**From Cells to Souls, and Beyond** Malcolm A. Jeeves, 2004 This is a print on demand book and is therefore non returnable *Debating Christian Theism* J. P. Moreland, Khaldoun A. Sweis, Chad V. Meister, 2013-08-01 This volume offers groundbreaking dialogue by many of the most prominent scholars in the field in a definitive treatment of central issues in theism and Christian faith Psychology & Christianity Integration Daryl H. Stevenson, Brian E. Eck, Peter C. Hill, 2007

Theological Neuroethics Neil Messer, 2017-10-19 Neil Messer brings together a range of theoretical and practical questions raised by current research on the human brain questions about both the ethics of neuroscience and the neuroscience of ethics While some of these are familiar to theologians others have been more or less ignored hitherto and the field of neuroethics as a whole has received little theological attention Drawing on both theological ethics and the science and theology field Messer discusses cognitive scientific and neuroscientific studies of religion arguing that they do not give grounds to dismiss theological perspectives on the human self He examines a representative range of topics across the whole field of neuroethics including consciousness the self and the value of human life the neuroscience of morality determinism freewill and moral responsibility and the ethics of cognitive enhancement A New Hope Stephen Lakkis, 2014-10-16 Theology and historiography often see the future as a realm open to new experiences and unexpected events Yet for classical physics the future was the result of the universe's predictable development Given enough information about current states we could use the laws of nature to uncover the universe's future Modern space time theory with its picture of an invariant four dimensional universe only makes this problem more acute Room for radically novel events for miracles and new hope seems to have disappeared It is this hope for something new that the German theologian Wolfhart Pannenberg seeks to preserve in his controversial work on time To defend God's supernatural freedoms and to escape natural determinism Pannenberg invokes a medieval understanding of the unsurpassable and absolute power of God using God's potentia absoluta to reverse time's flow and express absolute authority over creation's progress Time and all its contents are utterly subjected under the free will of a divine all determining reality But is this tenable for modern understandings of God and the universe Or does it lead to theological difficulties and promote an arms race between the laws of nature and the rule of God In this volume Stephen Lakkis offers an analysis and critique of Pannenberg's approach and suggests a different way forward

*Will I Still Be Me?* Christine Bryden, 2018-08-21 Christine Bryden was diagnosed with dementia in 1995 but her experiences do not reflect the mainstream discourse of loss of self while living with dementia In this book she explains why people with dementia have a meaningful and continuing sense of self and calls for a different understanding of dementia that results in greater inclusion *Christ and Evolution* Celia Deane-Drummond, 2009 The figure of Christ is at the heart of Christian faith and self understanding whether conservative or liberal In this volume widely acclaimed theologian Celia Deane Drummond sets out to develop an understanding of Christ that is far more conscious of the evolutionary history of

humanity and current evolutionary theories about the natural world It argues that the concepts of wisdom and wonder have special roles in both theology and science and can point to an integrated inclusive spirituality and a fuller vision of life and the universe Book jacket      **Soul-Searching** Luke Jeffrey Janssen,2019-08-06 There are well over one hundred different views of the nature of human existence though the Bible may rule out many of these there still remains a large number that are all compatible with Scripture The Bible never explicitly defines the nature of the soul or spirit which is actually quite puzzling or even ironic given that one major aim of Scripture is spiritual development and ultimate questions about the soul In fact Judeo Christian thinking on those questions has been evolving over the course of four thousand years This book documents that evolution as a man named Abram left Babylon four thousand years ago journeying through the lands and the philosophies of civilizations preceding him by many more thousands of years while he and his descendants both physical and spiritual unpacked their understanding of our inner being the human soul and the afterlife That journey is followed to the present day and examines how a critically thinking Christian can embrace a theology of the human soul that is fully compatible with modern scientific findings including explanations for consciousness mind and soul      *T&T Clark Handbook of Theological Anthropology* Mary Ann Hinsdale,Stephen Okey,2021-01-28 Including classical modern and postmodern approaches to theological anthropology this volume covers the entire spectrum of thought on the doctrines of creation the human person as imago Dei sin and grace The editors have gathered an exceptionally diverse range of voices ensuring ecumenical balance Protestant Roman Catholic and Orthodox and the inclusion of previously neglected perspectives women African American Asian Latinx and LGBTQ The contributors revisit authors from the Great Tradition early church medieval and modern and discuss them alongside critical and liberationist approaches ranging from feminist decolonial and intersectional theory to critical race theory and queer performance theory This is a much needed overview of a rapidly evolving field      *Precious Enemy* Toby Jennings,2017-04-17 King Solomon asserted love is as strong as death Song of Solomon 8 6 Solomon the wisest of all Israel s kings recognized that while every human would eventually succumb to death death is not ultimate in power The God whose essence is love designed and created both human life and death as instruments for the display of his own splendor and purposes Neither human life nor death then can deviate from God s ultimate purpose and good for the creature made in his own image Biblically death serves as the perfect foil to mark both the immeasurable value of human life and at the same time the relatively limited value of it Rather than either worshipping or desecrating this finite gift of human life we can value it rightly and also worship the God who in his literally infinite wisdom gives and takes away life in accord with his good and gracious purposes      Assaulted Personhood Craig C. Malbon,2020-12-14 In 21st century America personhood is under daily assault sometimes with dire consequences Scientist ethicist and ordained minister Craig C Malbon encourages the reader to consider such assaults on personhood endured by victims of abortion ageism Alzheimer s disease drug addiction mental and physical disabilities gender gender orientation racism sexual

preference identity politics and our will to power over the other In exploring personhood status Malbon poses difficult questions for us Is personhood assigned as all or nothing or is it a sliding scale based upon criteria arbitrarily aimed at our vulnerabilities Does the voiceless embryo and fetus have advocates who can speak to the moral question of abortion Is the personhood of an economically insecure pregnant woman degraded to the point where lack of access to early termination of pregnancy results in coercive childbearing Does being a member of the LGBTQI community target one for assaults on personhood to the extreme of being killed In delving into the biology and psychology of assaults of self upon the other Malbon sees powerful linkages of everyday assaults on personhood to darker profound original sins that are foundational to the rise of the American empire i e assaults on the indigenous Native Americans and assaults derivative to the institution of slavery upon Africans African Americans and their descendants      The Brain, the Mind, and the Person Within Mark Cosgrove, 2019-03-21 The brain with its nearly one hundred billion neurons is the most complex structure in the universe and we are living in a period of revolutionary advancements in neuroscience Yet scientists and skeptics often frame these findings in ways that challenge the Christian worldview Many professionals and popularizers claim that human beings are their brains and that all human behavior and experience are merely by products of brain physiology In The Brain the Mind and the Person Within professor of psychology Mark Cosgrove not only explains what the brain is and what it does but also corrects common misinterpretations and demonstrates that what we know about the brain coheres with the teachings of Scripture He contends that humans are unities of soul and body in which both the spiritual and the physical interact From this perspective he presents informative overviews of contemporary debates about the brain including consciousness free will God spots personhood and life after death The better we understand the brain the better we understand ourselves and our exquisite design that reflects the wisdom of the Creator Thoughtful readers will find this to be a fascinating accessible survey of this unique part of the body and the profound theological and technological issues surrounding it      **The Testimony of the Spirit** R. Douglas Geivett, Paul K. Moser, 2017 The theme of the testimony of the Spirit of God is found in various Biblical writings but it has received inadequate attention in recent theology Biblical studies and the philosophy of religion This book corrects that inadequacy from an interdisciplinary perspective including theology Biblical studies philosophy of religion ethics psychology aesthetics and apologetics The book includes previously unpublished work on the topic of the testimony of the Spirit in connection with its role in Biblical literature an ontology of the Spirit conscience and the voice of God moral knowledge religious diversity and spiritual testimony psychology and neuroscience community and language art and beauty desire and gender apologetics and the church and discernment The book includes a General Introduction that identifies some key theological and philosophical topics that bear on the topic of the testimony of the Spirit and it concludes with a bibliography on the testimony of the Spirit The book pursues its topics in a manner accessible to a wide range of readers from various disciplines including college students educated non academics and researchers      A Science and Religion

Primer Heidi A. Campbell, Heather Looy, 2009-03 The California missions are unique reminders of a largely ignored part of the history of the United States Nowhere else in the United States can one view such complete remnants of an earlier rule Lands Never Trodden brings to the general public the fullest examination to date of the institutions of the Franciscan missions in California and of the stories hidden in these monuments Franciscan priests Spanish officials and Native Americans all have their stories faithfully reported in this volume Each mission carries with it tales of unremitting labor sacrifice love intrigue passion violence and death This volume treats the familiar stories of the missionaries as well as the previously untold stories of the Native Americans with equal candor With more than sixty photographs and based on exhaustive research and historical documents Lands Never Trodden is an entertaining educational and readable presentation of the twenty one California missions

*Paul and the Person* Susan Grove Eastman, 2017 In this book Susan Grove Eastman presents a fresh and innovative exploration of Paul's participatory theology in conversation with both ancient and contemporary conceptions of the self Juxtaposing Paul ancient philosophers and modern theorists of the person Eastman opens up a conversation that illuminates Paul's thought in new ways and brings his voice into current debates about personhood

*The Truth about Science and Religion* Fraser Fleming, 2017-02-23 Religion has been a major influence on the development of science over the past two millennia The Truth about Science and Religion tells the story of their interaction examining fundamental topics such as the origin of the universe evolutionary processes Christian beliefs the history of science and what being human really means from both a scientific and a religious perspective The Truth about Science and Religion aims to help explore personal views on science and religion offering questions for discussion at the end of each chapter The book provides the historical and scientific background as well as the philosophical insight needed to think through issues of science and religion and their influence on personal beliefs Metaphors comparisons and analogies are used to simplify complex topics such that any reader can engage with the thoughts and questions posed Unlike other books in this field The Truth about Science and Religion follows a chronological scheme beginning with the origin of the universe and life itself before discussing matters of the human condition the life of Jesus and stories of several great scientists to regain a unified view of science and religion in today's world

**A Brief History of the Soul** Stewart Goetz, Charles Taliaferro, 2011-05-18 This book is a clear and concise history of the soul in western philosophy from Plato to cutting edge contemporary work in philosophy of mind Packed with arguments for and against a range of different historically significant philosophies of the soul Addresses the essential issues including mind body interaction the causal closure of the physical world and the philosophical implications of the brain sciences for the soul's existence Includes coverage of theories from key figures such as Plato Aquinas Locke Hume and Descartes Unique in combining the history of ideas and the development of a powerful case for a non reductionist non materialist account of the soul

*The Spiritual Soul* Matthew J. Churchouse, 2024-04-30 What is the human soul What does it do How does it relate to the brain and body What is happening

in the soul when a person encounters the Holy Spirit These are some of the questions addressed in *The Spiritual Soul* as it advances towards its overall goal of proposing a re new ed Pentecostal Charismatic understanding of what constitutes a human being In pursuing this overarching intention Churchouse responds to the anthropology of two leading Pentecostal scholars Amos Yong and Veli Matti K rkk inen specifically their theological models concerning what a human is constituted essentially made up of to offer an enhanced Pentecostal model in preference to their monistic view Drawing upon the sources of biblical studies the philosophy of mind and upon the pneumatology that flows from Pentecostal spirituality Churchouse advances a renewed understanding of the human soul one illumined by the spirit and the Spirit to engender his distinctive Pentecostal model of human constitution     *The Reciprocating Self* Jack O. Balswick, Pamela Ebstyne King, Kevin S. Reimer, 2016-07-05 On the basis of a theologically grounded understanding of the nature of persons and the self Jack O Balswick Pamela Ebstyne King and Kevin S Reimer present a model of human development that ranges across all of life s stages This revised second edition engages new research from evolutionary psychology developmental neuroscience and positive psychology     *And Jacob Digged a Well* Theodore M. Snider, 2012-05 The subject of Christology has been a struggle for the church from the very beginning It has resulted in divisions crusades inquisitions persecutions and a wide range of creeds Each group claims it possesses the truth a truth revealed to them a particular turn on belief they alone rightly proclaim In *And Jacob Digged a Well* author Pastor Theodore M Snider provides a commentary on religion where it s been where it s headed and how it fits in the modern world He seeks to answer this question why do we believe what we believe Snider discusses how scientific and technological discoveries have changed not only our worldviews but also our Godviews and how consciousness and brain research are altering the way we understand each other and how beliefs are formed He compiles a diverse amount of information on topics relevant to both secular and religious audiences including creationism evolution intelligent design and artificial intelligence through historical scientific cognitive and psychological avenues *And Jacob Digged a Well* reminds us that natural may not be as clear as we once thought Faith in the twenty first century needs to look quite different from the past century
