction and propulsion to war on the open water, piracy, and laws pertaining to conduct at sea. This broad study is further enhanced by contributions from other renowned scholars. J. Hoftijzer and W. H. van Soldt offer new and illuminating translations of Ugaritic and Akkadian documents that refer to seafaring. J. R. Lenz delves into the Homeric Greek lexicon to search out possible references to the birdlike shapes that adorned early ships' stem and stern. F. Hocker provides a useful appendix and glossary of nautical terms, and George F. Bass's foreword frames the study's scholarly significance and discusses its place in the nautical archaeological canon. This book brings together for the first time the entire corpus of evidence pertaining to Bronze Age seafaring and will be of special value to archaeologists, maritime historians, philologists, and Bronze Age textual scholars. Offering an abundance of line drawings and photographs and written in a style that makes the material easily accessible to the layperson, Wachsmann's study is certain to become a standard reference for anyone interested in the dawn of sea travel.

Homeric Seafaring Samuel EuGene Mark, 2005. In this comprehensive history of Homer's references to ships and seafaring, author Samuel Mark reveals patterns in the way that Greeks built ships and

approached the sea between 850 and 750 b c To discuss and clarify the terms used by Homer Mark draws on scholarly literature as well as examples from recent excavations of ancient shipwrecks Mark begins by emphasizing the importance of the household during a period in which chiefs ruled and Greek nobles disdained merchants and considered seafaring a necessary but less than distinguished activity His chapter on Odysseus s construction of a ship includes discussions of the types of wood used He concludes that most Greek ships were of laced rather than pegged mortise and tenon construction Mark goes on to discuss characteristics of Homeric ships and their stern ornaments oars quarter rudders masts mast steps keels ropes cables and planks Mark reaches several surprising conclusions that in an agricultural society seafaring was a common activity even among the nobles that hugging the coast could be more treacherous than sailing across open sea that Homeric ships were built mainly to be sailed instead of rowed that sea battles were relatively common that helmsmen were crucial to a safe voyage and that harbors were little more than natural anchorages Mark s discussion of Homer s geography covers theories that posit Odysseus sailing in the Adriatic and Mediterranean Seas and even on the Atlantic Ocean As befits a study whose subjects are partly historical partly archaeological and partly myth and legend Mark s conclusions are tentative Yet this comprehensive and meticulous study of Homer s references to ships and seafaring is sure to become a standard study on the subject

Maritime Societies of the Viking and Medieval World James H. Barrett, Sarah Jane Gibbon, 2016-11-25 This book is a study of communities that drew their identity and livelihood from their relationships with water during a pivotal time in the creation of the social economic and political landscapes of northern Europe It focuses on the Baltic North and Irish Seas in the Viking Age ad 1050 1200 with a few later examples such as the Scottish Lordship of the Isles included to help illuminate less well documented earlier centuries Individual chapters introduce maritime worlds ranging from the Isle of Man to Gotland while also touching on the relationships between estate centres towns landing places and the sea in the more terrestrially oriented societies that surrounded northern Europe s main spheres of maritime interaction It is predominately an archaeological project but draws no arbitrary lines between the fields of historical archaeology history and literature The volume explores the complex relationships between long range interconnections and distinctive regional identities that are characteristic of maritime societies seeking to understand communities that were brought into being by their relationships with the sea and who set waves in motion that altered distant shores
