the technologies we use that the use of non human sources of energy interferes with human psychological development and that the unfulfilled urges within us explode in the violent technologies that are destroying our planet The solutions if it is not too late therefore lie in wise choice rather than wise use of our technologies **Goldmine** David Brown,2019-07-23 First published in 1995 this volume uncovered a wealth of low cost good quality material for use in the classroom Author David Brown has been teaching in primary middle and secondary schools for 23 years It was through David s need to resource topics that he uncovered this material Goldmine places these resources into topic areas describes them and tells you where you can get them from Since the first edition in 1985 Goldmine has developed into the country s leading directory of free and sponsored teaching resources providing the wherewithal to obtain over 6000 resources from some 235 suppliers Budget conscious schools will find it saves its purchase price many times over and parents and teachers are safe in the knowledge that all the items described in here are personally recommended by a teacher the compiler himself *Sociology, Environmentalism, Globalization* Steven Yearley,1996-04-28 This authoritative book brings together the sociologies of globalization and the environment in one volume Steven Yearley argues that environmental issues have received scant attention in the general debate on globalization even though environmentalists have been very successful in capturing the language and imagery of the globe **Clean Air.
