Molecular Mechanisms for Sensory Signals Edward M. Kosower, 2017-03-14 Pursuing the questions of how we learn and how memory is made Edward Kosower introduces a novel and rich approach to connecting molecular properties with the biological properties that enable us to write and read to create culture and ethics and to think Here he examines what happens within a single cell in reaction to external stimuli and shows the parallels between single cell and multicellular responses To address the problem of learning Kosower explains the molecular mechanisms of responses to input from taste olfactory and visual receptors He then shows how these and other processes serve as the basis for memory This study covers such signals for the molecular process of learning as pheromones the molecular signals mediating behavior light activates the G protein receptor rhodopsin and acetylcholine opens the nicotinic acetylcholine receptor Kosower's discussion of the structure and function of these complex molecules has direct implications for such areas as molecular neurobiology bioorganic chemistry and drug design in elucidating approaches to the structure of drug targets Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Enola Gay and the Court of History Robert P. Newman, 2004 In this hard hitting thoroughly researched and crisply argued book award winning historian Robert P Newman offers a fresh perspective on the dispute over President Truman's decision to drop the atomic bomb on Japan in World War II Newman's argument centers on the controversy that erupted around the National Air and Space Museum's NASM exhibit of Enola Gay in 1995 Newman explores the tremendous challenges that NASM faced when trying to construct a narrative that would satisfy American veterans and the Japanese as well as accurately reflect the current historical research on both the period and the bomb His full scale investigation of the historical dispute results in a compelling story of how and why our views about the bombing of Japan have evolved since its occurrence Enola Gay and the Court of History is compulsory reading for all those interested in the history of the Pacific war the morality of war and the failed NASM exhibition The book offers the final word on the debate over Truman's decision to drop the bomb
