Well illustrated with nearly 300 line drawings maps and photographs Ancient Cities surveys the cities of the ancient Near East Egypt and the Greek and Roman worlds from an archaeological perspective and in their cultural and historical contexts Covering a huge area geographically and chronologically it brings to life the physical world of ancient city dwellers by concentrating on evidence recovered by archaeological excavations from the Mediterranean basin and south west Asia Examining both pre Classical and Classical periods this is an excellent introductory textbook for students of classical studies and archaeology alike

Small Cities with Big Dreams Greg Richards,Lian Duif,2018-07-20 How can small cities make an impact in a globalizing world dominated by world cities and urban development strategies aimed at increasing agglomeration This book addresses the challenges of smaller cities trying to put themselves on the map attract resources and initiate development Placemaking has become an important tool for driving urban development that is sensitive to the needs of communities This volume examines the development of creative placemaking practices that can help to link small cities to external networks stimulate collaboration and help them make the most of the opportunities presented by the knowledge economy The authors argue that the adoption of more strategic holistic placemaking strategies that engage all stakeholders can be a successful alternative to copying bigger places Drawing on a range of examples from around the world they analyse small city development strategies and identify key success factors This book focuses on the case of s Hertogenbosch a small Dutch city that used cultural programming to link itself to global networks and stimulate economic cultural social and creative development It advocates the use of cultural programming strategies as a more flexible alternative to traditional top down planning approaches and as a means of avoiding copying the big city The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

A Theory of the Tache in Nineteenth-Century Painting ?stein Sj?ad,2017-07-05 Without question the tache blot patch stain is a central and recurring motif in nineteenth century modernist painting Manet s and the Impressionists rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots then indirectly as legible signs C nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist s body Even though each manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology
