**The Farther Shore** Don Gifford, 1990-01-01      **E.A. Dupont and His Contribution to British Film** Paul Matthew St. Pierre, 2010      **Cinematography in the Weimar Republic** Paul Matthew St. Pierre, 2016-08-15

In film history director cinematographer collaborations were on a labor spectrum with the model of the contracted camera operator in the silent era and that of the cinematographer in the sound era. But in Weimar era German filmmaking 1919-33 a short period of intense artistic activity and political and economic instability these models existed side by side due to the emergence of camera operators as independent visual artists and collaborators with directors. Berlin in the 1920s was the chief site of the interdisciplinary avant garde of the Modernist movement in the visual literary architectural design typographical sartorial and performance arts in Europe. The Weimar Revolution that arose in the aftermath of the November 1918 Armistice and that established the Weimar Republic informed and agitated all of the art movements such as Expressionism Dada the Bauhaus Minimalism Objectivism Verism and Neue Sachlichkeit New Objectivity. Among the avant garde forms of these new stylistically and culturally negotiated arts the cinema was foremost and since its inception had been a radical experimental practice in new visual technologies that proved instrumental in changing how human beings perceived movement structure perspective light exposure temporal duration continuity spatial orientation human postural facial vocal and gestural displays and their own spectatorship as well as conventions of storytelling like narrative setting theme character and structure. Whereas most of the arts mobilized into schools movements institutions and other structures cinema a collaborative art tended to organize around its ensembles of practitioners. Historically the silent film era 1895-1927 is associated with auteurs the precursors of François Truffaut and other filmmakers in the 1960s actuality filmmakers and pioneers like R.W. Paul and Fred and Joe Evans in England Auguste and Louis Lumière and Georges Méliès in France and Charles Chaplin and Buster Keaton in America who by managing all the compositional executional and editorial facets of film production scripting directing acting photographing set costume and lighting design editing and marketing imposed their personal vision or authorship on the film. The dichotomy of the auteur and the production ensemble established a production hierarchy in most filmmaking. In formative German silent film however this hierarchy was less rank or class driven because collaborative partnerships took precedence over single authorship. Whereas in silent film production in most countries the terms filmmaker and director were synonymous in German silent film the plural term *filmemacherin* connoted both directors and cinematographers along with the rest of the filmmaking crew. Thus German silent filmmakers' principle contribution to the new medium and art of film was less the representational iconographies of Expressionist New Objective and Naturalist styles than the executional practice of co-authorship and co-production in distinctive cinematographer-director partnerships such as those of cinematographer Theodor Sparkuhl and director Ernst Lubitsch Fritz Arno Wagner with F.W. Murnau Fritz Lang and G.W. Pabst Rudolf Mat with Carl Theodor Dreyer Guido Seeber with Lang and Pabst and Carl Hoffmann with Lang and

Alfred I. Tauber, 2001-05-07 In his graceful philosophical account Alfred I Tauber shows why Thoreau still seems so relevant today more relevant in many respects than he seemed to his contemporaries Although Thoreau has been skillfully and thoroughly examined as a writer naturalist mystic historian social thinker Transcendentalist and lifelong student we may find in Tauber s portrait of Thoreau the moralist a characterization that binds all these aspects of his career together Thoreau was caught at a critical turn in the history of science between the ebb of Romanticism and the rising tide of positivism He responded to the challenges posed by the new ideal of objectivity not by rejecting the scientific worldview but by humanizing it for himself Tauber portrays Thoreau as a man whose moral vision guided his life s work Each of Thoreau s projects reflected a self proclaimed metaphysical ethics an articulated program of self discovery and self knowing By writing by combining precision with poetry in his naturalist pursuits and simplicity with mystical fervor in his daily activity Thoreau sought to live a life of virtue one he would characterize as marked by deliberate choice This unique vision of human agency and responsibility will still seem fresh and contemporary to readers at the start of the twenty first century *The Conduct of Inquiry in International Relations* Patrick Thaddeus Jackson, 2016-03-31 *The Conduct of Inquiry in International Relations* first edition was winner of the ISA Northeast s Yale H Ferguson Award and the ISA Theory Section s Best Book of the Year

award The Conduct of Inquiry in International Relations provides an introduction to the philosophy of science issues and their implications for the study of global politics The author draws attention to the problems caused by the misleading notion of a single unified scientific method and proposes a framework that clarifies the variety of ways that IR scholars establish the authority and validity of their empirical claims Jackson connects philosophical considerations with concrete issues of research design within neopositivist critical realist analyticist and reflexive approaches to the study of world politics Envisioning a pluralist science for a global IR field this volume organizes the significant differences between methodological stances so as to promote internal consistency public discussion and worldly insight as the hallmarks of any scientific study of world politics In this second edition Jackson has centralised the philosophical history of the science question into a single chapter providing a clearer picture of the connections between contemporary concerns about the status of knowledge and classic philosophical debates about the relationship between human beings and the world they inhabit The central chapters feature more detailed and pedagogically useful illustrations of the methodological positions discussed making the book even better suited to clarify the philosophical distinctions with respect to which a scientific researcher must locate herself The second edition will continue to be essential reading for all students and scholars of International Relations Political Science and Philosophy of Science

*The Global Age* Martin Albrow, 2013-06-28 Many authors who discuss the idea of globalization see it as continuing pre established paths of development of modern societies Post modernist writers by contrast have lost sight of the importance of historical narrative altogether Martin Albrow argues that neither group is able to recognize the new era which stares us in the face A history of the present needs an explicit epochal theory to understand the transition to the Global Age When globality displaces modernity there is a general decentering of state government economy culture and community Albrow calls for a recasting of the theory of such institutions and the relations between them He finds an open potential for

society to recover its abiding significance in the face of the declining nation state At the same time a new kind of citizenship is emerging This important book will provoke both radicals and conservatives Its scholarship ranges widely across the social sciences and humanities It is bound to promote wide cross disciplinary debate **Mindsight** Rudy Magnan,2010-08-31
