From Foraging To Agriculture The Levant At The End Of The Ice Age:

From Foraging to Agriculture Donald O. Henry, 1989-01-01 **Humans at the End of the Ice Age** Lawrence Guy Straus, Berit Valentin Eriksen, Jon M. Erlandson, David R. Yesner, 2012-12-06 Humans at the End of the Ice Age chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial interglacial boundary Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch detailing the nature speed and magnitude of the human adaptations that culminated in the development of food production in many parts of the world The text is aided by vital maps chronological tables and charts

Hunter-Gatherer Archaeobotany Sarah L.R. Mason, 2016-09-17 Hunter Gatherer Archaeobotany shows how archaeobotanical investigations can broaden our understanding of the much wider range of plants that have been of use to people in the recent and more distant past The book comprises sixteen papers covering aspects of the archaeobotany of wild plants ranging across the northern hemisphere from Japan across America Europe and into the Near East Sites examined span the Upper Palaeolithic to the recent past and demonstrate how such studies can extend our understanding of human interaction with plants throughout our history **Ancient Food Technology** Curtis, 2021-11-15 Employing a wide variety of sources this book discusses innovations in food processing and preservation from the Palaeolithic period through the late Roman Empire All through the ages there has been the need to acquire and maintain a consistent food supply leading to the invention of tools and new technologies to process certain plant and animal foods into different and more usable forms This handbook presents the results of the most recent investigations identifies controversies and points to areas needing further work It is the first book to focus specifically on ancient food technology and to discuss the integral role it played in the political economic and social fabric of ancient society Fully documented and lavishly illustrated with numerous photographs and drawings it will appeal to students and scholars of both the arts and the sciences **Encyclopedia of**

Anthropology H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories **Behavioral Ecology and the Transition to Agriculture** Douglas J. Kennett, Bruce

Winterhalder, 2006-01-02 For the newcomer to the literature and logic of human behavioral ecology this book is a flat out bonanza entirely accessible self critical largely free of polemic and above all stimulating beyond measure It s an extraordinary contribution Our understanding of the foraging farming dynamic may just have changed forever David Hurst Thomas American Museum of Natural History Civilizing Climate Arlene Miller Rosen, 2007-02-23 This book provides a description based upon research evidence from the Near East and elsewhere of changes in climate and how they affected social and political developments It includes three major case studies of the Neolithic Early Bronze and Roman Byzantine periods **Dorothy Garrod and the Progress of the Palaeolithic** William Davies, Ruth Charles, 2017-03-20 Dorothy

Garrod opened many doors not only was she the first female professor at Cambridge University but she illuminated and in some cases initiated some of prehistoric archaeology's most central issues. The quiet yet self-possessed woman was best known as a fieldworker often venturing into dangerous regions such as Kurdistan. Her first and highly successful excavation revealed fragments of Neanderthal fossils in Gibraltar. This volume reviews modern research on this site as well as exploring other issues which interested the Disney Professor of Archaeology: hominid remains from Mount Carmel, Palaeolithic sites in the Zagros Mountains, Bulgaria and Britain and the cultural evidence for the beginning of Near Eastern food production which Garrod called Natufian. Also included are papers concerned with her life background and published work. The topics span and continuing relevance are testament to Dorothy Garrod's remarkable character and great achievements.

Processual Archaeology Amber Johnson, 2004-11-30 Processual archaeologists seek to explain variability in the static archaeological record we observe in the present as a necessary first step toward learning how to learn about the operation of cultural dynamics in the past. The approach is a diverse and productive one that focuses on developing learning strategies. Researchers pursuing processual archaeology have already discovered a great deal about the archaeological record and about past dynamics and there is a huge potential for building on the foundation laid thus far. The contributors to this volume provide clearly written research articles that are easily accessible to upper level undergraduates and professional archaeologists. Although the papers do not focus on a single region, time period or domain of observation e.g. settlement patterns or lithics or site structure they are integrated by shared goals for archaeology. This book clearly demonstrates that processual archaeology far from having been replaced by post processual archaeology is becoming more and more powerful as our analytic sophistication and knowledge of the archaeological record grow. **The History of Experience** Wolfgang

Leidhold, 2022-10-14 In a wide arc from the Paleolithic to the present day this book explores the changing structure of human experience and its impact on the dynamics of cultures, civilizations and political ideas. The main thesis is a paradigm shift: the structure of human experience is not a universal constant but changes over time. Looking at the entire range of human history there are a total of nine transformations beginning with conscious perception and imagination in the Paleolithic and ending for the time being in modern times with the discovery of the unconscious. In between this book explores six more transformations that took place in different regions and at different times which include a sense of order, self-reflection, the eye of reason, spiritual experience as well as the experience of creativity and of consciousness. As such *The History of Experience* presents both a cross-cultural and comparative theory of experience and cultural dynamics and an exploration of rich materials from East and West. This book is of great use to upper level undergraduates, postgraduates and scholars interested in the relationship between history, human experience, culture and political order.

Hulled Wheats Stefano Padulosi, 1996 Genetik und Evolutionsforschung Taxonomie und Nomenklatur Spelzweizen **Pathways to Power** T.

Douglas Price, Gary M. Feinman, 2010-08-20 There are few questions more central to understanding the prehistory of our

species than those regarding the institutionalization of social inequality Social inequality is manifested in unequal access to goods information decision making and power This structure is essential to higher orders of social organization and basic to the operation of more complex societies An understanding of the transformation from relatively egalitarian societies to a hierarchical organization and socioeconomic stratification is fundamental to our knowledge about the human condition In a follow up to their 1995 book *Foundations of Social Inequality* the Editors of this volume have compiled a new and comprehensive group of studies concerning these central questions When and where does hierarchy appear in human society and how does it operate With numerous case studies from the Old and New World spanning foraging societies to agricultural groups and complex states *Pathways to Power* provides key historical insights into current social and cultural questions

Millennial Landscape Change in Jordan Carlos E. Cordova, 2022-08-30 Stands of relict vegetation soil horizons and sedimentary deposits along with archaeological evidence suggest that during certain time spans within the past twenty millennia Jordan was endowed with moister and more vegetated landscapes than the ones we see today In this detailed volume Carlos E Cordova synthesizes diverse information on multiple topics to provide a comprehensive view of the changes in the Jordanian landscape and the many ways it has been affected by human habitation and the forces of nature Cordova focuses on geoarchaeological and cultural ecological aspects of research presenting data from physical chemical and biological sources He examines the changing influence of climate vegetation and hunting opportunities on cultural exploitation tactics as well as the effects of the growing population and agriculture on the environment Cordova argues that an interdisciplinary approach to studying the area is crucial to achieving a true understanding of Jordan s changing landscape Chapter topics include approaches to the study of ancient Jordanian landscapes in the Near Eastern context the physical scene endowed landscapes of the woodlands the encroaching drylands the current and future state of the paleoecological and geoarchaeological record patterns of millennial landscape change and the process of interpreting millennial landscape change The text is abundantly illustrated with photos line illustrations tables and maps providing a valuable assessment of archaeological developments over the prehistory and history of what today is the Hashemite Kingdom of Jordan This volume will be especially welcomed by scholars interested in the archaeology history and geography of Jordan the Levant and the Near East and by field school students working on archaeological projects in Jordan

Becoming Neolithic Trevor Watkins, 2023-12-05 *Becoming Neolithic* examines the revolutionary transformation of human life that was taking place around 12 000 years ago in parts of southwest Asia Hunter gatherer communities were building the first permanent settlements creating public monuments and symbolic imagery and beginning to cultivate crops and manage animals These communities changed the tempo of cultural social technological and economic innovation Trevor Watkins sets the story of becoming Neolithic in the context of contemporary cultural evolutionary theory There have been 70 years of international inter disciplinary research in the field and in the laboratory Stage by stage he unfolds an up to date

understanding of the archaeology the environmental and climatic evidence and the research on the slow domestication of plants and animals Turning to the latest theoretical work on cultural evolution and cultural niche construction he shows why the transformation accomplished in the Neolithic began to accelerate the scale and tempo of human history Everything that followed the Neolithic up to our own times has happened in a different way from the tens of thousands of years of human evolution that preceded it This well documented account offers a useful synthesis for students of prehistoric archaeology and anyone with an interest in our prehistoric roots This new narrative of the first rapid transformation in human evolution is also informative to those interested in cultural evolutionary theory

Beyond the Fertile Crescent: Late Palaeolithic and Neolithic Communities of the Jordanian Steppe. The Azraq Basin Project Andrew Garrard, Brian Byrd, 2013-11-01 The natural arc of resource rich land which forms the Fertile Crescent of South West Asia is regarded as the earliest centre of village based farming in the world and has been the focus of much of our understanding of the transition from Epipalaeolithic hunter gathers to Neolithic farmers Beyond the Fertile Crescent is the first volume of the Azraq Project a large scale archaeological and palaeoenvironmental survey and excavation project undertaken between 1982 and 1989 in the ecologically diverse sub region of the Azraq Basin in north central Jordan an area rich in Palaeolithic and Neolithic archaeology Beginning with an overview to the Project aims a detailed analysis of past and present environments and land use and the history of excavation in the Basin Beyond the Fertile Crescent explores the geology stratigraphy and dating of the Late Palaeolithic sites and provides a detailed description of the technology and typology of the lithic assemblages from the sites These are then compared with those from the wider Levant in order to explore possible links between technological traditions and social groups in order to understand the evidence for settlement strategies across the region

Encyclopedia of Prehistory Peter N. Peregrine, Melvin Ember, 2003-03-31 The Encyclopedia of Prehistory represents temporal dimension Major traditions are an attempt to provide basic information also defined by a somewhat different set of on all archaeologically known cultures sociocultural characteristics than are eth covering the entire globe and the entire nological cultures Major traditions are prehistory of humankind It is designed as defined based on common subsistence a tool to assist in doing comparative practices sociopolitical organization and research on the peoples of the past Most material industries but language ideology of the entries are written by the world s and kinship ties play little or no part in foremost experts on the particular areas their definition because they are virtually and lime periods unrecoverable from archaeological con The Encyclopedia is organized accord texts In contrast language ideology and ing to major traditions A major tradition kinship ties arc central to defining ethno is defined as a group of populations sharing logical cultures similar subsistence practices technology There are three types of entries in the and forms of sociopolitical organizati01I Encyclopedia the major tradition entry

Natufian Foragers in the Levant Ofer Bar-Yosef, François R. Valla, 2013-12-01 This large volume presents virtually all aspects of the Epipalaeolithic Natufian culture in a series of chapters that cover recent results of field work analyses of

materials and sites and synthetic or interpretive overviews of various aspects of this important prehistoric culture The
