probably unrivalled in any other field of human activity Significant advances are made every year and both our work and  
leisure activities are critically influenced by these developments Getting the message explores the fascinating history of  
communications starting with ancient civilisations the Greeks and Romans then leading through the development of the  
electric telegraph and up to the present day with email and cellular phones The technology is explained in a particularly  
simple and accessible way and themes from politics economics and society weave in and out of the scientific ideas The book  
concludes with a look at the possible future of communications the new developments to come and the implications these will  
have for our everyday lives Lavishly illustrated and including many original illustrations that show just how these new  
developments were received in their time the book presents an informative and highly entertaining introduction to the field
