Mansfield, Helen V. Milner, 1997 Exploring regionalism from a political economic perspective this text investigates why regional arrangements are formed the conditions under which these arrangements solidify and why they take on different institutional forms *The Rights of Strangers* Georg Cavallar, 2017-07-05 This study investigates the thinking of European authors from Vitoria to Kant about political justice the global community and the rights of strangers as one special form of interaction among individuals of divergent societies political communities and cultures Taking an interdisciplinary approach it covers historical material from a predominantly philosophical perspective interpreting authors who have tackled problems related to the rights of strangers under the heading of international hospitality Their analyses of the civitas maxima or the societas humani generis covered the nature of the global commonwealth Their doctrines of natural law ius naturae were supposed to provide what we nowadays call theories of political justice The focus of the work is on international hospitality as part of the law of nations on its scope and justification It follows the political ideas of Francisco de Vitoria and the Second Scholastic in the 16th century of Alberico Gentili Hugo Grotius Samuel Pufendorf Christian Wolff Emer de Vattel Johann Jacob Moser and Immanuel Kant It draws attention to the international dimension of political thought in Thomas Hobbes John Locke Jean Jacques Rousseau David Hume Adam Smith and others This is predominantly a study in intellectual history which contextualizes ideas but also emphasizes their systematic relevance **America, China, and the**

Translating Empire Sophus A. Reinert, 2011-10-17 Historians have traditionally turned to free trade and laissez faire to explain the development of political economy during the Enlightenment Reinert argues that economic emulation was the prism through which philosophers ministers reformers and merchants thought about imperialism economics industry and reform in the early modern period *Introduction to International Relations* Joseph Grieco, G. Such notions Klabbers argues are internally inconsistent and founded upon untenable presumptions Moreover they find little support in the pertinent decisions of municipal and international courts and tribunals The book addresses issues of importance not only for academics working in international law constitutional law and political science but also for practitioners involved in the making implementation and enforcement of international agreements *The rights and duties of neutrals* Stephen Neff,2022-12-20 Now available as an ebook for the first time this 2000 title in the Melland Schill Studies in International Law series is a survey of the history of law of neutrality from its mediaeval roots to the end of the twentieth century The theme is the eternal clash between the rights of neutrals and belligerents between the right of belligerents to defeat their enemies and the right of neutrals to trade freely with all parties Over the centuries belligerent powers have devised various legal means of restricting neutrals from trading with their enemies such as the law of blockade and contraband carriage At the same time neutral traders have done their best to evade and circumvent these restrictions This book traces the evolution of state practice together with the debates over the relevant doctrinal issues and the various attempts to reform and codify the law of neutrality **Legal Control of the Private Military Corporation** B. Morrell,2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War Through a combination of industrialization technological innovation and imperial expansion the industrializing powers of the world helped to create inter connected global space that left few regions untouched In ten concise chapters this book relays the major shifts in global power economics and society outlining the interconnections of global industrial imperial and economic change for local and regional experiences identities and politics It finishes with an expos on the catastrophic impact of the First World War on this global system The First Age of Industrial Globalization weaves together the histories of industrialization world economy imperialism international law diplomacy and war which historians usually treat as separate developments and integrates them to offer a new analysis of an era of fundamental historical change It shows that the revolutionary changes in politics society and international affairs experienced in the 19th century were inter connected developments It is essential reading for any student of modern global history Mastering Space John Agnew, Stuart

World Politics Fred Halliday,1999-08-23 The relation of revolutions to international relations is central to modern history Revolutions have as much as war or nationalism shaped the development of world politics Equally revolutions have been in cause ideology and consequence international events By putting the international politics of revolution centre stage Fred Halliday s book makes a major contribution to the understanding of both revolution and world politics **Controversies in**

International Relations Theory Charles W. Kegley Jr,1995-03-27 This new reader in international theory brings together nine new essays and four classics two of them heavily revised for republication here to provide a clear introduction to the two dominant traditions in contemporary international relations realism and neoliberalism As well as setting out the current state of each approach and mapping out the possibilities of creative synthesis the book focuses on emerging neorealist and neoliberal perspectives on such key issues as international trade and organisation arms control and morality in foreign policy

Restraining Power through Institutions Alexandru V. Grigorescu,2023-10-09 This book challenges the traditional view that meaningful analogies cannot be drawn between domestic and international politics Alexandru V Grigorescu shows that there are important parallels to be drawn across these two realms if political interactions among states over the past two centuries are compared to those within states going back about a thousand years He focuses specifically on the evolution of institutions that restrain concentrated power such as courts assemblies and bureaucracies Restraining Power through Institutions begins by developing a set of theoretical arguments about the emergence change and consolidation of institutional restraints on power These are primarily derived from literature focusing on domestic politics going back to events such as those surrounding the signing of the Magna Carta and the emergence and evolution of the Curia Regis in

England or of the Estates General and Parlements in France It then assesses the relevance of such arguments for the evolution of numerous international institutions international courts such as the Permanent Court of Arbitration International Court of Justice and International Criminal Court international assemblies and parliaments such as the Assembly of the League of Nations UN General Assembly and European Parliament and international secretariats such as those of the Central Commission for the Navigation of the Rhine League of Nations UN and World Bank The similarities between developments in the domestic and international realms lead to a number of important conclusions about future expectations for international institutions and for world politics more broadly In particular the book argues that complementing the traditional focus on efforts to acquire power with the Lockean focus on restraining power offers a more complete depiction of international politics This novel perspective consequently shifts the focus from the interests and actions of a handful of powerful states to those of virtually all states and groups of states regardless of how powerful they are The Politics of Strategic Adjustment
Peter Trubowitz, Emily O. Goldman, Edward Rhodes, 1999 The contributors examine a century of American experience to illustrate how the United States determines its security policies While scholars have typically focused on outside factors such as international pressures constraints and opportunities this collection of essays shows that decisions about strategy are critically shaped by domestic politics political ideologies state structure and societal interest
